**The Boy Who Would Be a Helicopter** Vivian Gussin PALEY, 2009-06-30 How does a teacher begin to appreciate and tap the rich creative resources of the fantasy world of children? What social functions do story playing and storytelling serve in the preschool classroom? And how can the child who is trapped in private fantasies be brought into the richly imaginative social play that surrounds him? The Boy Who Would Be a Helicopter focuses on the challenge posed by the isolated child to teachers and classmates alike in the unique community of the classroom. It is the dramatic story of Jason-the loner and outsider-and of his ultimate triumph and homecoming into the society of his classmates. As we follow Jason's struggle, we see that the classroom is indeed the crucible within which the young discover themselves and learn to confront new problems in their daily experience. Vivian Paley recreates the stage upon which children emerge as natural and ingenious storytellers. She supplements these real-life vignettes with brilliant insights into the teaching process, offering detailed discussions about control, authority, and the misuse of punishment in the preschool classroom. She shows a more effective and natural dynamic of limit-setting that emerges in the control children exert over their own fantasies. And here for

the first time the author introduces a triumvirate of teachers (Paley herself and two apprentices) who reflect on the meaning of events unfolding before them.

*Means of Ascent* Robert A. Caro, 2011-11-23 In Means of Ascent, Book Two of The Years of Lyndon Johnson, Robert A. Caro brings alive Lyndon Johnson in his wilderness years. Here, Johnson's almost mythic personality—part genius, part behemoth, at once hotly emotional and icily calculating—is seen at its most nakedly ambitious. This multifaceted book carries the President-to-be from the aftermath of his devastating defeat in his 1941 campaign

for the Senate—the despair it engendered in him, and the grueling test of his spirit that followed as political doors slammed shut—through his service in World War II (and his artful embellishment of his record) to the foundation of his fortune (and the actual facts behind the myth he created about it). The culminating drama—the explosive heart of the book—is Caro’s illumination, based on extraordinarily detailed investigation, of one of the great political mysteries of the century. Having immersed himself in Johnson’s life and world, Caro is able to reveal the true story of the fiercely contested 1948 senatorial election, for years shrouded in rumor, which Johnson was not believed capable of winning, which he “had to” win or face certain political death, and which he did win—by 87 votes, the “87 votes that changed history.” Telling that epic story “in riveting and eye-opening detail,” Caro returns to the American consciousness a magnificent lost hero. He focuses closely not only on Johnson, whom we see harnessing every last particle of his strategic brilliance and energy, but on Johnson’s “unbeatable” opponent, the beloved former Texas Governor Coke Stevenson, who embodied in his own life the myth of the cowboy knight and was himself a legend for his unfaltering integrity. And ultimately, as the political duel between the two men quickens—carrying with it all the confrontational and moral drama of the perfect Western—Caro makes us witness to a momentous turning point in American politics: the tragic last stand of the old politics versus the new—the politics of issue versus the politics of image, mass manipulation, money and electronic dazzle.
