Quality Assurance in Higher Education in Eastern and Southern Africa Peter Neema-Abooki,2021-08-23 This book examines the critical aspect of quality assurance maintenance of competitive-standards in African higher education. It explores both the micro and macro-levels of continental African higher education regulatory authorities, and analyses different institutional, regional and national practices for moving towards continental quality assurance approaches. Contributed to by scholars across Eastern and Southern Africa, the book considers conceptual, practical, epistemological and policy dimensions of quality and quality assurance, especially in relation to higher education in Africa. It therefore draws on research and local expertise to open up debate about how to assure and enhance the quality of higher education, providing a comprehensive review of eight countries and considers societal challenges. It aims to satisfy the need of more thoughtful and critical works on African education as produced by African educators. The uniqueness of this book lies in integrating both the theoretical and practical dimensions of quality to devise appropriate strategies for ensuring quality and standards in higher education in continental Africa and beyond. This authoritative book advocates for a timely discussion around the provision of good quality higher education and research in African

universities, and will be of great interest to academics, policy makers, researchers and post-graduate students in the fields of higher education, comparative education and African studies.

Diversity Across the Disciplines Audrey J. Murrell,Jennifer L. Petrie-Wyman,Abdesalam Soudi,2019-12-01 Diversity research and scholarship has evolved over the past several decades and is now reaching a critical juncture. While the scholarship on diversity and inclusion has advanced within various disciplines and subdisciplines, there have been limited conversations and collaborations across distinct areas of research. Theories, paradigms, research models and methodologies have evolved but continue to remain locked within specific area, disciplines, or theoretical canons. This collaborative edited volume examines diversity across disciplines in higher education. Our book brings together contributions from the arts, sciences, and professional fields. In order to advance diversity and inclusion across campuses, multiple disciplinary perspectives need to be acknowledged and considered broadly. The current higher education climate necessitates multicultural and interdisciplinary collaboration. Global partnerships and technological advances require faculty, administrators, and graduate students to reach beyond their disciplinary focus to achieve successful programs and research projects. We need to become more familiar discussing diversity across disciplines. Our book investigates diversity across disciplines with attention to people, process, policies, and paradigms. The four thematic categories of people,

process, policies, and paradigms describe the multidisciplinary nature of diversity and topics relevant to faculty, administrators, and students in higher education. The framework provides a structure to understand the ways in which people are impacted by diversity and the complicated process of engaging with diversity in a variety of contexts. Policies draw attention to the dynamic nature of diversity across disciplines and paradigms presents models of diversity in research and education.
