Historical and Multidisciplinary Perspectives on Hope Steven C. van den Heuvel,2020-07-20 This open access volume makes an important contribution to the ongoing research on hope theory by combining insights from both its long history and its increasing multi-disciplinarity. In the first part, it recognizes the importance of the centuries-old reflection on hope by offering historical perspectives and tracing it back to ancient Greek philosophy. At the same time, it provides novel perspectives on often-overlooked historical theories and developments and challenges established views. The second part of the volume documents the state of the art of current research in hope across eight disciplines, which are philosophy, theology, psychology, economy, sociology, health studies, ecology, and development studies. Taken together, this volume provides an integrated view on hope as a multi-faced phenomenon. It contributes to the further understanding of hope as an essential human capacity, with the possibility of transforming our human societies.

Linguistic Inquiry and Word Count James W. Pennebaker,M. E. Francis,1999-04-01 Language, whether spoken or written, is an important window into people's emotional and cognitive worlds. Text analysis of these narratives, focusing on specific words or classes of words, has been used in numerous research studies including studies of emotional, cognitive, structural, and process components of individuals' verbal and written language.

It was in this research context that the LIWC program was developed. The program analyzes text files on a word-by-word basis, calculating percentage words that match each of several language dimensions. Its output is a text file that can be opened in any of a variety of applications, including word processors and spreadsheet programs. The program has 68 pre-set dimensions (output variables) including linguistic dimensions, word categories tapping psychological constructs, and personal concern categories, and can accommodate user-defined dimensions as well. Easy to install and use, this software offers researchers in social, personality, clinical, and applied psychology a valuable tool for quantifying the rich but often slippery data provided in the form of personal narratives. The software comes complete on one 3 1/2 diskette and runs on any Windows-based computer.

Arts Based Research Tom Barone, Elliot W. Eisner, 2011-03-28 Designed to be used as both a class text and a resource for researchers and practitioners, Arts Based Research provides a framework for those who seek to broaden the domain of qualitative inquiry in the social sciences by incorporating the arts as forms that represent human knowing.

COMIC STRIPS & CONSUMER CULT PB GORDON IAN, 2002-09-17 Emerging just as Americans were beginning to define themselves less by what they made and believed and more by what they bought, comic strips were from the outset commodities sold by syndicates to newspapers nationwide. Ian Gordon demonstrates that the strips' most enduring role has been not only to mirror a burgeoning consumer culture but also to

actively promote it.

Skillful Listening & Speaking Lida R. Baker,Baker And Steven Gershon Lida,2012

Every student needs top class listening and speaking skills to succeed at an academic level. Skillful focuses on these two skills to give presentation, instant practice and complete immersion in those language skills. It offers students the opportunity to develop language skills by presenting them with ideas from today's world, while building critical thinking skills that are vital for academic success. This is taken even further with a focus on study skills, providing students with practical guidance and support, and building confidence for independent learning throughout their university career.

New Cultural Studies Clare Birchall,Gary Hall,2006-01-01 New Cultural Studies is both an introductory reference work and an original study which explores new directions and territories for cultural studies. A new generation has begun to emerge from the shadow of the Birmingham School. It is a generation whose whole education has been shaped by theory, and who frequently turn to it as a means to think through some of the issues and current problems in contemporary culture and cultural studies. In a period when departments which were once hotbeds of high theory are returning to more sociological and social science oriented modes of research, and 9/11 and the war in Iraq especially have helped create a sense of post-theoretical political urgency which leaves

little time for the elitist, Eurocentric, textual concerns of Theory, theoretical approaches to the study of culture have, for many of this generation, never seemed so important or so vital. New Cultural Studies explores theory's past, present, and most especially future role in cultural studies. It does so by providing an authoritative and accessible guide, for students and teachers alike, to: the most innovative members of this new generation the thinkers and theories currently influencing new work in cultural studies: Agamben, Badiou, Deleuze, Derrida, Hardt and Negri, Kittler, Laclau, Levinas, and iek the new territories currently being mapped out across the intersections of cultural studies and cultural theory: anti-capitalism, ethics, the posthumanities, post-Marxism, and the transnational

The Golem in German Social Theory Gad Ya'ir, Michaela Soyer, 2008 The Golem in German Social Theory provides an innovative and bold interpretation of German social theory. Authors Yair and Soyer argue that German scholars have been continually preoccupied with ancient, religiously-based myths that criticize the ideals of the enlightenment, exemplified by the 16th-century narrative of the Golem rising over its master.

Picturing the Past Jack Green,Emily Teeter,John A. Larson,2012 This fully illustrated catalogue of essays, descriptions, and commentary accompanies the Oriental Institute special exhibit *Picturing the Past: Imaging and Imagining the Ancient Middle East* (on exhibit February 7 through September 2, 2012). *Picturing the Past* presents paintings, architectural reconstructions, facsimiles, models, photographs, and computer-aided reconstructions that show how the architecture, sites, and artifacts of the ancient Middle East have been documented. It also examines how the publication of those images have shaped our perception of the ancient world, and how some of the more imaginary reconstructions have obscured our real understanding of the past. The exhibit and catalog also show how features of the ancient Middle East have been presented in different ways for different audiences, in some cases transforming a highly academic image into a widely recognized icon of the past.

Women's Evolving Lives Carrie M. Brown,Uwe P. Gielen,Judith L. Gibbons,Judy Kuriansky,2017-07-11 This wide-ranging collection analyzes the status and advancement of women both in a national context and collectively on a global scale, as a powerful social force in a rapidly evolving world. The countries studied—China, India, Indonesia, Iran, Egypt, Cameroon, South Africa, Italy, France, Brazil, Belize, Mexico, and the United States—represent a cross-section of economic conditions, cultural and religious traditions, political realities, and social contexts that shape women's lives, challenges, and opportunities. Psychological and human rights perspectives highlight worldwide goals for equality and empowerment, with implications for today's girls as they become the next

generation of women. Throughout these chapters, women's lived experience is compared and contrasted in such critical areas as: Home and work lives Physical, medical, and psychological issues Safety and violence Sexual and reproductive concerns Political participation and status under the law Impact of technology and globalism Country-specific topics Women's Evolving Lives is a forward-facing reference for psychology professionals of varied disciplines, as well as for colleagues in other fields, including women's and gender studies, sociology, anthropology, international studies, and education. The wide scope of concerns also makes this anthology relevant and instructive to readers in diverse non-academic settings.
