Fully updated to cover all the latest features and changes to Twitter Written by a Twitter pioneer who was one of the first marketers to fully tap into Twitter's business applications Ideal for beginners, whether they want to use Twitter to stay in touch with friends or to market their products and services Explains how to incorporate Twitter into other social media and how to use third-party tools to improve and simplify Twitter

Digital contention in a divided society Paul Reilly, 2021-02-02 How are platforms such as Facebook and Twitter used by citizens to frame contentious parades and protests in 'post-conflict' Northern Ireland? What do these contentious episodes tell us about the potential of information and communication technologies to promote positive intergroup contact in the deeply divided society? These issues are addressed in what is the first in-depth qualitative exploration of how social media were used during the union flag protests (December 2012-March 2013) and the Ardoyne parade disputes (July 2014 and 2015). The book focuses on the extent to which affective publics, mobilised and connected via expressions of solidarity on social media, appear to escalate or de-escalate sectarian tensions caused by these hybrid media events. It also explores whether citizen activity on these online platforms has the potential to contribute to peacebuilding in Northern Ireland.

Motel of the Mysteries David Macaulay, 1979-10-11 It is the year 4022; all of the ancient country of Usa has been buried under many feet of detritus from a catastrophe that occurred back in 1985. Imagine, then, the excitement that Howard Carson, an amateur archeologist at best, experienced when in crossing the perimeter of an abandoned excavation site he felt the ground give way beneath him and found himself at the bottom of a shaft, which, judging from the DO NOT DISTURB sign hanging from an archaic doorknob, was clearly the entrance to a still-sealed burial chamber. Carson's incredible discoveries, including the remains of two bodies, one of them on a ceremonial bed facing an altar that appeared to be a means of communicating with the Gods and the other lying in a porcelain sarcophagus in the Inner Chamber, permitted him to piece together the whole fabric of that extraordinary civilization.

Twitter and Tear Gas Zeynep Tufekci, 2017-05-16 A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti-Wall Street encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why

they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.

Natural Language Processing for Corpus Linguistics Jonathan Dunn, 2022-03-31 Corpus analysis can be expanded and scaled up by incorporating computational methods from natural language processing. This Element shows how text classification and text similarity models can extend our ability to undertake corpus linguistics across very large corpora. These computational methods are becoming increasingly important as corpora grow too large for more traditional types of linguistic analysis. We draw on five case studies to show how and why to use computational methods, ranging from usage-based grammar to authorship analysis to using social media for corpus-based sociolinguistics. Each section is accompanied by an interactive code notebook that shows how to implement the analysis in Python. A stand-alone Python package is also available to help readers use these methods with their own data. Because large-scale analysis introduces new ethical problems, this Element pairs each new methodology with a discussion of potential ethical implications.

Hatching Twitter Nick Bilton, 2014-09-30 The dramatic, unlikely story behind the founding of Twitter, by New York Times bestselling author and Vanity Fair special correspondent The San Francisco-based technology company Twitter has become a powerful force in less than ten years. Today it's everything from a tool for fighting political oppression in the Middle East to a marketing must-have to the world's living room during live TV events to President Trump's preferred method of communication. It has hundreds of millions of active users all over the world. But few people know that it nearly fell to pieces early on. In this rousing history that reads like a novel, *Hatching Twitter* takes readers behind the scenes of Twitter's early exponential growth, following the four hackers—Ev Williams, Jack Dorsey, Biz Stone, and Noah Glass, who created the cultural juggernaut practically by accident. It's a drama of betrayed friendships and high-stakes power struggles over money, influence, and control over a company that was growing faster than they could ever imagine. Drawing on hundreds of sources, documents, and internal e-mails, Bilton offers a rarely-seen glimpse of the inner workings of technology startups, venture capital, and Silicon Valley culture.

Magnified Minnie Bruce Pratt, 2021-02-01 Finalist for Audre Lorde Award for Lesbian Poetry, given by The Publishing Triangle, 2022 This collection of love poems draws us into the sacred liminal space that surrounds death. With her beloved gravely ill, poet and activist Minnie Bruce Pratt turns to daily walks and writing to find a way to go on in a world where injustice brings so much loss and death. Each poem is a pocket lens to swivel out

and magnify the beauty in the little glints, insignificant that catch her eye: The first flowers, smaller than this s. She also chronicles the quiet rooms of pain and the body's memory, bringing the reader carefully into moments that will be familiar to anyone who has suffered similar loss. Even as she asks, What's the use of poetry? Not one word comes back to talk me out of pain, the book delivers a vision of love that is boldly political and laced with a tumultuous hope that promises: Revolution is bigger than both of us, revolution is a science that infers the future presence of us. This lucid poetry is a testimony to the radical act of being present and offers this balm: that the generative power of love continues after death. Oh Death Someone sang, Oh death! Oh death! Won't you pass me over for another day? Someone said, I dreamed of you last night. I dreamed you were telling me your whole life story. Whole. Whorled. Welkin, winkle, wrinkle. The loop of time holds us all together. The pile of laundry on the bed. You folding socks one inside the other. We have had this day, and now this night. The clothes are put away, and from the bed we see the moon folding light into darkness, not death.

Bug Boys Laura Knetzger, 2020-02-11 Join two bug friends as they learn about the science of the world around them and the meaning of friendship in this early graphic novel series perfect for fans of Narwhal and Jelly! Rhino-B is a brash, but sweet guy. Stag-B is a calm and scholarly adventurer. Together these two young beetles make up the Bug Boys, best friends who spend their time exploring the world of Bug Village and beyond, as well as their own -- sometimes confusing and complicated -- thoughts and feelings. In their first adventure, the Bug Boys travel through spooky caves, work with a spider to found a library, save their town's popular honey supply from extinction, and even make friends with ferocious termites! Join these two best bug buddies as they go above and beyond for each other and the friends they meet in their adventures. "Bug Boys has a wonderful blend of silliness, introspection, adventure and the right amount of weirdness. I loved how Rhino-B and Stag-B deal with the pressure of being true to each other and to the new friends they make on their journeys." – Drew Brockington, author of CatStronauts

The Gene Siddhartha Mukherjee, 2016-05-17 The #1 NEW YORK TIMES Bestseller The basis for the PBS Ken Burns

Documentary The Gene: An Intimate History Now includes an excerpt from Siddhartha Mukherjee's new book Song of the Cell! From the Pulitzer Prize-winning author of The Emperor of All Maladies—a fascinating history of the gene and “a magisterial account of how human minds have laboriously, ingeniously picked apart what makes us tick” (Elle). “Sid Mukherjee has the uncanny ability to bring together science, history, and the future in a way that is understandable and riveting, guiding us through both time and the mystery of life itself.” —Ken Burns “Dr. Siddhartha Mukherjee dazzled readers with his Pulitzer Prize-winning The Emperor of All Maladies in 2010. That achievement was evidently just a warm-up for his virtuoso performance in The Gene: An Intimate History, in which he braids science, history, and memoir into an epic with all the range and biblical thunder of Paradise Lost” (The New York Times). In this biography Mukherjee brings to life the quest to understand human heredity and its surprising influence on our lives, personalities, identities, fates, and choices. “Mukherjee expresses abstract intellectual ideas through emotional stories...[and] swaddles his medical rigor with rhapsodic tenderness, surprising vulnerability, and occasional flashes of pure poetry” (The Washington Post). Throughout, the story of Mukherjee's own family—with its tragic and bewildering history of mental illness—reminds us of the questions that hang over our ability to translate the science of genetics from the laboratory to the real world. In riveting and dramatic prose, he describes the centuries of research and experimentation—from Aristotle and Pythagoras to Mendel and Darwin, from Boveri and Morgan to Crick, Watson and Franklin, all the way through the revolutionary twenty-first century innovators who mapped the human genome. “A fascinating and often sobering history of how humans came to understand the roles of genes in making us who we are—and what our manipulation of those genes might mean for our future” (Milwaukee Journal-Sentinel), The Gene is the revelatory and magisterial history of a scientific idea coming to life, the most crucial science of our time, intimately explained by a master. “The Gene is a book we all should read” (USA TODAY).

Fake Accounts Lauren Oyler, 2022-02-08 A NATIONAL BESTSELLER * A NEW YORK TIMES BOOK REVIEW EDITORS' CHOICE * A WASHINGTON POST BEST BOOK OF THE YEAR An invigorating work, deadly precise in its skewering of people, places and things . . . Stylish, despairing and very funny, Fake Accounts . . . adroitly maps the dwindling gap between the individual and the world. —Katie Kitamura, The New York Times Book Review A woman in a tailspin discovers that her boyfriend is an anonymous online conspiracy theorist in this “absolutely brilliant take on the bizarre and despicable ways the internet has warped our perception of reality” (Elle, One of the Most Anticipated Books of the Year). On the eve of Donald Trump's inauguration, a young woman snoops through her boyfriend's phone and makes a startling discovery: he's an anonymous internet conspiracy theorist, and a popular one at that. Already fluent in internet fakery, irony, and outrage, she's not exactly shocked by the revelation. Actually, she's relieved--he was

always a little distant--and she plots to end their floundering relationship while on a trip to the Women's March in DC. But this is only the first in a series of bizarre twists that expose a world whose truths are shaped by online lies. Suddenly left with no reason to stay in New York and increasingly alienated from her friends and colleagues, our unnamed narrator flees to Berlin, embarking on her own cycles of manipulation in the deceptive spaces of her daily life, from dating apps to expat meetups, open-plan offices to bureaucratic waiting rooms. She begins to think she can't trust anyone--shouldn't the feeling be mutual? Narrated with seductive confidence and subversive wit, *Fake Accounts* challenges the way current conversations about the self and community, delusions and gaslighting, and fiction and reality play out in the internet age.

The Death of Expertise Tom Nichols, 2024 In the early 1990s, a small group of AIDS denialists, including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission--

Emergency Response Guidebook U.S. Department of Transportation, 2013-06-03 Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

Start with Why Simon Sinek, 2011-12-27 The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. *START WITH WHY* asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees

alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

The God Code Gregg Braden, 2005-01-01 “One of our great visionaries.” –Dr. Wayne W. Dyer “A rare blend of scientist, visionary, and scholar.” –Deepak Chopra A scholar and New York Times–bestselling author shares his shocking theory of an ancient language—found in the decoded elements of our DNA—that shines new light on the mysteries of existence. What would it mean to discover an ancient language—a literal message—hidden within the DNA of life itself? What we once believed of our past is about to change. A coded message has been found within the molecules of life, deep within the DNA in each cell of our bodies. Through a remarkable discovery linking Biblical alphabets to our genetic code, the “language of life” may now be read as the ancient letters of a timeless message. Regardless of race, religion, heritage, or lifestyle, the message is the same in each cell of every woman, child, and man, past and present. Sharing all-new, fascinating research, Gregg Braden discusses the life-changing discovery that led him from a successful career in the aerospace and defense industries to an extensive 12-year study of the most sacred and honored traditions of humankind.
