Helping Africa Help Itself: A Global Effort Anup Shah,2014-09-29 Much of modern Africa struggles with poverty, famine, widespread disease, and violent conflict. The international community increasingly acknowledges the need to help Africa, and donor agencies and rich-nation governments have offered development assistance, food aid, and debt relief to the continent. But it is uncertain how effective this aid actually is, and how the world can best help African countries move toward self-sufficiency. Helping Africa Help Itself outlines various types of international aid and describes some of the organizations collecting and distributing it. The book explains such complex issues as debt relief, war crimes commissions, and Structural Adjustment Programs. Historical and political factors that have contributed to Africa's present predicament are also examined.

The Trouble with Africa Robert Calderisi,2014-12-23 After years of frustration at the stifling atmosphere of political correctness surrounding discussions of Africa, long time World Bank official Robert Calderisi speaks out. He boldly reveals how most of Africa's misfortunes are self-imposed, and why the world must now deal differently with the continent. Here we learn that Africa has steadily lost markets by its own mismanagement, that even capitalist countries are anti-business, that African family values and fatalism are more destructive than tribalism, and that African leaders prey intentionally on Western guilt. Calderisi exposes the shortcomings of foreign aid and debt relief, and proposes his own radical solutions. Drawing on thirty years of first hand experience, The Trouble with Africa highlights issues which have been ignored by Africa's leaders but have worried ordinary Africans, diplomats, academics, business leaders, aid workers, volunteers, and missionaries for a long time. It ripples with stories which only someone who has talked directly to African farmers--and heads of state--could recount. Calderisi's aim is to move beyond the hand-wringing and finger-pointing which dominates most discussions of Africa. Instead, he suggests concrete steps which Africans and the world can take to liberate talent and enterprise on the continent.

Giving to Help, Helping to Give Tade Akin Aina,2013-08-01 The past decade has seen a flowering of philanthropic activities across many parts of Africa. Unlike before, this flowering has the distinct character of African agency, energy and engagement. Philanthropy is no longer about narratives of passive, poor and miserable Africans receiving help from rich, fortunate and often Western outsiders. The emerging narratives about philanthropy in Africa are about an increasingly confident and knowledgeable assertion of African capacities to give not only to help but also to transform and seek to address the root causes of injustice, want, ignorance and disease. The narratives are also about the increasing questioning of the role and place of Africans in the world's philanthropic traditions and what constitutes African specificities but also African differences and varieties. This book is about African philanthropic experiences, their varieties, challenges and opportunities. It is about documenting, investigating, describing, questioning and reflecting on philanthropy in Africa. Because Africa is not a monolithic entity with one single history, cultural, political and economic experience, this ground-breaking book rightly tackles the varied modes, forms, vehicles and means in which the philanthropic experiences are expressed in Africa. It is a pioneering and ambitious effort in a field and community of practice that is new both in terms of scholarship and in professional practice. Many of the chapters boldly engage the burden of reflections, questions, ambivalences and ambiguities that one often finds in an emerging field, innovatively positing the outlines, concepts, frameworks and theories of scholarship and practice for a field critical to development on the continent.

The Trouble with Aid Jonathan Glennie,International African Institute,Royal African Society,2008-10 Africa is poor. If we send it money it will be less poor. It seems simple. Jonathan Glennie argues that government aid to Africa actually has many very harmful effects. He claims that aid has often meant more poverty, more hungry people, worse basic services for poor people and damage to already precarious democratic institutions.

Improving Aid to Africa Nicolas Van de Walle,Timothy A. Johnston,1996 As foreign aid flows decline and skepticism toward the effectiveness of aid to Africa grows, a major reassessment of aid is needed. While the ineffectiveness of aid to Africa is a long-standing concern, past studies typically have been driven by donor priorities and have rarely focused on recipient governments. This neglect of the role of African governments is remarkable, since aid constitutes 10 to 15 percent of GNP in many African countries and often represents over half of all public investment. If the impact of official development assistance (ODA) is to be improved, recipient governments must become more involved in the reform of aid. This essay presents the policy findings of a collaborative project of field research and analyses of how African countries use aid resources and of donor/African relations. The widespread belief of free market economists and nongovernmental organizations that government is the problem and not part of the solution has become a self-fulfilling prophesy in Africa, writes van de Walle and Johnston, donors must devote greater attention and resources to help build the capacity of African Governments to effectively manage aid, even as they encourage the central state to retrench from nonessential functions. The study assesses current donor practices and the impact of economic crisis on aid effectiveness in the region; and it offers recommendations to promote management capacity, focusing on the integration of aid resources in development management, sectoral specialization, and public dialogue on aid.

Macroeconomic Challenges of Scaling Up Aid to Africa Yongzheng Yang,Mr.Robert Powell,Mr.Sanjeev Gupta,2006-03-20 Over the next decade, African countries are expected to be the largest beneficiaries of increased donor aid, which is intended to improve their prospects for achieving the Millennium Development Goals. This handbook will help these countries assess the macroeconomic implications of increased aid and respond to the associated policy challenges. The handbook is directed at policymakers, practicing economists in African countries, and the staffs of international financial institutions and donor agencies who participate in preparing medium-term strategies for African countries, including in the context of poverty reduction strategy papers. It provides five main guidelines for developing scaling-up scenarios to help countries identify important policy issues involved in using higher aid flows effectively: to absorb as much aid as possible, to boost growth in the short to medium term, to promote good governance and reduce corruption, to prepare an exit strategy should aid levels decrease, and to regularly reassess the policy mix.

We Need to Talk About Africa Tom Young,2018-03-01 If you boil a kettle twice today, you will have used five times more electricity than a person in Mali uses in a whole year. How can that be possible? Decades after the colonial powers withdrew Africa is still struggling to catch up with the rest of the world. When the same colonists withdrew from Asia there followed several decades of sustained and unprecedented growth throughout the continent. So what went wrong in Africa? And are we helping to fix it, or simply making matters worse? In this provocative analysis, Tom Young argues that so much has been misplaced: our guilt, our policies, and our aid.

Human rights have become a cover for imposing our values on others, our shiniest infrastructure projects have fuelled corruption and our interference in domestic politics has further entrenched conflict. Only by radically changing how we think about Africa can we escape this vicious cycle.
