Maritime Logistics Dong-Wook Song,Photis Panayides,2015-04-03 Globalisation and the rapid increase in world trade in the past decade have contributed to greater demand for international transport and logistics and, consequently, the expansion of the maritime industry. The dramatic changes in the mode of world trade and cargo transportation make it more important than ever to have a clear understanding of the way in which freight is transported by sea and the role of ports in this exchange. At the cutting edge in its assessment of the industry, Maritime Logistics covers the whole scope of maritime logistics and examines latest logistical developments within the port and shipping industry. With a range of new international contributors, this new edition has been thoroughly revised and updated. There are new chapters on port centric logistics, hinterland logistics and global supply chains, maritime transport and logistics as a trade facilitator, and future trends and developments. Written by a team of international experts with over fifty years' experience in the field, Maritime Logistics provides a truly global perspective. The book covers everything that students of logistics, as well as those working within the industry, need to know about maritime logistics, including shipping lines, containers, tankers, dry bulk, port-centric logistics, and much more.

Identifying the gender of PCT inventors World Intellectual Property Organization,Gema Lax Martinez,Julio Raffo,Kaori Saito,2016 This paper analyzes the gender of inventors in international patent applications. We compile a worldwide gender-name dictionary, which includes 6.2 million names for 182 different countries to disambiguate the gender of PCT inventors. Our results suggest that there is a gender imbalance in PCT applications, but the proportion of women inventors is improving over time. We also find that the rates of women participation differ substantially across countries, technological fields and sectors.

Breaking Into the Lab Sue Vilhauer Rosser,2012 Why are there so few women in science? In Breaking into the Lab, Sue Rosser uses the experiences of successful women scientists and engineers to answer the question of why elite institutions have so few women scientists and engineers tenured on their faculties. Women are highly qualified, motivated students, and yet they have drastically higher rates of attrition, and they are shying away from the fields with the greatest demand for workers and the biggest economic payoffs, such as engineering, computer sciences, and the physical sciences. Rosser shows that these continuing trends are not only disappointing, they are urgent: the U.S. can no longer afford to lose the talents of the women scientists and engineers, because it is quickly losing its lead in science and technology. Ultimately, these biases and barriers may lock women out of the new scientific frontiers of innovation and technology transfer, resulting in loss of useful inventions and products to society.

Managing Risks in Commercial and Retail Banking Amalendu Ghosh,2012-02-03 A practical guide to the practices and procedures of effectively managing banking risks Managing Risks in Commercial and Retail Banking takes an in-depth, logical look at dealing with all aspects of risk management within the banking sector. It presents complex processes in a simplified way by providing real-life situations and examples. The book examines all dimensions of the risks that banks face—both the financial risks—credit, market, and operational—and the non-financial risks—money laundering, information technology, business strategy, legal, and reputational. Focusing on methods and models for identifying, measuring, monitoring, and controlling risks, it provides practical advice backed up by solid theories, without resorting to the use of complicated mathematical and statistical formulas. Author Amalendu Ghosh exposes topics that are usually absent in books on managing banking risk—such as design of control framework, risk management architecture, credit risk rating, risk-based loan pricing, portfolio analysis, business continuity planning, and corporate governance. Author has extensive experience with a variety of major banks and institutions worldwide and brings a fresh perspective in the wake of the global finance crisis Presents a novel approach using models of the credit risk rating of different types of borrowers, the methodology for assigning weights for deriving the rating, and the scoring process Covers the essentials of corporate governance and options for credit risk assessment in line with the recommendations made in the New Basel Capital Accord Explains the methodology of risk-based internal audit, including techniques to enable bank branches to switch over from the old transaction-based audit methods With its logical sequence of the aspects of risk management, the book's layout is ideal for presentations, making it a handy tool for risk management training

Branding Between the Ears: Using Cognitive Science to Build Lasting Customer Connections Sandeep Dayal,2021-11-30 Build a "cognitive brand" that connects with your customers in the deepest, most meaningful ways Successful marketing is all about unlocking the door to people's thoughts, feelings, memories, and fantasies. Tap into one or more of these, and your brand will stick forever. In Branding Between the Ears, world-renowned marketing thought leader Sandeep Dayal explains how to leverage behavioral psychology, social anthropology, and neuroscience to decode what goes on in consumer minds—and create effective marketing strategies to build the kind of loyalty that fuels today's iconic brands. Dayal reveals that most successful cognitive brands are architected around three questions consumers ask themselves: Does this brand give me good vibes? Does what this brand says make sense to me? Will I be happier if I buy this brand? These three factors—good brand vibes, brand sense, and brand resolve—are the hidden mantra that push customers off the fence of indecision, and get them not just to admire, but actually buy the brands again and again. Branding Between the Ears reveals paradigm shifts in building and executing brands that are informed by a burgeoning body of research in brain sciences, and offers a better way to make brands that not just stand out, but connect with consumers and embed deeply in their thoughts to drive choice. Dayal is the marketing thought leader who predicted that "consumer collaboration" would be the key factor in winning people's trust online and giving consumers control over their personal information would be central to gaining their trust—issues that are unfolding today. Now, with Branding Between the Ears he provides equally prescient principles and new ideas for gaining the competitive edge in a largely uncertain future and winning with cognitive power brands.
