Mediterranean are viewed here from a perspective that sees art as a symbolic data carrier. Art conveys culturally shaped statements and thereby allows conclusions to be drawn about the culture, world view and religion of a people. In this book, it is examined in its triple function as an artifact, visual medium and reflection of cultural ideas.

*Spells, Images, and Mandalas* Koichi Shinohara, 2014-08-05 Koichi Shinohara traces the evolution of Esoteric Buddhist rituals from the simple recitation of spells in the fifth century to complex systems involving image worship, mandala initiation, and visualization practices in the ninth century. He presents an important new reading of a seventh-century Chinese text called the Collected Dharani Sutras, which shows how earlier rituals for specific deities were synthesized into a general Esoteric initiation ceremony and how, for the first time, the notion of an Esoteric Buddhist pantheon emerged. In the Collected Dharani Sutras, rituals for specific deities were typically performed around images of the deities, yet Esoteric Buddhist rituals in earlier sources involved the recitation of spells rather than the use of images. The first part of this study explores how such simpler rituals came to be associated with the images of specific deities and ultimately gave rise to the general Esoteric initiation ceremony described in the crucial example of the All-Gathering mandala ritual in the Collected Dharani Sutras. The visualization practices so important to later Esoteric Buddhist rituals were absent from this ceremony, and their introduction would fundamentally change Esoteric Buddhist practice. This study examines the translations of dharani sutras made by Bodhiruci in the early eighth century and later Esoteric

texts, such as Yixing's commentary on the Mahavairocana sutra and Amoghavajra's ritual manuals, to show how incorporation of visualization greatly enriched Esoteric rituals and helped develop elaborate iconographies for the deities. Over time, the ritual function of images became less certain, and the emphasis shifted toward visualization. This study clarifies the complex relationship between images and ritual, changing how we perceive Esoteric Buddhist art as well as ritual.

*All Good People Here* Ashley Flowers, 2023-12-26 #1 NEW YORK TIMES BESTSELLER

- In the propulsive debut novel from the host of the #1 true crime podcast *Crime Junkie*, a journalist uncovers her hometown's dark secrets when she becomes obsessed with the unsolved murder of her childhood neighbor—and the disappearance of another girl twenty years later. ONE OF THE BEST BOOKS OF THE YEAR: PopSugar You can't ever know for sure what happens behind closed doors. Everyone from Wakarusa, Indiana, remembers the infamous case of January Jacobs, who was discovered in a ditch hours after her family awoke to find her gone. Margot Davies was six at the time, the same age as January—and they were next-door neighbors. In the twenty years since, Margot has grown up, moved away, and become a big-city journalist. But she's always been haunted by the feeling that it could've been her. And the worst part is, January's killer has never been brought to justice. When Margot returns home to help care for her uncle after he is diagnosed with early-onset dementia, she feels like she's walked into a time capsule. Wakarusa is exactly how she

remembers—genial, stifled, secretive. Then news breaks about five-year-old Natalie Clark from the next town over, who's gone missing under circumstances eerily similar to January's. With all the old feelings rushing back, Margot vows to find Natalie and to solve January's murder once and for all. But the police, Natalie's family, the townspeople—they all seem to be hiding something. And the deeper Margot digs into Natalie's disappearance, the more resistance she encounters, and the colder January's case feels. Could January's killer still be out there? Is it the same person who took Natalie? And what will it cost to finally discover what truly happened that night twenty years ago? Twisty, chilling, and intense, *All Good People Here* is a searing tale that asks: What are your neighbors capable of when they think no one is watching?

**Embodying Beauty** Malin Pereira, 2014-01-14 This study argues that twentieth-century American women writers' textual representations of female beauty generally recognize a link between beauty standards and aesthetic ideology,

exploring female beauty as a symptom of prevailing ideas about art and esthetics. Female beauty, in their texts, is not merely an issue of whether a female character is pretty or not; it is an expression of the controlling discourses negotiated by character, text, and author. In this study, therefore, the women writers' texts are read after interchapters outlining their key cultural and literary contexts. Revising Paul de Man's method of exploring scenes of reading, this study focuses on scenes of beauty in which a character, narrator, or speaker negotiates ideas about beauty. The author pairs Euro-American and African American women writers across the century in three generations: H.D. and Zora Neale Hurston; Gwendolyn Brooks and Sylvia Plath; and Toni Morrison and Louis Gluck. As such, this study offers a landmark black/white dialogue on female beauty in twentieth-century American culture and literature. Scenes of beauty in the texts of these writers suggest multiple feminine aesthetics in twentieth-century American writing, unified in their negotiation of the aesthetic ideologies embodied in female beauty.

**Image Copy-Move Forgery Detection** Badal Soni,Pradip K. Das,2022-02-04 This book presents a detailed study of key points and block-based copy-move forgery detection techniques with a critical discussion about their pros and cons. It also highlights the directions for further development in image

forgery detection. The book includes various publicly available standard image copy-move forgery datasets that are experimentally analyzed and presented with complete descriptions. Five different image copy-move forgery detection techniques are implemented to overcome the limitations of existing copy-move forgery detection techniques. The key focus of work is to reduce the computational time without adversely affecting the efficiency of these techniques. In addition, these techniques are also robust to geometric transformation attacks like rotation, scaling, or both.
