Emergency Alert and Warning Systems: Research Directions

**Mobile Technology and the Transformation of Public Alert and Warning** Hamilton Bean,2019-10-01 This timely book provides the inside story of the development of mobile public alert and warning technology in the United States and addresses similar systems being used in Australia, Canada, Japan, and the Netherlands. This book provides a comprehensive account of how mobile-smartphone systems are transforming the practice of public alert and warning in the United States. Recent events have vaulted mobile alert and warning technology to the forefront of public debates concerning the hazards of the digital age. False alarms of ballistic missile attacks on Hawaii and Japan, the non-use of mobile alerts during the Northern California wildfires, and the role this technology plays in supporting police manhunts and counterterrorism efforts have prompted reconsideration of how these systems are used. Drawing upon interviews with officials, executives, experts, and citizens, the book provides an in-depth analysis of the events and contexts influencing the trajectory of mobile public alert and warning and charts a course for its improvement. The book first introduces readers to the high stakes involved in the transformation of public alert and warning, explaining how new research is revealing the benefits, limitations, and risks of mobile technology in the disaster communication context. Three case studies then illustrate issues of risk, trust, and appropriateness in mobile public alert and warning.

**How Information Systems Can Help in Alarm/Alert Detection** Florence Sedes,2018-11-12 Alarm or alert detection remains an issue in various areas from nature, i.e. flooding, animals or earthquake, to software systems. Liveness, dynamicity, reactivity of alarm systems: how to ensure the warning information reach the right destination at the right moment and in the right location, still being relevant for the recipient, in spite of the various and successive filters of confidentiality, privacy, firewall policies, etc.? Also relevant in this context are to technical contingency issues: material failure, defect of connection, break of channels, independence of information routes and sources? Alarms with crowd media, (mis)information vs. rumours: how to make the distinction? The prediction of natural disasters (floods, avalanches, etc.), health surveillance (affectionate fevers of cattle, pollution by pesticides, etc.), air, sea and land transport, or space surveillance to prevent Risks of collisions between orbital objects involve more and more actors within Information Systems, one of whose purposes is the dissemination of alerts. By expanding the capabilities and functionality of such national or international systems, social networks are playing a growing role in dissemination and sharing, eg. with the support of systems like the Google Alert (<https://www.google.fr/alerts>) which concerns the publication of contents online. Recently, the Twitter microblogging platform announced a broadcast service, designed to help government organizations with alerts to the public. The proper functioning of such systems depends on fundamental properties such as resilience, liveliness and responsiveness: any alert must absolutely reach the right recipient at the right time and in the right place, while remaining relevant to him, despite the various constraints. on the one hand to external events, such as hardware failures, connection faults, breaks in communication channels, on the other hand to confidentiality, such as the collection and use of personal data (with or without the consent of the user), or the disparity of access policies (generation according to industrial, technological, security constraints, management of internal / external policies, etc.) between actors. This book opens the discussion on the procrastination, the dynamics and the reactivity of the alert systems, but also the problems of confidentiality, filtering of information, and the means of distinguishing information and rumor. Presents alarm or alert detection in all its aspects Finds a solution so that the alert information reaches the right destination Find relevance to various technical issues

**Public Response to Alerts and Warnings on Mobile Devices** National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on Public Response to Alerts and Warnings on Mobile Devices: Current Knowledge and Research Gaps,2011-04-18 This book presents a summary of the Workshop on Public Response to Alerts and Warnings on Mobile Devices: Current Knowledge and Research Gaps, held April 13 and 14, 2010, in Washington, D.C., under the auspices of the National Research Council's Committee on Public Response to Alerts and Warnings on Mobile Devices: Current Knowledge and Research Needs. The workshop was structured to gather inputs and insights from social science researchers, technologists, emergency management professionals, and other experts knowledgeable about how the public responds to alerts and warnings, focusing specifically on how the public responds to mobile alerting.

**16th International Conference on Information Technology-New Generations (ITNG 2019)** Shahram Latifi,2019-05-22 This 16th International Conference on Information Technology - New Generations (ITNG), continues an annual event focusing on state of the art technologies pertaining to digital information and communications. The applications of advanced information technology to such domains as astronomy, biology, education, geosciences, security and health care are among topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing are examples of related topics. The conference features keynote speakers, the best student award, poster award, service award, a technical open panel, and workshops/exhibits from industry, government and academia.

**Advances in Automation, Signal Processing, Instrumentation, and Control** Venkata Lakshmi Narayana Komanapalli,N. Sivakumaran,Santoshkumar Hampannavar,2021-03-04 This book presents the select proceedings of

the International Conference on Automation, Signal Processing, Instrumentation and Control (i-CASIC) 2020. The book mainly focuses on emerging technologies in electrical systems, IoT-based instrumentation, advanced industrial automation, and advanced image and signal processing. It also includes studies on the analysis, design and implementation of instrumentation systems, and high-accuracy and energy-efficient controllers. The contents of this book will be useful for beginners, researchers as well as professionals interested in instrumentation and control, and other allied fields.

**Next Generation Data Technologies for Collective Computational Intelligence** Nik Bessis,Fatos Xhafa,2011-04-28 This book focuses on next generation data technologies in support of collective and computational intelligence. The book brings various next generation data technologies together to capture, integrate, analyze, mine, annotate and visualize distributed data – made available from various community users – in a meaningful and collaborative for the organization manner. A unique perspective on collective computational intelligence is offered by embracing both theory and strategies fundamentals such as data clustering, graph partitioning, collaborative decision making, self-adaptive ant colony, swarm and evolutionary agents. It also covers emerging and next generation technologies in support of collective computational intelligence such as Web 2.0 social networks, semantic web for data annotation, knowledge representation and inference, data privacy and security, and enabling distributed and collaborative paradigms such as P2P, Grid and Cloud Computing due to the geographically dispersed and distributed nature of the data. The book aims to cover in a comprehensive manner the combinatorial effort of utilizing and integrating various next generations collaborative and distributed data technologies for computational intelligence in various scenarios. The book also distinguishes itself by assessing whether utilization and integration of next generation data technologies can assist in the identification of new opportunities, which may also be strategically fit for purpose.

**Data Mining Mobile Devices** Jesus Mena,2013-06-18 With today's consumers spending more time on their mobiles than on their PCs, new methods of empirical stochastic modeling have emerged that can provide marketers with detailed information about the products, content, and services their customers desire. Data Mining Mobile Devices defines the collection of machine-sensed environmental data pertaining to human social behavior. It explains how the integration of data mining and machine learning can enable the modeling of conversation context, proximity sensing, and geospatial location throughout large communities of mobile users. Examines the construction and leveraging of mobile sites Describes how to use mobile apps to gather key data about consumers' behavior and preferences Discusses mobile mobs, which can be differentiated as distinct marketplaces—including Apple®, Google®, Facebook®, Amazon®, and Twitter® Provides detailed coverage of mobile analytics via clustering, text, and classification AI software and techniques Mobile devices serve as detailed diaries of a person, continuously and intimately broadcasting where, how, when, and what products, services, and content your consumers desire. The future is mobile—data mining starts and stops in consumers' pockets. Describing how to analyze Wi-Fi and GPS data from websites and apps, the book explains how to model mined data through the use of artificial intelligence software. It also discusses the monetization of mobile devices' desires and preferences that can lead to the triangulated marketing of content, products, or services to billions of consumers—in a relevant, anonymous, and personal manner.

**MOBILE COMMERCE** BANDYOPADHYAY, KARABI,2022-12-19 Once the treasured piece of the elite class, mobile phones have now become a prerequisite of every commoner. From schoolchildren to pensioners, from bureaucrats to fruit vendors, all depend greatly on their mobile phones now. The reason can be given to its impeccable potential to perform various applications efficiently, within no time. This book on Mobile Commerce gives an in-depth insight on the role of a mobile in revolutionizing various industry verticals, specifically business and commerce. The book, in its second edition, shows the evolution of a mobile phone from a mere gadget meant for communication to a smarter one performing business transactions. The book is divided into seven parts discussing basic concepts, technologies, key players, new products, security and legal aspects, the future trends and the case studies. The book also discusses various technologically advanced handheld devices, like Smart phones, PDA's, Laptops, Tablets and Portable Gaming Consoles, in detail. Besides, the basic technology and concepts involved in application of mobile commerce is discussed comprehensively. The important concepts, like mobile marketing, mobile ticketing, mobile computing, mobile payments and mobile banking are discussed vis-a-vis latest technologies, like wireless and mobile communication technology, digital cellular technology, mobile access technology including 5G and 6G systems. The book also throws light on the issues, such as mobile security hazards, and the necessary measures to protect against the same. A chapter is devoted to laws governing the mobile phone usage and its privacy. The Case Studies are provided elucidating the role of

mobile commerce in the real-life scenarios. This book is intended for the undergraduate and postgraduate students of Computer Applications, Electronics & Communication Engineering, Information Technology and Management. NEW TO THE SECOND EDITION • Introduction of 5G & 6G Technologies • Introduction of New Mobile Payment Technologies • Implementation of New Security Technologies • Development of New Mobile Commerce Services & Applications • Various Advanced Mobile Computing Systems • Implementation of New IT Rules TARGET AUDIENCE • BBA/MBA • BCA/MCA • B.Tech/M.Tech (Electronics & Communication Engineering)

Online Security for the Business Traveler Deborah Gonzalez,2014-08-23 Whether attending conferences, visiting clients, or going to sales meetings, travel is an unavoidable necessity for many businesspeople. Today's high-tech enabled businessperson travels with electronic devices such as smartphones, tablets, laptops, health sensors, and Google Glass. Each of these devices offers new levels of productivity and efficiency, but they also become the weak link in the security chain: if a device is lost or stolen during travel, the resulting data breach can put the business in danger of physical, financial, and reputational loss. *Online Security for the Business Traveler* provides an overview of this often overlooked problem, explores cases highlighting specific security issues, and offers practical advice on what to do to ensure business security while traveling and engaging in online activity. It is an essential reference guide for any travelling business person or security professional. Chapters are organized by travel stages for easy reference, including planning, departure, arrival, and returning home Touches on the latest technologies that today's business traveler is using Uses case studies to highlight specific security issues and identify areas for improved risk mitigation

*Caregiver's Handbook* DK,2013-09-01 The Caregiver's Handbook is a definitive guide to caring for a sick or disabled person of any age. Whether it be adults looking after parents, partners looking after each other, parents looking after children, or young caregivers looking after their parents, the Caregiver's Handbook addresses both the needs of the caregiver, and person who needs care. The Caregiver's Handbook offers emotional support and practical advice on a wide range of topics, enabling individuals to provide the best care possible-whatever the requirements. Everyday concerns, including healthy eating, personal care, and rest and sleep, are addressed alongside topics such as safe movement and handling, choosing the right stability aids, or even how to maneuver a wheelchair for the first time. Features also include a look at how either at the needs of the caregiver, or how the requirement of specific conditions-such as dementia or physical impairment-can affect the way a task can be approached. The Caregiver's Handbook is a comprehensive, compassionate, and indispensable resource that all caregivers will want to have on hand at all times - it is essential reading for anyone caring for someone at home.

Emergency Alert and Warning Systems National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on the Future of Emergency Alert and Warning Systems: Research Directions,2018-05-19 Following a series of natural disasters, including Hurricane Katrina, that revealed shortcomings in the nation's ability to effectively alert populations at risk, Congress passed the Warning, Alert, and Response Network (WARN) Act in 2006. Today, new technologies such as smart phones and social media platforms offer new ways to communicate with the public, and the information ecosystem is much broader, including additional official channels, such as government social media accounts, opt-in short message service (SMS)-based alerting systems, and reverse 911 systems; less official channels, such as main stream media outlets and weather applications on connected devices; and unofficial channels, such as first person reports via social media. Traditional media have also taken advantage of these new tools, including their own mobile applications to extend their reach of beyond broadcast radio, television, and cable. Furthermore, private companies have begun to take advantage of the large amounts of data about users they possess to detect events and provide alerts and warnings and other hazard-related information to their users. More than 60 years of research on the public response to alerts and warnings has yielded many insights about how people respond to information that they are at risk and the circumstances under which they are most likely to take appropriate protective action. Some, but not all, of these results have been used to inform the design and operation of alert and warning systems, and new insights continue to emerge. *Emergency Alert and Warning Systems* reviews the results of past research, considers new possibilities for realizing more effective alert and warning systems, explores how a more effective national alert and warning system might be created and some of the gaps in our present knowledge, and sets forth a research agenda to advance the nation's alert and warning capabilities.

*Making Money on the Mobile Internet* Jeff Yee,Will Dixon,Deanna Garcia,2006 In the United States, mobile commerce is a \$1 billion industry and growing. More and more people are using their mobile phones everywhere to communicate, to get information, and to have fun. The technology for you to create, deliver, and market that content -- and profit from it -- is available now too. In *Making Money on the Mobile Internet*, the experts at AT&T show you how to harness the potential of the mobile marketplace in five simple steps. The business opportunities for mobile content providers are tremendous. From creating your application to getting it to

market to tracking your success, Making Money on the Mobile Internet shows you how to create the next killer app. Let's get started

**Wireless Algorithms, Systems, and Applications** Xiuzhen Cheng,2006-08-03 This book constitutes the refereed proceedings of the First Annual International Conference on Wireless Algorithms, Systems, and Applications, WASA 2006, held in Xi'an, China in August 2006. The book presents 63 revised full papers together with 2 invited keynote speech abstracts, organized in topical sections on wireless PAN and wireless LAN, wireless MAN and pervasive computing, data management, mobility, localization and topology control, performance modeling and analysis, security and more.

*Intelligent Computing Paradigm and Cutting-edge Technologies* Margarita N. Favorskaya,Sheng-Lung Peng,Milan Simic,Basim Alhadidi,Souvik Pal,2021-04-21 This book aims to bring together Researchers, Scientists, Engineers, Scholars and Students in the areas of computer engineering and information technology, and provides a forum for the dissemination of original research results, new ideas, Research and development, practical experiments, which concentrate on both theory and practices, for the benefit of the society. The book also provides a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Computer Science and Information Technology in the context of Distributed computing, Big data, High performance computing, Internet-of-Things, and digital pedagogy. It is becoming increasingly important to develop adaptive, intelligent computing-centric, energy-aware, secure and privacy-aware mechanisms in high performance computing and IoT applications. This book aspires to convey researchers’ experiences, to present excellent result analysis, future scopes, and challenges facing the field of computer science, information technology, telecommunication, and digital pedagogy. This book aims to attract researchers and practitioners who are working in Information Technology and Computer Science. This book is about basics and high level concepts regarding intelligent computing paradigm, communications, and digital learning process. The book serves as a useful guide for Undergraduates, Postgraduates and Research Scholar in the field of Computer Science, Information Technology, and Electronics Engineering. We believe that this volume not only presents novel and interesting ideas but also will stimulate interesting discussions from the participants and inspire new ideas.
