Guide to Standard Floras of the World David G. Frodin, 2001-06-14 This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century, and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions, with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras, and general principles and current trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations, and author and geographical indexes.

Early Child Care and Education in Finland

Kaarina Määttä, Satu Uusiautti, 2014-06-11 What is childhood like in Finland? What kind of practical solutions have been created and evaluated that aim at both providing good childhood experiences and

supporting children's positive development? What practices aim to prevent child exclusion from regular education and social experiences and to foster children's healthy development in emotional, social, and behavioural terms? This book considers the reality of childhood in Finland. It discusses the realisation and evaluation of early childhood education and addresses aspects of research and practice concerning children under the age of 10. It examines the growth and development of young children, how learning and teaching are organised, practices of rearing children and the state of child care in Finland. Contributors represent a variety of universities and sub disciplines in the science of education and focus on perspectives of children's well-being, special viewpoints of early childhood education, care, and research in Finland. This book was originally published as a special issue of Early Child Development and Care.

Investigations into the Meta-Communicative Lexicon of English Ulrich Busse, Axel Hübler, 2012-05-15 The volume contributes to historical pragmatics an important chapter on what has so far not been paid adequate attention to, i.e. historical metapragmatics. More particularly, the collected papers apply a meta-communicative approach to historical texts by focusing on lexis that either directly or metaphorically identifies or characterizes entire forms of communication or

single acts and act sequences or minor units. Within the context of their use, such lexical expressions, in fact, provide a key for disclosing historical forms of communication; taken out of context, they build the meta-communicative lexicon. The articles follow three principal distinctions in that they investigate the meta-communicative profile of genres, meta-communicative lexical sets and meta-communicative ethics and ideologies. They cover a broad spectrum of text types that span the entire history of the English language from Anglo-Saxon chronicles to computer-mediated communication.

Helsinki Neil Kent,2014-07-30 Helsinki is one of the world's most northerly capitals, but it is by no means a city frozen in northern wastes. Situated along the southern shore of the Gulf of Finland, magnificent lakes and forests reach into Helsinki's urban heart, a rare event in today's world of suburban sprawl. The city's natural beauty, emphasized by parks and islands, is matched by an extraordinary cultural richness, the result of fruitful foreign influences and home-grown creativity. The Finnish capital offers a spectacular display of architecture and design: from the neoclassical magnificence imposed by a Russian Czar to the modernist chic of Nordic functionalism. Neil Kent explores the history and culture of the Daughter of the Baltic, a small fishing village that became a powerhouse of design and technology. Tracing its dramatic past of

conflict and conflagration, he explores the evolution of a national, and urban, identity through architecture, art and writing. Through such differing cultural phenomena as saunas, railway stations and tango, he explains why Helsinki is a distinctive mix of tradition and innovation. • The city of architects and designers: Engel, Czar Alexander I and the creation of an imperial metropolis; Alvar Aalto and the birth of the modern; functionalism and high-tech innovation. • The city of music and the arts: Sibelius, the national composer; conductors and performers; art galleries and installations; National Romanticism and the Nordic aesthetic. • The city of hospitality: Art Nouveau hotels and cafes; sauna culture; famous visitors and refugees: Lenin and Hitler; multicultural Helsinki and a history of migration.

Maritime Security and the Law of the Sea Natalie Klein,2012-10-04 Maritime Security and the Law of the Sea examines the rights and duties of states across a broad spectrum of maritime security threats. It provides comprehensive coverage of the different dimensions of maritime security in order to assess how responses to maritime security concerns are, and should be, shaping the law of the sea. The discussion canvasses passage of military vessels and military activities at sea, law enforcement activities across the different maritime zones, information sharing and intelligence gathering, as well as armed conflict

and naval warfare. In doing so, this book not only addresses traditional security concerns for naval power but also examines responses to contemporary maritime security threats, such as terrorism, weapons of mass destruction, piracy, drug-trafficking, environmental damage and illegal fishing. While the protection of sovereignty and national interests remain fundamental to maritime security and the law of the sea, there is increasing acceptance of a common interest that exists among states when seeking to respond to a variety of modern maritime security threats. It is argued that security interests should be given greater scope in our understanding of the law of the sea in light of the changing dynamics of exclusive and inclusive claims to ocean use. More flexibility may be required in the interpretation and application of the UN Convention on the Law of the Sea if appropriate responses to ensure maritime security are to be allowed.

Industrial Parsing of Software Manuals
Sutcliffe, 2023-11-27 The task of language engineering is to develop the technology for building computer systems which can perform useful linguistic tasks such as machine assisted translation, text retrieval, message classification and document summarisation. Such systems often require the use of a parser which can extract specific types of grammatical data

from pre-defined classes of input text. There are many parsers already available for use in language engineering systems. However, many different linguistic formalisms and parsing algorithms are employed. Grammatical coverage varies, as does the nature of the syntactic information extracted. Direct comparison between systems is difficult because each is likely to have been evaluated using different test criteria. In this volume, eight different parsers are applied to the same task, that of analysing a set of sentences derived from software instruction manuals. Each parser is presented in a separate chapter. Evaluation of performance is carried out using a standard set of criteria with the results being presented in a set of tables which have the same format for each system. Three additional chapters provide further analysis of the results as well as discussing possible approaches to the standardisation of parse tree data. Five parse trees are provided for each system in an appendix, allowing further direct comparison between systems by the reader. The book will be of interest to students, researchers and practitioners in the areas of computational linguistics, computer science, information retrieval, language engineering, linguistics and machine assisted translation.

Consequences of Maritime Critical Infrastructure Accidents Magdalena Bogalecka, 2019-11-01

Consequences of Maritime Critical Infrastructures Accidents presents a probabilistic general model of critical infrastructure accident consequences. This include three models of the process of the events generated by a critical infrastructure accident, the process of the environment threats and the process of environment degradation. This is all created and adopted to the maritime transport critical infrastructure, with a focus on shipping networks applied to accident consequences modeling. Consequences of Maritime Critical Infrastructures Accidents is devoted to the assessment methods of consequences of environmental damages, with application to ship accidents. It is a new approach that has never been proposed and applied before and includes methods of modeling, identification, prediction and optimization to allow the reader to better understand the effects of these accidents on our oceans. Moreover, the general procedures and the new strategy presented in the book aim to lower environment losses concerned with chemical releases caused by an accident of ship critical infrastructure network operating within the Baltic Sea or world sea waters. Provides a complete approach to accident consequences modeling, identification, prediction and optimization Presents the theoretical background, which can be applied practically to maritime critical infrastructure accident consequences analysis Includes a general model for critical infrastructure accident consequences which is globally applicable and with wide applications in various industrial sectors

The Cold War Spy Pocket Manual Philip

Parker, 2015-10-19 Some twenty-five years after its conclusion, yet with its echoes resonating once more in contemporary East-West relations, the rigors and detail of many aspects of the Cold War are becoming increasingly of interest.

Furthermore, at the very same time many of the records of the period are beginning to become accessible for the first time. At the forefront of this unique conflict, that divided the world into two opposing camps for over four decades, were the security services and the agents of these secretive organizations. The Cold War Pocket Manual presents a meticulously compiled selection of recently unclassified documents, field-manuals, briefing directives and intelligence primers that uncover the training and techniques required to function as a spy in the darkest periods of modern history. Material has been researched from the CIA, MI5 and MI6, the KGB, the STASI as well as from the Middle East security services and on into China and the East. As insightful as any drama these documents detail, amongst many other things, the directives that informed nuclear espionage, assassinations, interrogations and the turning of agents and impacted upon the Suez Crisis, the Hungarian Uprising, the Cambridge Five and the

most tellingly the Cuban Missile Crisis in 1962. ¥ Full introduction and commentary provided by leading historian and former diplomat Philip Parker. ¥ Complete with a catalogue of, and often instructions for, genuine espionage devices including lock decoders, bugging equipment, a 4.5mm single-shot lipstick gun, microfilm concealing coins and cameras mounted in clothing or pens and shoe-concealed tracking devices. ¥ Presents for the first time the insightful documents, many of which inspired Cold War novelists including John Le Carré, Len Deighton and Ian Fleming, and many of which they would never have seen.
