Hyundai and Kia Motors: the Early Years and Product Development Donald G. Southerton,2012-06-20 Hyundai and Kia Motors: The Early Years and Product Development by Donald G Southerton provides deep insights into the rise of the Korean car industry.From the 1960s to early 2000s, political and economic forces impacted the growth and development of the South Korean carmakers, including Hyundai and Kia Motors. In addition, the brands at times partnered for technology with Ford, Mazda, and Mitsubishi, along with world class designers like Giorgetto Giugiaro. Expanding rapidly the Korean brands soon looked to new international markets, including the U.S.Despite the failure of Kia Motors to survive the IMF Crisis, the merger with Hyundai led to integrated technology research, development, and manufacturing-- not to mention the economies of scale needed for the Korean automaker to compete globally with industry heavyweights such as Toyota, Ford, GM, and VW. Car models discussed including the Kia's Brisa, Pride, Sephia, Sportage, and Rio along with Hyundai's Pony, Excel and Santa Fe.

The Cars That Henry Ford Built Beverly Rae Kimes,2005-08-21 At the time, in 1978, when The Cars That Henry Ford Built was first published, sending a copy for Henry Ford II to review seemed a vain request-Automobile Quarterly founding editor and publisher L. Scott Bailey was told that Mr. Ford (never comments on a book written about Ford.÷ Two weeks later came an unexpected exhortation from Henry Ford II: (My grandfather would have loved this book.÷ Ford then specially ordered 20 copies bound in white leather-needed in two weeks. The rush order was necessitated by an upcoming trip to Japan. As is culturally customary to offer a gift that honors one's ancestors, Henry Ford II specifically chose The Cars That Henry Ford Built to give to his Japanese hosts. Such high-level praise is derived from the book's fresh approach to the subject of Henry Ford, both in its study of the man and his cars, as well as the exceptional pictorial presentation. Presented for the first time in full color, there is every model Henry Ford produced from the Quadricycle he put together as a young man in 1896 to the famous V8 Ford on the production lines four and a half decades later during his failing years. Probably no other individual in automobile history more accurately mirrored in his cars his view of himself and of America as he saw it. Join award-winning historian and author Beverly Rae Kimes as she presents lively historical text that captures Henry growing and aging as his cars grew and aged, each lock-stepped together through history. Over 100 full-color photographs further bring the man and his creations to life.

Lemon-Aid Used Cars and Trucks 2012-2013 Phil Edmonston,2012-05-19 Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst beaters on the market. More secret warranties taken from automaker internal service bulletins and memos than ever.

In the Driver's Seat William Bragg,1993 The ultimate how-to manual for car and truck buyers--guerrilla tactics for today's tough automotive market. This savvy guide provides insider how-to's for real negotiating leverage, tells how to determine the true wholesale value of a vehicle before talking trade-in, and more.

Ford, Yesterday & Today ,2010 From Model T to Mustang, high-performance muscle cars to high-efficiency hybrids, Ford: Yesterday & Today is a captivating chronicle of what many regard as the most significant name in automotive history. Concise text and hundreds of compelling color photos tell the Blue Oval saga through more than 100 eventful years. The book was compiled by the auto editors of Consumer Guide. The story begins with company founder Henry Ford, who literally put the world on wheels with the first mass-produced automobile, the simple and rugged Tin Lizzie. This Model T, then the Model A and then the first low-priced V-8 car with the versatile flathead engine--these were the foundation of a juggernaut. Ups and downs followed for the next seven decades, as Ford vied with another colossus--Chevrolet--and many competitors in the United States and abroad. The entire story is told through the lens of key car categories. Read about: ? Family Haulers. The sedans and station wagons that generations grew up with, like the Ranch Wagon, the Fairlane, the Granada, the Crown Victoria, the Taurus and many more, including today's leading-edge hybrid cars.? Sunshine Specials. Ford's long and impressive history of open-tops and convertibles, ranging from the compact Model N through the DeLuxe, Sunliner, and rag-top versions of Torinos, Mustangs, and LTDs.? Stylish Cruisers. Including the Crown Victoria, Galaxie 500, LTD Landau, and Granada.? Dozens of other history-making models, from Ford's compact cars through generations of Mustangs and Shelbys, Thunderbirds, race cars and muscle cars, F-line pickups, SUVs, and even Ford's stellar history of police vehicles

The End of Detroit Micheline Maynard,2004-09-21 An in-depth, hard-hitting account of the mistakes, miscalculations, and myopia that have doomed America's automobile industry, this is the story of how Detroit's Big Three automobile companies missed a golden opportunity to win back the traditional car-buyer.

The Ford Century in Minnesota Brian McMahon,2016 In 1903, before the Ford Motor Company was even incorporated, Stephen Ten Voorde signed a contract to sell Fordmobiles at his bicycle shop in St. Cloud, Minnesota. Four generations later, the Ten Voorde family still operates what is now the oldest Ford dealership in the world. Brian McMahon chronicles how the fortunes of the company and the state became intertwined during that century. Ford assembled Model T cars in the world's tallest automobile plant in Minneapolis and a three-story structure in St. Paul--both still standing. These factories quickly became functionally obsolete after the development of the moveable assembly line. The hunt for a new site to build a modern, single-story plant stirred intense rivalry between Minneapolis and St. Paul. Henry Ford took a rare personal interest in the search and selected a 125-acre parcel in St. Paul overlooking the recently built High Dam on the Mississippi River, which allowed for navigation and hydroelectric power. The Twin Cities Assembly Plant would go on to manufacture millions of cars, trucks, tractors, and military vehicles until its closure in 2011. Henry Ford's large-scale experiments with every aspect of the industrial economy sent ripples and shockwaves through the lives of Minnesotans--management and assembly line workers, dealers and customers, families and communities. First-person accounts of more than forty retired auto workers share what it was like to work at Ford--from the early years of the Minneapolis plant to the final hours of the Twin Cities Assembly Plant in St. Paul. McMahon documents the company's transformation--through the Depression, the rise of the United Auto Workers Union, World War II, women joining the workforce, competition from imported cars, globalization, outsourcing, and the closing of the plant. This publication was made possible in part by the people of Minnesota through a grant funded by an appropriation to the Minnesota Historical Society from the Minnesota Arts and Cultural Heritage Fund. Inside the Ford-UAW Transformation Joel Cutcher-Gershenfeld,Dan Brooks,Martin Mulloy,2015-05-08 How the partnership between Ford and the UAW, forged through more than fifty pivotal events, transformed their capacity to combine good jobs with high performance. In 2009, the Ford Motor Company was the only one of the Big Three automakers not to take the federal bailout package. How did Ford remain standing when its competitors were brought to their knees? It was a gutsy decision, but it didn't happen in isolation. The United Auto Workers joined with Ford to make this possible—not only in 2009, but in a series of more than fifty pivotal events during three decades that add up to a transformation that simultaneously values work and delivers results. The pivotal events—some planned and some unplanned; some at the facility level and some at the enterprise level –were not all successful. All had the potential, however, to further the transformation, and all provide insight into how large-scale system change really happens. The authors—each with years of experience with Ford, the UAW, and the industry—provide an unprecedented inside look at how core operating assumptions are shifted and at the emergence of integrated operating systems for quality, safety, and other aspects of the enterprise. It is a transformation built on a foundation of dignity and mutual respect, guided by a vision of combining good jobs with high performance.

The Second Automobile Revolution M. Freyssenet,2009-04-30 The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties.
