Advances in Network-Based Information Systems Leonard Barolli, Hiroyoshi Miwa, Tomoya Enokido, 2022-08-11 The networks and information systems of today are evolving rapidly. There are new trends and applications in information networking such as wireless sensor networks, ad hoc networks, peer-to-peer systems, vehicular networks, opportunistic networks, grid and cloud computing, pervasive and ubiquitous computing, multimedia systems, security, multi-agent systems, high-speed networks, and web-based systems. These kinds of networks need to manage the increasing number of users, provide support for different services, guarantee the QoS, and optimize the network resources. For these networks, there are many research issues and challenges that should be considered and find solutions. The aim of the book "Advances in Network-Based Information Systems" is to provide latest research findings, innovative research results, methods, and development techniques from both theoretical and practical

perspectives related to the emerging areas of information networking and their applications.
