Voluntary Health Insurance in Europe: Country Experience Sagan A., Sarah Thomson, 2016-07-20 No two markets for voluntary health insurance (VHI) are identical. All differ in some way because they are heavily shaped by the nature and performance of publicly financed health systems and by the contexts in which they have evolved. This volume contains short structured profiles of markets for VHI in 34 countries in Europe. These are drawn from European Union member states plus Armenia Iceland Georgia Norway the Russian Federation Switzerland and Ukraine. The book is aimed at policy-makers and researchers interested in knowing more about how VHI works in practice in a wide range of contexts. Each profile written by one or more local experts identifies gaps in publicly-financed health coverage describes the role VHI plays outlines the way in which the market for VHI operates summarises public policy towards VHI including major developments over time and highlights national debates and challenges. The book is part of a study on VHI in Europe prepared jointly by the European Observatory on Health Systems and Policies and the WHO Regional Office for Europe. A companion volume provides an analytical overview of VHI markets across the 34 countries.

Building Primary Care in a Changing Europe Dionne S. Kringos, W. G. W. Boerma, Allen Hutchinson, Richard B. Saltman, 2015 For many citizens primary health care is the first point of contact with their health care system, where most of their health needs are satisfied but also acting as the gate to the rest of the system. In that respect primary care plays a crucial role in how patients value health systems as responsive to their needs and expectations. This volume analyses the way how primary care is organized and delivered across European countries, looking at governance, financing and workforce aspects and the breadth of the service profiles. It describes wide national variations in terms of accessibility, continuity and coordination. Relating these differences to health system outcomes the authors suggest some priority areas for reducing the gap between the ideal and current realities.

Bonus Options in Health Insurance Peter Zweifel, 2012-12-06 Confronted with the continuing cost expansion in the health care sector, policy makers face a dilemma: limiting moral hazard in medical care requires that consumers participate in the cost, yet copayment is strongly resisted by today's socially insured. Thus, the experiences of three private German health insurers will be of interest to physicians, social scientists, and policy makers. Insurer A writes conventional plans with deductibles and coinsurance; B pays back three-monthly premiums as a fixed rebate for no claims; while C runs an experience-rated bonus system starting with a rebate of three-monthly premiums for the first year without a claim, reaching a maximum of five after three years. While both rebates and bonuses are quite popular among insureds, this study shows that bonus options are particularly effective in limiting the demand for ambulatory and even hospital care. But what about adverse effects on health caused by the desire to save one's bonus? On this issue, there is some surprising evidence.

Explaining Divergent Levels of Longevity in High-Income Countries National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Understanding Divergent Trends in Longevity in High-Income Countries, 2011-06-27 During the last 25 years, life expectancy at age 50 in the United States has been rising, but at a slower pace than in many other high-income countries, such as Japan and Australia. This difference is particularly notable given that the United States spends more on health care than any other nation. Concerned about this divergence, the National Institute on Aging asked the National Research Council to examine evidence on its possible causes. According to *Explaining Divergent Levels of Longevity in High-Income Countries*, the nation's history of heavy smoking is a major reason why lifespans in the United States fall short of those in many other high-income nations. Evidence suggests that current obesity levels play a substantial part as well. The book reports that lack of universal access to health care in the U.S. also has increased mortality and reduced life expectancy, though this is a less significant factor for those over age 65 because of Medicare access. For the main causes of death at older ages -- cancer and cardiovascular disease -- available indicators do not suggest that the U.S. health care system is failing to prevent deaths that would be averted elsewhere. In fact, cancer detection and survival appear to be better in the U.S. than in most other high-income nations, and survival rates following a heart attack also are favorable. *Explaining Divergent Levels of Longevity in High-Income Countries* identifies many gaps in research. For instance, while lung cancer deaths are a reliable marker of the damage from smoking, no clear-cut marker exists for obesity, physical inactivity, social integration, or other risks considered in this book. Moreover, evaluation of these risk factors is based on observational studies, which -- unlike randomized controlled trials -- are subject to many biases.

Assessing Chronic Disease Management in European Health Systems World Health Organization, 2015-12-16 This publication explores some of the key issues, ranging from interpreting the evidence base to assessing the policy context for, and approaches to, chronic disease management across Europe. Drawing on 12 detailed country reports (available in a second, online volume), the study provides insights into the range of care models and the people involved in delivering these; payment mechanisms and service user access; and challenges faced by countries in the implementation and evaluation of these novel approaches.

The OECD Health Project Towards High-Performing Health Systems Policy Studies OECD, 2004-08-20 This series of seven policy studies cover lessons from experience in health system reform, improving the technical quality of health care, income-related inequality in health care, matching supply with demand for physicians and nurses, excessive waiting times, private health insurance, and more.

Health Politics Ellen M. Immergut, Professor of Comparative Politics Ellen M Immergut, 1992-08-28 A comparative analysis of the politics of national health insurance in Sweden, France and Switzerland, showing how the Swedes have developed the most 'socialized' health system in Western Europe, the Swiss the most 'privatized' and the French a conflict-ridden compromise between the two.

Shock Therapy for the American Health Care System Robert Arthur Levine M.D., 2009-07-23 Shock Therapy For the American Health Care System describes the problems of the health care system and offers a program of comprehensive reform that is more far-reaching than anything currently being proposed. From a veteran physician comes this remarkably clear-eyed look at what's wrong with how we administer and pay for health care and what can be done to fix it. In *Shock Therapy for the American Health Care System: Why Comprehensive Reform Is Needed*, Dr. Robert Levine offers an easily understandable diagnosis of the problems plaguing our current health care infrastructure, with discussions that include the roles of various stakeholders—insurance companies, big pharma, hospitals, health care providers, and patients. He also dispels a number of myths designed to make voters leery of any reform efforts. Levine's comprehensive plan addresses everything from bloated bureaucracies to unnecessary procedures to the handling of negligence and malpractice lawsuits/claims. Throughout, Levine backs his proposals with facts and comparisons to systems in various countries, and concludes that even now, with disaster looming, the ultimate goal of providing health insurance for every American is achievable and affordable.

Economic Policy in Switzerland Phillippe Bacchetta, Walter Wasserfallen, 2016-07-27 Switzerland is at the centre

of Europe, but is not part of the European Union. Its specific policy concerns are often less known than for other countries but might offer an alternative model to integration. This collection from some of the best academic economists in Switzerland covers monetary economics, competition, health care, environmental and housing policies, as well as aspects related to unemployment insurance, gender discrimination, poverty, and privatization to provide a comprehensive survey of the Swiss economy.

Healthcare Management Volker Eric Amelung,2019-10-10 This textbook on Healthcare Management provides a systematic and comprehensive overview of the organisational forms and management instruments implemented in managed care. Within the international discussion on the structure of healthcare systems, managed care is an increasingly important topic. Over more than twenty years managed care approaches have fundamentally influenced healthcare systems in terms of patient orientation, efficiency, and quality. Experts assume that up to 20% of healthcare expenses can be saved by applying high-quality managed care approaches. By using suitable organisational forms and management principles, not only can costs be reduced, but the quality of medical service provision can be augmented. Managed care is therefore much more than a cost-cutting strategy. Advocates consider managed care to be a logical and necessary developmental step in modern healthcare systems. An increase in quality and at the same time a reduction of costs is not seen as contradictory but rather as consistent. Therefore, managed care is a response to changed challenges in the provision of healthcare.□

This volume will be a useful resource to graduate students in public and global health, public health professionals, health and social work researchers, and health policymakers interested in women's health, especially in developing countries. Discusses health disparities of rural women in chronic diseases, access to pediatric and ob/gyn services, and mental health treatment Examines the health consequences of poverty and food insecurity on health Covers health care access and reproductive health outcomes for rural women
