**The Third Industrial Revolution** Jeremy Rifkin, 2011-10-04 The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful Third Industrial Revolution. He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an energy internet, just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

Historia Norwegie Inger Ekrem, Lars Boje Mortensen, 2003 Written during the second half of the 12th century, the *Historia Norwegie* presents a lively and Christianised account of Norwegian history, particularly of the 10th century.

**Approaches to the Medieval Self** Stefka G. Eriksen, Karen Langsholt Holmqvist, Bjørn Bandlien, 2020-09-21 The main aim of this book is to discuss various modes of studying and defining the medieval self, based on a wide span of sources from medieval Western Scandinavia, c. 800-1500, such as archeological evidence, architecture and art, documents, literature, and runic inscriptions. The book engages with major theoretical discussions within the humanities and social sciences, such as cultural theory, practice theory, and cognitive theory. The authors investigate how the various approaches to the self influence our own scholarly mindsets and horizons, and how they condition what aspects of the medieval self are 'visible' to us. Utilizing this insight, we aim to propose a more syncretic approach towards the medieval self, not in order to substitute excellent models already in existence, but in order to foreground the flexibility and the complementarity of the current theories, when these are seen in relationship to each other. The self and how it relates to its surrounding world and history is a main concern of humanities and social sciences. Focusing on the theoretical and methodological flexibility when approaching the medieval self has the potential to raise our awareness of our own position and agency in various social spaces today.

*The Media Welfare State* Ole J. Mjøs, Hallvard Moe, Trine Syvertsen, Gunn Sara Enli, 2014-10-22 The *Media Welfare State: Nordic Media in the Digital Era* comprehensively addresses the central dynamics of the digitalization of the media industry in the Nordic countries—Sweden, Norway, Denmark, Finland, and Iceland—and the ways media organizations there are transforming to address the new digital environment. Taking a comparative approach, the authors provide an overview of media institutions, content, use, and policy throughout the region, focusing on the impact of information and communication technology/internet and digitalization on the Nordic media sector. Illustrating the shifting media landscape the authors draw on a wide range of cases, including developments in the press, television, the public service media institutions, and telecommunication.

**Small Country Innovation Systems** Charles Edquist, Leif Hommen, 2009-01-01 What are the challenges that small countries face concerning innovation and what are the effects of globalization on their innovation systems? In this very interesting, rich and timely book, Edquist and Hommen compare ten different small national innovation systems from the Asia Pacific and Northern Europe that are rather advanced in their development. The answers that the authors give are convincing

and relate not only to the unique characteristics of each national system that shapes innovative activity, but also to some commonalities that exist across these countries. Franco Malerba, Bocconi University, Italy This major book presents case studies of ten small country national systems of innovation (NSIs) in Europe and Asia, namely, Denmark, Finland, Hong Kong, Ireland, the Netherlands, Norway, Singapore, South Korea, Sweden and Taiwan. These cases have been carefully selected as examples of success within the context of globalization and as new economies where competition is increasingly based on innovation. To facilitate comparative analysis the ten studies follow a common structure, informed by an activities-based approach to describing and analysing NSIs, which addresses the critical issues of globalization and the consequences of innovation for economic performance. The final chapter compares fast growth and slow growth countries, concentrating on issues of innovation policy. The results illustrate the usefulness of an activities-based approach to studying NSIs, point to distinctive national roles within an increasingly differentiated international division of labour and address the key themes of selectivity and coordination in innovation policy. This valuable book presents one of the most significant, comprehensive and comparative country studies of NSIs in the last decade. It will have great import and should be widely read by every serious student and scholar of innovation studies.

**The Call of Jesus** Torben Søndergaard, 2020-03-17 The words of Jesus still have the power to change the world and set people free. Unfortunately, the problem we have seen over the last 2000 years is that religion and the traditions of men have been slowly pulling people away from the simple truth and original call of Jesus. *The Call of Jesus*, by Torben Søndergaard, is like an easy to understand instruction manual pulled from Scripture to help us effectively live the life to which Jesus has called us. Using Jesus' words in Luke chapter 10, Torben refreshingly reveals that Jesus' message was not only for His disciples and those who lived during that period of time, but it is also for all of us who are living today. Will you heed *The Call of Jesus*?

*Blue Ocean Leadership (Harvard Business Review Classics)* W. Chan Kim, Renée A. Mauborgne, 2017-05-30 Ten years ago, world-renowned professors W. Chan Kim and Renee Mauborgne broke ground by introducing blue ocean strategy, a new model for discovering

uncontested markets that are ripe for growth. In this bound version of their bestselling Harvard Business Review classic article, they apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and the realized talent and energy of employees. Research indicates that this gulf is vast: According to Gallup, 70% of workers are disengaged from their jobs. If companies could find a way to convert them into engaged employees, the results could be transformative. The trouble is, managers lack a clear understanding of what changes they could make to bring out the best in everyone. In this article, Kim and Mauborgne offer a solution to that problem: a systematic approach to uncovering, at each level of the organization, which leadership acts and activities will inspire employees to give their all, and a process for getting managers throughout the company to start doing them. Blue ocean leadership works because the managers' customers--that is, the people managers oversee and report to--are involved in identifying what's effective and what isn't. Moreover, the approach doesn't require leaders to alter who they are, just to undertake a different set of tasks. And that kind of change is much easier to implement and track than changes to values and mind-sets. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.

**The Routledge Handbook of Language Revitalization** Leanne Hinton, Leena Huss, Gerald Roche, 2018-03-05 The Routledge Handbook of Language Revitalization is the first comprehensive overview of the language revitalization movement, from the Arctic to the Amazon and across continents. Featuring 47 contributions from a global range of top scholars in the field, the handbook is divided into two parts, the first of which expands on language revitalization issues of theory and practice while the second covers regional perspectives in an effort to globalize and decolonize the field. The collection examines critical issues in language revitalization, including: language rights, language and well-being, and language policy; language in educational institutions and in the home; new methodologies and venues for language learning; and the roles of documentation, literacies, and the internet. The volume also contains chapters on the kinds of language that are less often researched such as the revitalization of music, of whistled languages and sign languages, and how languages change when they are being revitalized. The Routledge Handbook of Language Revitalization is the ideal resource for graduate students and researchers working in linguistic anthropology and language revitalization and endangerment.

*The Hostages of the Northmen* Stefan Olsson, 2019-12-16 The aim of this book is to investigate the taking and giving of hostages in peace processes during the Viking Age and early Middle Ages in Scandinavia and adjacent areas. Scandinavia has been absent in previous research about hostages from the perspectives of legal and social history, which has mostly focused on Antiquity (the Roman Empire), Continental Germanic cultures, such as the Merovingian realm, and Anglo-Saxon England. The examples presented are from confrontations between Scandinavians and other peoples in which the hostage giving and taking was displayed as a ritual act and thus became symbolically important. Hostages were a vital part of the peace processes and used as resources by both sides in the 'areas of communication' within the 'areas of confrontation'. Literary texts as well as runic inscriptions, picture stones, place names, and personal names are used as source material.

Principles for Dealing with the Changing World Order Ray Dalio, 2021-11-30 NEW YORK TIMES BESTSELLER \* MORE THAN ONE MILLION COPIES SOLD "A provocative read...There are few tomes that coherently map such broad economic histories as well as Mr. Dalio's. Perhaps more unusually, Mr. Dalio has managed to identify metrics from that history that can be applied to understand today." —Andrew Ross Sorkin, The New York Times From legendary investor Ray Dalio, author of the #1 New York Times bestseller *Principles*, who has spent half a century studying global economies and markets, *Principles for Dealing with the Changing World Order* examines history's most turbulent economic and political periods to reveal why the times ahead will likely be radically different from those we've experienced in our lifetimes—and to offer practical advice on how to

navigate them well. A few years ago, Ray Dalio noticed a confluence of political and economic conditions he hadn't encountered before. They included huge debts and zero or near-zero interest rates that led to massive printing of money in the world's three major reserve currencies; big political and social conflicts within countries, especially the US, due to the largest wealth, political, and values disparities in more than 100 years; and the rising of a world power (China) to challenge the existing world power (US) and the existing world order. The last time that this confluence occurred was between 1930 and 1945. This realization sent Dalio on a search for the repeating patterns and cause/effect relationships underlying all major changes in wealth and power over the last 500 years. In this remarkable and timely addition to his Principles series, Dalio brings readers along for his study of the major empires—including the Dutch, the British, and the American—putting into perspective the “Big Cycle” that has driven the successes and failures of all the world's major countries throughout history. He reveals the timeless and universal forces behind these shifts and uses them to look into the future, offering practical principles for positioning oneself for what's ahead.

Human and Organizational Dynamics in E-Health David Bangert, Robert Doktor, 2020-01-30

Nurses are key to building effective teams in primary care, but it has proved difficult to develop 'teams' in a service based on a small-business model. Current organisational arrangements fragment the different clinical professionals into tribes who have different employers and managers. This book brings together the work of pioneers in the field, to provide models for the future. As the need to define the primary care team becomes more urgent, this book is essential reading for all nursing professionals in primary care, nursing management, general practitioners, and primary care leaders at health authorities and Primary Care Organisations. 'The authors present an understanding of the context within which change is taking place, the elements to be addressed in the change process and a challenge for the future direction and pace of change.' From the Foreword by Marion Bull, Chief Nursing Officer, Welsh Office

Integration of Vocational Education and Training Experiences Sarojni Choy, Gun-Britt

Wärvik, Viveca Lindberg, 2018-06-19 This book draws on experiences from a range of vocational education systems in different nation states and re-examines the purpose of providing experiences outside educational institutions; the kinds and extent of those experiences; and efforts made to ensure the integration of students' experiences across sites. Analyses of the various vocational education systems, their purposes and practices across nations, and challenges experienced by different stakeholders illustrate different approaches to the integration of learning at different sites. The book includes a consideration of what constitutes the integration and reconciliation of experiences, and their attendant educational implications. This extends an appraisal of the concepts of integration, reconciliation, curriculum and work readiness, each of which has a range of connotations. Integration or reconciliation is differentiated from transfer of learning, which is commonly based on simple assumptions that the educational institutions will provide theory and that the workplaces will provide practice from the workplaces, and that the two can be easily linked by students. The contributions from different nation states clearly demonstrate that integration is a collaborative process and requires the agency of stakeholders operating at global, national and specific learning site levels.

*The Challenger Customer* Brent Adamson,Matthew Dixon,Pat Spenner,Nick Toman,2015-09-08 Four years ago, the bestselling authors of *The Challenger Sale* overturned decades of conventional wisdom with a bold new approach to sales. Now their latest research reveals something even more surprising: Being a Challenger seller isn't enough. Your success or failure also depends on who you challenge. Picture your ideal customer: friendly, eager to meet, ready to coach you through the sale and champion your products and services across the organization. It turns out that's the last person you need. Most marketing and sales teams go after low-hanging fruit: buyers who are eager and have clearly articulated needs. That's simply human nature; it's much easier to build a relationship with someone who always makes time for you, engages with your content, and listens attentively. But according to brand-new CEB research—based on data from thousands of B2B marketers, sellers, and buyers around the world—the highest-performing teams focus their time on potential customers who are far more skeptical, far less interested in meeting, and ultimately agnostic as to who wins the deal. How could this be? The authors of *The Challenger Customer* reveal that high-performing B2B teams grasp something that their average-performing peers don't: Now that big, complex deals increasingly require consensus among a wide range of players across the organization, the limiting factor is rarely the salesperson's inability to get an individual stakeholder to agree to a solution. More often it's that the stakeholders inside the company can't even agree with one another about what the problem is. It turns out only a very specific type of customer stakeholder has the credibility, persuasive skill, and will to effectively challenge his or her colleagues to pursue anything more ambitious than the status quo. These customers get deals to the finish line far more often than friendlier stakeholders who seem so receptive at first. In other words, Challenger sellers do best when they target Challenger customers. *The Challenger Customer* unveils research-based tools that will help you distinguish the Talkers from the Mobilizers in any organization. It also provides a blueprint for finding them, engaging them with disruptive insight, and equipping them to effectively challenge their own organization.

**Norwegian: A Comprehensive Grammar** Philip Holmes,Hans-Olav Enger,2018-04-27 Norwegian: A Comprehensive Grammar is a complete reference guide to modern Norwegian (the Bokmål standard). The Grammar is an essential source for the serious student of Norwegian, and for students of comparative linguistics. It is ideal for use in colleges, universities and adult classes of all types. The volume is organised to promote a thorough understanding of Norwegian grammar. It presents the complexities of Norwegian in a concise and readable form. Explanations are full, clear and free of jargon. Throughout, the emphasis is on Norwegian as used by present-day native speakers. An extensive index, numbered paragraphs, cross-references and summary charts provide readers with easy access to the information they require.

*The Effortless Experience* Matthew Dixon,Nick Toman,Rick DeLisi,2013-09-12 Everyone knows that the best way to create customer loyalty is with service so good, so over the top, that it surprises and delights. But what if everyone is wrong? In their acclaimed bestseller *The Challenger Sale*, Matthew Dixon and his colleagues at CEB busted many longstanding myths about sales. Now they've turned their research and analysis to a new vital business subject—customer loyalty—with a new book that turns the conventional wisdom on its head. The idea that companies must delight customers by exceeding service expectations is so entrenched that managers rarely even question it. They devote untold time, energy, and resources to trying to dazzle people and inspire their undying loyalty. Yet CEB's careful research over five years and tens of thousands of respondents proves that the "dazzle factor" is wildly overrated—it simply doesn't predict repeat sales, share of wallet, or positive word-of-mouth. The reality: Loyalty is driven by how well a company delivers on its basic

promises and solves day-to-day problems, not on how spectacular its service experience might be. Most customers don't want to be "wowed"; they want an effortless experience. And they are far more likely to punish you for bad service than to reward you for good service. If you put on your customer hat rather than your manager or marketer hat, this makes a lot of sense. What do you really want from your cable company, a free month of HBO when it screws up or a fast, painless restoration of your connection? What about your bank—do you want free cookies and a cheerful smile, even a personal relationship with your teller? Or just a quick in-and-out transaction and an easy way to get a refund when it accidentally overcharges on fees? The Effortless Experience takes readers on a fascinating journey deep inside the customer experience to reveal what really makes customers loyal—and disloyal. The authors lay out the four key pillars of a low-effort customer experience, along the way delivering robust data, shocking insights and profiles of companies that are already using the principles revealed by CEB's research, with great results. And they include many tools and templates you can start applying right away to improve service, reduce costs, decrease customer churn, and ultimately generate the elusive loyalty that the "dazzle factor" fails to deliver. The rewards are there for the taking, and the pathway to achieving them is now clearly marked.

web in mathematics a partial differential  
equation pde is an equation which computes a  
function between various partial derivatives of a  
multivariable function the function is often  
thought of as an unknown to be solved for  
similar to how  $x$  is thought of as an unknown  
number to be solved for in an algebraic equation
