Inside Our Broken Healthcare System Linda Grgis,2015-01-19 The US healthcare system is failing. Patients are being denied the care they need and are often unable to afford it. Healthcare workers on the frontlines are battling this system everyday to get patients the medical care they deserve. But, the fight is getting harder and harder. This book explores the things that are in need of repair in our healthcare system. Something must give before a true crisis ensues.

Keeping Healthy by Keeping Track Lillian Shah,Laura Messinger,2006-08

The Slim Book of Health Pearls Sheldon Cohen and Megan Godwin,2011-02-10 Therapies for specific illnesses or symptoms include many medications. The ultimate decision to take these medications rests with the patient relying on a healthcare professional's advice. Medications carry with them benefits, risks, and the potential for medical errors. Patient vigilance is necessary to eliminate medical errors that could result in serious or fatal consequences. Exercise is an alternative or adjunct to medication. No medication is as versatile and has as many widespread benefits as a well-designed exercise program done with physician supervision. The authors list the many symptoms and illnesses that benefit from exercise, detailing the research and the reasons why these benefits occur. A well designed, physician supervised and faithfully executed exercise program may well obviate the need for medication and will provide life-long benefits.

Increasing Physical Activity James M. Rippe,2020-11 The health benefits of regular physical activity are beyond dispute, yet less than 40% of physicians routinely counsel their patients on the importance of physical activity. Increasing Physical Activity: A Practical Guide equips healthcare practitioners to include physical activity counseling in the daily practice of medicine.

Medical Fitness Association's Standards and Guidelines for Medical Fitness Center Facilities Medical Fitness Association,Medical Fitness Association Staff,Mfa,2009 This 2009 expanded edition of the Standards and Guidelines features a set of nationally derived parameters that are applicable to the design and operation of a medical fitness center. Included are sample job descriptions; a Facility Certification checklist; policies and procedures; and industry resources. The best way to set your facility apart is by achieving the MFA Facility Certification. With a focus on medically sound prevention and rehabilitation programs, medical fitness centers play an essential role in the health and wellness of those individuals that they serve. The MFA Facility Certification process is an important step toward ensuring that your facility provides the quality and safety of the programs and services that are necessary to meet this critical responsibility.

A Prescription for Your Healthcare Survival Debra C. Camejo,2008 A consumer's guide to healthcare in the 21st century written by an experienced medical professional. Some of the topics covered are practical suggestions to ensure the best medical care for yourself and family, your rights as a patient, how to protect yourself from medical mistakes, tips on saving money on prescriptions, how to handle rejected medical claims, how to handle emergencies while traveling abroad and case studies of actual medical mishaps.

Effective Environment for Obesity David D Coleman,2022-10-07 The clinical climate makes way for powerful discussions. When the climate is weight comprehensive and inviting, patients are bound to have a positive experience. At the point when it isn't, it is one more involvement with which patients with corpulence experience weight predisposition in medical services settings. Negative encounters caused by the clinical climate cause mischief and improve the probability that patients won't return for follow-up care. The actual climate and the profound encounters patients have should be protected, open, obliging, happy with, inviting, also, non-disgracing. This expects regard for both the assembled climate and how all individuals from the medical care group speak with patients with corpulence. If either experience is awkward, all things considered, a patient will have a general negative encounter.

Fitness Professionals Working in Healthcare Aaron M. Fried,2021 Considerable research demonstrates the positive outcomes of physical activity on chronic diseases. Fitness professionals are experts in physical activity and are absent in healthcare. This study aimed to discover the history of and perceived barriers of fitness professionals' absence from healthcare. A group of 24 fitness professionals and healthcare decision-makers were interviewed to learn about their perceptions of fitness professionals working in healthcare. The findings revealed that barriers exist to patients getting the highest quality, evidence-based care they need. Healthcare providers need education on the benefits of physical activity and who can provide exercise programming. Fitness professionals need to clarify their certifications, regulation, and scope of practice. Fitness professionals also need training in behavior modification and lifestyle interventions to treat patients with chronic medical conditions. Our healthcare system makes the cost for fitness services a barrier, opening the potential for Health and Wellness Coaches,
