A Guide to a Somatic Movement Practice Nancy Topf, 2022-07-12 An introduction to embodied movement through the work of a dance education pioneer In this introduction to the work of somatic dance education pioneer Nancy Topf (1942–1998), readers are ushered on a journey to explore the movement of the body through a close awareness of anatomical form and function. Making available the full text of Topf’s *The Anatomy of Center* for the first time in print, this guide helps professionals, teachers, and students of all levels integrate embodied, somatic practices within contexts of dance, physical education and therapy, health, and mental well-being. Hetty King, a movement educator certified in the Topf Technique®, explains how the ideas in this work grew out of Topf’s involvement in developing Anatomical Release Technique—an important concept in contemporary dance—and the influence of earlier innovators Barbara Clark and Mabel Elsworth Todd, founder of the approach to movement known as “ideokinesis.” Featuring lessons written as a dialogue between teacher, student, and elements of the body, Topf’s material is accompanied by twenty-one activities that allow readers to use the book as a self-guided manual. *A Guide to a Somatic Movement Practice* is a widely applicable entry point into the tradition of experiential anatomy and its mindful centering of the living, breathing body.

The Holocaust Diaries Leo V. Kanawada Jr., Leo V. Kanawada, 2010 Book Five THE INNOCENCE OF THE JUST The Holocaust in Hungary and Slovakia during World War II In 1944, Hitler refuses to abandon his plans to deport the last remaining, huge concentration of Jews in Europe. Over one million Jews live relatively untouched in Hungary. He calls for the renovation and enlargement of the Auschwitz concentration camp in Poland. It’s only

at this time that Roosevelt and the rest of the world learn the truth about Auschwitz and the extermination camps of Poland. To bomb the camps then becomes a grave issue. Discovering also from these covert reports that Heinrich Himmler, Hitler's second-in-command and head of the SS, is willing to secretly negotiate with Roosevelt to end the war, Roosevelt sees the opportunity to preserve even more of the Jews in Europe. He decides to use them as his bargaining chip and sole condition for opening negotiations with Himmler. In the meantime, under the guise of needing a hundred thousand able-bodied Hungarian laborers and their families for the war effort back in Germany, Hitler hoodwinks the elderly Regent of Hungary, Miklos Horthy, and oversees a swift occupation of Hungary in March of 1944 by his Wehrmacht. Over four hundred thousand Jews are deported to Auschwitz in less than two months time by Adolf Eichmann's SS and the newly-installed, pro-Nazi and pro-German quisling Hungarian government and its thousands of rightist police. When Horthy learns the truth about Auschwitz and receives pressure from Roosevelt and the Vatican, he re-exerts his authority and halts the deportations. After an assassination attempt on Hitler in July of 1944, Himmler is encouraged by his associates to also exert his authority and approach Roosevelt's representatives in Switzerland to initiate serious negotiations to bring about a separate peace and an end to the persecution of the Jews.

Granites Anne Nédélec, Jean-Luc Bouchez, 2015-01-09 Granites are emblematic rocks developed from a magma that crystallized in the Earth's crust. They ultimately outcrop at the surface of every continent. This book offers a modern presentation of granitic rocks. It considers granites in their geological spatial and temporal frame, and in relation to plate tectonics and Earth history. The book - translated, edited, and updated from the original French edition *Pétrologie des Granites* published by Vuibert in 2011 - gives a modern presentation of granitic rocks, or granites, from magma genesis to their emplacement into the crust and their crystallization. Mineralogical, petrological, physical, and economical aspects are explored and developed in a succession. The text is supported throughout by a large number of illustrations, descriptions of modern techniques, and additional boxes holding further discussions for those wishing to deepen their knowledge of the subject.

goal: to make the poison-filled atmosphere of Venus hospitable to humans. She works day and night to realize her dream, with only one person sharing her passion, Liang Chen. It seems impossible to make Venus, with its intolerable air and waterless environment, into a paradise, but Iris succeeds. And in doing so, she also creates a powerful dynasty, beginning with her first born, Benzi Liangharad.

The Venus Collection Pamela Sargent, 2018-06-05 The Nebula Award-winning author's "masterful SF trilogy" is a multigenerational epic of human colonists terraforming the second planet from the sun (Publishers Weekly). Often compared to Kim Stanley Robinson's acclaimed Mars trilogy, the three novels gathered here comprise the complete Venus saga by the author of *The Shore of Women*, "one of the genre's best writers" (The Washington Post). The Venus Project—making the planet's atmosphere habitable for humans—spans centuries and determines the fates of multiple generations. *Venus of Dreams*: Iris Angharads, a determined, independent woman, sets herself one massive goal: to make the poison-filled atmosphere of Venus hospitable to humans. She works day and night to realize her dream, with only one person sharing her passion, Liang Chen. It seems impossible to make Venus, with its intolerable air and waterless environment, into a paradise, but Iris succeeds. And in doing so, she also creates a powerful dynasty, beginning with her first born, Benzi Liangharad. *Venus of Shadows*: The Venus Project calls upon the strongest and most courageous to create a prosperous world in the dismal wilderness of Venus. Those who demonstrate the skill and passion to embark on this adventure must transform the

barren planet in the midst of political and cultural unrest. When Risa and Benzi, children of Iris, find themselves in opposing forces on the battlefield, it is their love and perseverance that will determine the destiny of the new world. Child of Venus: Mahala Liangharad, a true child of Venus, conceived from the genetic material of the rebels and brought to birth only after their deaths, is seen as a beacon of hope in a colony still ravaged by the aftereffects of civil war. But her world is being torn apart by a drive for independence from Earth by the Venus colonists and rumors of a secret plan developed by the “Habbers,” cybernetically enhanced human dwellers of a mobile asteroid. A mysterious call from deep space offers Mahala a chance to fulfill her own destiny, along with the terrifying possibility of losing touch with everything she has ever known and loved.

Mankind Pamela D. Toler,2012-10-30 It takes more than 10 billion years to create just the right conditions on one planet for life to begin. It takes another three billion years of evolving life forms until it finally happens, a primate super species emerges: mankind. In conjunction with History Channel's hit television series by the same name, Mankind is a sweeping history of humans from the birth of the Earth and hunting antelope in Africa's Rift Valley to the present day with the completion of the Genome project and the birth of the seven billionth human. Like a Hollywood action movie, Mankind is a fast-moving, adventurous history of key events from each major historical epoch that directly affect us today such as the invention of iron, the beginning of Buddhism, the crucifixion of Jesus, the fall of Rome, the invention of the printing press, the Industrial Revolution, and the invention of the computer. With more than 300 color photographs and maps, Mankind is not only a visual overview of the broad story of civilization, but it also includes illustrated pop-out sidebars explaining distinctions between science and history, such as why there is 700 times more iron than bronze buried in the earth, why pepper is the only food we can taste with our skin, and how a wobble in the earth's axis helped bring down the Egyptian Empire. This is the most exciting and entertaining history of mankind ever produced.
