On Startups: Advice and Insights for Entrepreneurs

Dharmesh Shah,2012-12-09 Note from the Author Hi, my name is Dharmesh, and I'm a startup addict. And, chances are, if you're reading this, you have at least a mild obsession as well. This book is based on content from the OnStartups.com blog. The story behind how the blog got started is sort of interesting—but before I tell you that story, it'll help to understand my earlier story. As a professional programmer, I used to work in a reasonably fun job doing what I liked to do (write code). Eventually, I got a little frustrated with it all, so at the ripe old age of 24, I started my first software company. It did pretty well. It was on the Inc. 500 list of fastest growing companies three times. It reached millions of dollars of sales and was ultimately acquired. I ran that first company for over 10 years working the typical startup hours. When I sold that company, I went back to school to get a master's degree at MIT. I've always enjoyed academics, and I figured this

would be a nice “soft landing” and give me some time to figure out what I wanted to do with my life. As part of my degree requirements, I had to write a graduate thesis. I titled my thesis “On Startups: Patterns and Practices of Contemporary Software Entrepreneurs.” And, as part of that thesis work, I wanted to get some feedback from some entrepreneurs. So, I figured I’d start a blog. I took the first two words of the thesis title, “On Startups,” discovered that the domain name OnStartups.com was available, and was then off to the races. The blog was launched on November 5, 2005. Since then, the blog and associated community have grown quite large. Across Facebook, LinkedIn, and email subscribers, there are over 300,000 people in the OnStartups.com audience. This book is a collection of some of the best articles from over 7 years of OnStartups.com. The articles have been topically organized and edited. I hope you enjoy them.

Legal Aspects of Combating Terrorism ,2008-11-03 This volume in the NATO Science for Peace and Security Series contains the papers of the Advanced Training Course (ATC) 'Legal Aspects of Combating Terrorism'. The purpose of this course was to support NATO on defence issues related to terrorism and united experts from various disciplines to give participants an understanding of how the various dimensions of the laws and their application fit together. In addition to the lectures that can be found in this book, the course was divided into three modules: the legal response to terrorism in general terms; combating terrorism using lawful means; and harmonizing the Law of Armed Conflict (LAC), national laws and NATO in the fight against terrorism. One of the main questions dealt with in this work is whether, in the face of the new threat, terrorism should still be countered through the ordinary means of criminal law, or whether there should be a significant shift in enforcement methods, including a less multilateral approach to decision-making and an increased use of military force.

The Lean Startup Eric Ries,2011-09-13 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to

discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on “validated learning,” rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it’s too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

Feedback in Higher and Professional Education David

Boud,Elizabeth Molloy,2013 Learners complain that they do not get enough feedback, and educators resent that although they put considerable time into generating feedback, students take little notice of it. Both parties agree that it is very important. Feedback in Higher and Professional Education explores what needs to be done to make feedback more effective. It examines the problem of feedback and suggests that there is a lack of clarity and shared meaning about what it is and what constitutes doing it well. It argues that new ways of thinking about feedback are needed. There has been considerable development in research on feedback in recent years, but surprisingly little awareness of what needs to be done to improve it and good ideas are not translated into action. The book provides a multi-disciplinary and

international account of the role of feedback in higher and professional education. It challenges three conventional assumptions about feedback in learning: That feedback constitutes one-way flow of information from a knowledgeable person to a less knowledgeable person. That the job of feedback is complete with the imparting of performance-related information. That a generic model of best-practice feedback can be applied to all learners and all learning situations. It seeking a new approach to feedback, it proposes that it is necessary to recognise that learners need to be much more actively involved in seeking, generating and using feedback. Rather than it being something they are subjected to, it must be an activity that they drive.

Methods of Exploring Emotions Helena Flam, Jochen Kleres, 2015-03-24 Gathering scholars from different disciplines, this book is the first on how to study emotions using sociological, historical, linguistic, anthropological, psychological, cultural, and mixed approaches. Bringing together the emerging lines of inquiry, it lays foundations for an overdue methodological debate. The volume offers entrancing short essays, richly illustrated with examples and anecdotes, that provide basic knowledge about how to pursue emotions in texts, interviews, observations, spoken language, visuals, historical documents, and surveys. The contributors are respectful of those being researched and are mindful of the effects of their own feelings on the conclusions. The book thus touches upon the ethics of research in vivid first person accounts. Methods are notoriously difficult to teach—this collection fills the gap between dry methods books and students' need to know more about the actual research practice.
