EU Competition Law applicable to liner shipping and seaports Philippe Corruble,2021-03-04 In twenty years, the globalization of trade has led to a change in scale that has upset the balance of power between the players in online containerized maritime transport and the logistics chain passing through European seaports. Three global shipping alliances dominate 90% of online containerized maritime transport, while further integrating port activities. Twelve Asian ports, eight of which are Chinese, are now among the top fifteen in the world. At the same time, Chinese interests, supported by public authorities and resources, are taking control of terminals and port companies in Europe, as part of the geopolitical project of the New Silk Roads. This economic and industrial context is emblematic of the challenges facing European competition law, which has so far accompanied rather than controlled these transformations. European competition rules will have to be mobilized in a global context, alongside the new rules on the control of foreign direct investment. This study takes stock of the new regulatory challenges in this sector of prime importance for the Union.

Decline of the Corporate Community Eelke M. Heemskerk,2007 Traditionally, much of big business in the industrialized Western world has been organized around particular corporate societies—notoriously referred to as “old boy” networks. With the recent drift toward a more liberal market economy,

however, these networks have been showing signs of decline—in some cases, all but disappearing. Eelke M. Heemskerk combines formal network analysis and interviews with key members of the corporate elite in order to examine how this decline has affected Dutch capitalism. Even in a liberal market economy, however, corporate directors need social networks to communicate and coordinate their strategic decisions, and Decline of the Corporate Community considers the shift of the corporate elite to the new private and informal circles where networking takes place.

Corporate Governance Sabri Boubaker, Bang Dang Nguyen, Duc Khuong Nguyen, 2012-12-18 The current crisis has rocked the financial system worldwide and has cast doubt on the effectiveness of the existing regulatory regime. Thousands of firms have gone bankrupt and many financial institutions were bailed out by governments. The effects of the crisis have shaken emerging and developing markets alike and have not spared neither small nor large businesses. Many scholars and practitioners attribute the roots of the crisis to failures and weaknesses in the way corporate governance has been practiced since the mid-1990s. Lax board oversight of top management, short-termism and self-interested behavior have been fingered as the culprits behind recent financial turmoil. This book highlights the recent developments and new trends in corporate governance. The eighteen chapters, written by leading academics and experts, can assist corporate executives, governance

bodies, investors, market regulators, and policymakers in having a global picture of major corporate governance issues. Financing European Transport Infrastructure S. Farrell, 1999-02-08 Financing European Transport Infrastructure examines organisational arrangements for planning and financing transport infrastructure in Western Europe. It covers all modes of transport - road, rail, sea, air, urban, and inland waterways - and asks why their financing arrangements are so different. It looks at the division of responsibilities between central and local government, and the growing role of autonomous public bodies, the European Commission and private finance. It examines the consequences of investment failing to keep up with demand - in congestion, environmental damage and slower growth - and the impact of new approaches, including public-private partnerships.

The Coal Industry Charles Kernot, 2000-07-31 The size and global reach of the coal industry is unparalleled in the mining sector. Almost 500 million tonnes of coal are shipped annually around the world at a traded value of around US\$15bn, but the total amount of coal mined each year amounts to some 3.8 billion tonnes. This puts the total value of annual production at around US\$100bn - far higher than the next most important mined commodity,

aluminium. The Coal Industry provides an in-depth overview of the international coal trade at the turn of the millennium. In 330 pages of clearly presented information, analysis and statistics, it brings the industry into sharp focus – from productivity and power plants to growth prospects and global warming. Detailed data, authoritative analysis Read this guide and find out about: How the coal industry has developed from its earliest beginnings How the latest processing treatments are creating a wider market for coal The factors which will guide coal markets over the next decade How concerns over greenhouse gas and nuclear energy could have a positive effect on coal demand The recent growth in supply from Colombia, Indonesia and Venezuela and the changing structure of the European industry The activities of the major producers and their chances for improved profitability The environmental impact of coal and how it can be reduced The Coal Industry is essential reading for industry executives, the financial community and government policy-makers, as well as providing an excellent introduction and training resource for new entrants to the industry. A comprehensive guide to the workings of the international coal industry Written by a world-renowned mining analyst Examines future trends in demand, trade and pricing
