Global Financial Development Report 2015/2016 The World Bank,2015-08-31
Global Financial Development Report 2015/2016 focuses on the ability of financial systems to sustainably extend the maturity of financial contracts for private agents. The challenges of extending the maturity structure of finance are often considered to be at the core of effective, sustainable financial development. Sustainably extending long-term finance may contribute to the objectives of higher growth and welfare, shared prosperity and stability in two ways: by reducing rollover risks for borrowers, thereby lengthening the horizon of investments; and by increasing the availability of long-term financial instruments, thereby allowing households to address their lifecycle challenges. The aim of the report is to contribute to the global policy debate on long-term finance. It builds upon findings from recent and ongoing research, lessons from operational work, as well as on inputs from

financial sector professionals and researchers both within and outside the World Bank Group. Benefitting from new worldwide datasets and information on financial development, it will provide a broad and balanced review of the evidence and distill pragmatic lessons on long-term finance and related policies. This report, the third in the Global Financial Development Report series, follows the second issue on Financial Inclusion and the inaugural issue, Rethinking the Role of the State in Finance. The Global Financial Development Report 2015/2016 will be accompanied by a website worldbank.org/financialdevelopment containing extensive datasets, research papers, and other background materials as well as interactive features.

Financing Urban Shelter Un-Habitat,2013-06-17 'Achieving the goals set by world leaders in the United Nations Millennium Declaration will be difficult without a significant improvement in the lives of slum dwellers, and the lives of slum dwellers cannot be improved without the sound and sustainable

economic development that is conducive to the establishment of a strong shelter sector. As Financing Urban Shelter: Global Report on Human Settlements 2005 emphasizes, one of the key challenges in meeting the Millennium Declaration Goal on slums is mobilization of the financial resources necessary for both slum upgrading and slum prevention by supplying new housing affordable to lower income groups on a large scale. . . . It is my hope that, by highlighting the impacts of current shelter financing systems on low-income households and by identifying the types of financing mechanisms that appear to have worked for them, this report will contribute to the efforts of the wide range of actors involved in improving the lives of slum dwellers, including governments at the central and local levels, as well as non-governmental and international organizations.' From the Foreword by KOFI ANNAN, Secretary-General, United Nations Financing Urban Shelter presents the first global assessment of housing finance systems, placing shelter and urban development challenges within the overall context of macroeconomic policies. The report describes and analyses housing finance conditions and trends in all regions of the world, including formal housing finance mechanisms, microfinance and community funding, highlighting their relevance to the upgrading of slums. Recent shelter finance policy development is discussed at the international and national levels, and the directions that could be taken to strengthen shelter finance systems are examined. The Global Report on Human Settlements is the most authoritative

and up-to-date assessment of conditions and trends in the world's cities. It is an essential tool and reference for researchers, academics, public authorities and civil society organizations around the world. The preceding issues of the Global Report on Human Settlements have addressed such topics as An Urbanizing World, Cities in a Globalizing World and The Challenge of Slums. Published with UN-HABITAT

Living Downtown Paul Groth, 1999-01-01 From the palace hotels of the elite to cheap lodging houses, residential hotels have been an element of American urban life for nearly two hundred years. Since 1870, however, they have been the target of an official war led by people whose concept of home does not include the hotel. Do these residences constitute an essential housing resource, or are they, as charged, a public nuisance? Living Downtown, the first comprehensive social and cultural history of life in American residential hotels, adds a much-needed historical perspective to this ongoing debate. Creatively combining evidence from biographies, buildings and urban neighborhoods, workplace records, and housing policies, Paul Groth provides a definitive analysis of life in four price-differentiated types of downtown residence. He demonstrates that these hotels have played a valuable socioeconomic role as home to both long-term residents and temporary

laborers. Also, the convenience of hotels has made them the residence of choice for a surprising number of Americans, from hobo author Boxcar Bertha to Calvin Coolidge. Groth examines the social and cultural objections to hotel households and the increasing efforts to eliminate them, which have led to the seemingly irrational destruction of millions of such housing units since 1960. He argues convincingly that these efforts have been a leading contributor to urban homelessness. This highly original and timely work aims to expand the concept of the American home and to recast accepted notions about the relationships among urban life, architecture, and the public management of residential environments.

Implementing the Four Levels Donald L. Kirkpatrick, James D. Kirkpatrick, 2007-10-08 In this indispensable companion to the classic book *Evaluating Training Programs: The Four Levels*, Donald and James Kirkpatrick draw on their decades of collective experience to offer practical guidance for putting any or all of the Four Levels into practice. In addition, they offer a comprehensive list of the ten requirements for an effective training program and show how to decide what to evaluate, how to get managers to support the evaluation process, and how to use the Four Levels to construct a compelling chain of evidence demonstrating the contribution of training to

the bottom line.

Cooperatives, Economic Democratization and Rural Development Jos Bijman, Roldan Muradian, Jur Schuurman, 2016-01-29 Agricultural cooperatives and producer organizations are institutional innovations which have the potential to reduce poverty and improve food security. This book presents a raft of international case studies, from developing and transition countries, to analyse the internal and external challenges that these complex organizations face and the solutions that they have developed. The contributors provide an increased understanding of the transformation of traditional community organizations into modern farmer-owned businesses. They cover issues including: the impact on rural development and inclusiveness, the role of social capital, formal versus informal organizations, democratic participation and member relations, and their role in value chains. Students and scholars will find the book's multidisciplinary approach useful in their research. It will also be of interest to policy-makers seeking to understand the wide diversity of organizational forms and functions. NGOs, donors and governments seeking to support rural developments will benefit from the discussions raised in this book.

Dynamic Process Modeling, 2013-10-02 Inspired by the leading authority in the field, the Centre for Process Systems Engineering at Imperial College London, this book includes theoretical developments, algorithms, methodologies and tools in process systems engineering and applications from

the chemical, energy, molecular, biomedical and other areas. It spans a whole range of length scales seen in manufacturing industries, from molecular and nanoscale phenomena to enterprise-wide optimization and control. As such, this will appeal to a broad readership, since the topic applies not only to all technical processes but also due to the interdisciplinary expertise required to solve the challenge. The ultimate reference work for years to come.
