The H.D. Book Robert Duncan,2011 What began in 1959 as a simple homage to the modernist poet H.D. (Hilda Doolittle) developed into an expansive and unique quest for a poetics that would fuel Duncan's great work into the 1960s and 1970s. A meditation on both the roots of modernism and its manifestation in the writings of H.D., Djuna Barnes, Ezra Pound, D.H. Lawrence, Gertrude Stein, William Carlos Williams, Virginia Woolf, and many others, Duncan's wide-ranging work is especially notable for illuminating the role women played in creating literary modernism--From publisher description.

**High Definition Postproduction** Steven E. Browne,2007 High-definition (HD) is simply high-quality digital video with a crystal-clear picture commonly used in broadcasting and independent film. Written by an in-the-trenches professional who works with HD every day, this title is an overview of this exciting opportunity for film and video production and postproduction professionals.

High Definition Television Philip J. Cianci,2014-01-10 The 40-year history of high definition television technology is traced from initial studies in Japan, through its development in Europe, and then to the United States, where the first all-digital systems were implemented. Details are provided about advances in HDTV technology in Australia and Japan, Europe's introduction of HDTV, Brazil's innovative use of MPEG-4 and China's terrestrial standard. The impact of HDTV on broadcast facility conversion and the influx of computer systems and information technology are described, as well as the contributions of the first entrepreneurial HD videographers and engineers. This thoroughly researched volume highlights several of the landmark high-definition broadcasts from 1988 onward, includes input gathered from more than 50 international participants, and concludes with the rollout of consumer HDTV services throughout the world.

*High Definition and 24P Cinematography* Paul Wheeler,2012-10-12 This authoritative new reference demystifies the technologies of high definition and 24P cinematography. It is written for the director of photography, camera crew and producer or director and deals with the subject from their point of view. It provides a thorough and logical description of the five scanning formats 24P, 25P, 30P, 50i and 60i as well as recording formats, editing options, delivery potential and discussions on the financial implications these decisions might have. It looks at comparative costs between different decisions surrounding camera formats, such as 16mm to 35mm shooting for different examples, such as a 100-minute low budget movie or 30 second commercial. There is also considerable discussion on the advantages and disadvantages of using HD versus film, seen from a producer's perspective and what the impact is on all those involved in making a movie. Different delivery systems and camera equipment are discussed as well as editing. Filled with practical advice for tackling everyday decisions and choices, this is a must-have guide for anyone using or considering using high definition technology.

**American Motorcyclist** ,1962-12 American Motorcyclist magazine, the official journal of the American Motorcyclist Associaton, tells the stories of the people who make motorcycling the sport that it is. It's available monthly to AMA members. Become a part of the largest, most diverse and most enthusiastic group of riders in the country by visiting our website or calling 800-AMA-JOIN.

*High Definition Cinematography* Paul Wheeler,2009-03-20 High-definition is now ubiquitous in video production and High Definition Cinematography, Third Edition provides the explanations, definitions, and workflows that today's cinematographers and camera operators need to make the transition. Paul Wheeler will explain the high-definition process, suggest the best methods for filming, and help you choose the right camera and equipment for your crew with this comprehensive book. You'll also learn the different formats and when best to use them, how to create specific looks for different venues, and learn how to operate a wide variety of popular cameras.

**HERmione** Hilda Doolittle,1981-11-17 "H. D's wit, sense of rhythm, and control of language prove the inadequacy of the imagist label that is so often applied to this writer." —Library Journal This autobiographical novel, an interior self-portrait of the poet H. D. (1886-1961) is what can best be described as a find, a posthumous treasure. In writing HERmione, H.D. returned to a year in her life that was peculiarly blighted. She was in her early twenties--a disappointment to her father, an odd duckling to her mother, an importunate, overgrown, unincarnated entity that had no place... Waves to fight against, to fight against alone...'I am Hermione Gart, a failure'--she cried in her dementia, 'I am Her, Her, Her.' She had failed at Bryn Mawr, she felt hemmed in by her family, she did not yet know what she was going to do with her life. The return from Europe of the wild-haired George Lowndes (Ezra Pound) expanded her horizons but threatened her sense of self. An intense new friendship with Fayne Rabb (Frances Josepha Gregg), an odd girl who was, if not lesbian, then certainly of bisexual bent, brought an atmosphere that made her hold on everyday reality more tenuous. This stormy course led to mental breakdown, then to a turning point and a new beginning as her own true self, as Her"--the poet H.D. Perdita Schaffner, H.D.'s daughter, who can remember back to the time in 1927 when her mother was barricaded with her typewriter behind a locked door, working on this very novel, has provided a charming and telling introduction.

**The American H.D.** Annette Debo,2012-03-15 In *The American H.D.*, Annette Debo considers the significance of nation in the artistic vision and life of the modernist writer Hilda Doolittle. Her versatile career stretching from 1906 to 1961, H.D. was a major American writer who spent her adult life abroad; a poet and translator who also wrote experimental novels, short stories, essays, reviews, and a children's book; a white writer with ties to the Harlem Renaissance; an intellectual who collaborated on avant-garde films and film criticism; and an upper-middle-class woman who refused to follow gender conventions. Her wide-ranging career thus embodies an expansive narrative about the relationship of modernism to the United States and the nuances of the American nation from the Gilded Age to the Cold War. Making extensive use of material in the Beinecke Rare Book and Manuscript Library at Yale—including correspondences, unpublished autobiographical writings, family papers, photographs, and Professor Norman Holmes Pearson's notes for a planned biography of H.D.—Debo's *American H.D.* reveals details about its subject never before published. Adroitly weaving together literary criticism, biography, and cultural history, *The American H.D.* tells a new story about the significance of this important writer. Written with clarity and sincere affection for its subject, *The American H.D.* brings together a sophisticated understanding of modernism, the poetry and prose of H.D., the personalities of her era, and the historical and cultural context in which they developed: America's emergence as a dominant economic and political power that was riven by racial and social inequities at home.

**Musculoskeletal Disease Associated with Diabetes Mellitus** Masaaki Inaba,2016-01-06 The aim of this book is to review the latest findings on musculoskeletal disease associated with diabetes. It has been increasingly recognized that maintaining skeletal health is an important factor in achieving longevity in healthy subjects. Diabetes has been established as a disease independently associated with sarcopenia and increased risk of

bone fracture resulting from osteoporosis; therefore, it is reasonable to maintain that musculoskeletal health is important in preserving good health. As either bone or muscle is intimately involved in the regulation of metabolic status, keeping the musculoskeletal system healthy is important for improving abnormal glucose metabolism toward normal levels and is vital, as well, for maintaining normal activities of daily living. Muscle is a target of insulin for enhancing the entry of glucose; thus it is conceivable that sarcopenia and muscle containing fat streaks causes insulin resistance in diabetic patients. Furthermore, bone is an organ that regulates Ca and Pi levels in serum by releasing or resorbing Ca and Pi to and from bone tissue. It is now known that bone is a definitive endocrine organ for regulating glucose metabolism and Pi metabolism by secreting osteocalcin and FGF-23 from osteocytes/osteoblasts. Readers will learn of the recent findings in this area, and this book will benefit physicians who deal with diabetes, particularly orthopedists and bone specialists, as well as all physical therapists.

**Digital Video and HD** Charles Poynton,2003-01-03 Rapidly evolving computer and communications technologies have achieved data transmission rates and data storage capacities high enough for digital video. But video involves much more than just pushing bits! Achieving the best possible image quality, accurate color, and smooth motion requires understanding many aspects of image acquisition, coding, processing, and display that are outside the usual realm of computer graphics. At the same time, video system designers are facing new demands to interface with film and computer system that require techniques outside conventional video engineering. Charles Poynton's 1996 book A Technical Introduction to Digital Video became an industry favorite for its succinct, accurate, and accessible treatment of standard definition television (SDTV). In Digital Video and HDTV, Poynton augments that book with coverage of high definition television (HDTV) and compression systems. For more information on HDTV Retail markets, go to: <http://www.insightmedia.info/newsletters.php#hdtv> With the help of hundreds of high quality technical illustrations, this book presents the following topics: \* Basic concepts of digitization, sampling, quantization, gamma, and filtering \* Principles of color science as applied to image capture and display \* Scanning and coding of SDTV and HDTV \* Video color coding: luma, chroma (4:2:2 component video, 4fSC composite video) \* Analog NTSC and PAL \* Studio systems and interfaces \* Compression technology, including M-JPEG and MPEG-2 \* Broadcast standards and consumer video equipment
