It reviews diagnosis and surveillance of aortic root dilation, mycotic aortic aneurysm, and the role of human immunodeficiency virus. Written by international experts, chapters discuss such topics as animal models for abdominal aortic aneurysm, safe methods of repairing type A aortic dissection, and challenges in data image analysis. This book provides a simple framework for those who want to understand the principles of aortic aneurysm and aortic dissection repair.

Blue Water Navy Vietnam Veterans and Agent Orange Exposure Institute of Medicine,Board on the Health of Select Populations,Committee on Blue Water Navy Vietnam Veterans and Agent Orange Exposure,2011-07-01 Over 3 million U.S. military personnel were sent to Southeast Asia to fight in the Vietnam War. Since the end of the Vietnam War, veterans have reported numerous health effects. Herbicides used in Vietnam, in particular Agent Orange have been associated with a variety of cancers and other long term health problems from Parkinson's

disease and type 2 diabetes to heart disease. Prior to 1997 laws safeguarded all service men and women deployed to Vietnam including members of the Blue Navy. Since then, the Department of Veteran Affairs (VA) has established that Vietnam veterans are automatically eligible for disability benefits should they develop any disease associated with Agent Orange exposure, however, veterans who served on deep sea vessels in Vietnam are not included. These Blue Water Navy veterans must prove they were exposed to Agent Orange before they can claim benefits. At the request of the VA, the Institute of Medicine (IOM) examined whether Blue Water Navy veterans had similar exposures to Agent Orange as other Vietnam veterans. Blue Water Navy Vietnam Veterans and Agent Orange Exposure comprehensively examines whether Vietnam veterans in the Blue Water Navy experienced exposures to herbicides and their contaminants by reviewing historical reports, relevant legislation, key personnel insights, and chemical analysis to resolve current debate on this issue.

Geriatric Palliative Care R. Sean Morrison, Diane E. Meier, 2003-05-08 Geriatric Palliative Care covers a broad spectrum of issues characterizing care near the end of life for older adults. Beginning with the social and cultural context of old age and frailty, this volume details specific aspects of palliative care relevant to particular disorders (e.g. cancer, strokes, dementia, etc.) as well as individual symptoms (e.g., pain, fatigue, anxiety, etc.). Communication between care-givers and patients, in a variety of settings, is also discussed. The theme of this book is that palliative care is the best approach to the care of chronically ill and frail elderly because of its focus on: quality of life; support for functional independence; and the centrality of the patient's values and experiences in

determining the goals of medical care. Indeed, Geriatric Palliative Care provides a comprehensive medical reference for all clinicians who care for older adults.

Minimally Invasive Neurosurgery Mark R. Proctor, 2007-11-23 Recognized clinical leaders in neurosurgery and neuroradiology review the cutting-edge techniques and technologies now available and describe how minimally invasive techniques have influenced their subspecialties. On the radiology side, the authors explain the latest developments in magnetic resonance spectroscopy, functional imaging, and brain mapping, with emphasis on the application of image navigation directly in the operating room, using both preoperative and intraoperative systems. On the surgical side, some of the world's leading surgeons in pediatric neurosurgery, cerebrovascular surgery, neurosurgical oncology, spinal and peripheral nerve surgery, and trauma surgery detail how they

use the powerful new minimally invasive techniques in the own practices. Among the novel approaches discussed are radiofrequency, radiosurgery, thermal therapy, and minimally invasive techniques that allow molecular neurosurgery via gene and viral vectors and local delivery systems.

Madhurashtakam Swami Tejomayananda, 2010 Vallabhacharya, the founder of the Pushti Maarg was a poet, scholar and passionate lover of Lord Krishna. Madhurashtakam is one of the immemorial compositions of Vallabhacharya, the founder of Pusti marg. These set of eight verses talk of Shri Krishna's bewitching personality. His pastimes, and His pranks all of which make Him loving and lovable. The composition has become more popular because of its simplicity. Pujya Guruji's commentary on it gives us a sense of immediacy with highlights of episodes from the lives of recent saints. It also makes us introspect on our hypocrisies which prevent us from flowing with sweetness. It opens our eyes to the healing energies of the Divine, clothed in a name and form.
