Porsche 901 Jürgen Lewandowski,2013 The transition from the 356 to the 901 has never before been documented as precisely as this - it is the purpose of this book to shed more light on this exceptional period, to describe the genesis of the 901. It goes to the very heart of the Porsche brand - to the creation of the 901, which rapidly transformed into the 911. Anti-Proverbs in Five Languages Anna T. Litovkina,Hrisztalina Hrisztova-Gotthardt,Péter Barta,Katalin Vargha,Wolfgang Mieder,2022-01-31 This book is the first comparative study of English, German, French, Russian and Hungarian anti-proverbs based on well-known proverbs. Proverbs are by no means fossilized texts but are adaptable to different times and changed values. While anti-proverbs can be considered as variants of older proverbs, they can also become new proverbs reflecting a more modern worldview. Anti-proverbs are therefore a lingo-cultural phenomenon that deserves the attention of cultural and literary historians, folklorists, linguists, and general readers interested in language and wordplay.

Superman Mark Millar, Dave Johnson, Kilian Plunkett, 2009 Strange visitor from another world who can change the course of mighty rivers, bend steel in his bare hands... and who, as the champion of the common worker, fights a never-ending battle for Stalin, Socialism and the international expansion of the Warsaw Pact. In this startling twist of a familiar tale, a certain Kryptonian rocketship crash-lands on Earth carrying an infant who will one day become the most powerful being on the planet. But his ship doesn't land in America. He is not raised in Smallville, Kansas. Instead, he makes his new home on a collective in the Soviet Union! From the mind of Mark Millar, the best-selling writer of THE AUTHORITY and Wanted, comes this strangely different take on the Superman mythos. Featuring art by Dave Johnson, Kilian Plunkett, Andrew Robinson, and Walden Wong, with an introduction by film producer Tom DeSanto (X-Men, X2: X-Men United, Transformers), this Deluxe Edition also features an extensive sketch gallery by Johnson, Plunkett and Alex Ross.

Mind Technologies Raymond George Siemens, David Moorman, 2006 The computer-assisted tools, methodologies and structures through which those in the arts and humanities pursue their disciplines - the humanities 'mind technologies' - have come increasingly to the forefront in recent years. Arising in part from recent meetings between the Consortium for Computing in the Humanities (COCH/COSH) and the Social Sciences and Humanities Research Council of Canada (SSHRC), the volume is the first to document the internationally significant work of the Canadian academic community in this area. Addressing issues of funding, research and innovation, these articles focus.

Wild Animals in Circuses Great Britain: Department for Environment, Food and Rural Affairs, 2013-04-16 The British circus industry dates back over two centuries and for many years wild animals were an integral part of the circus experience. In modern times the plight of animals has become a concern and today the view of the public as well as bodies such as the RSPCA is that travelling circuses are no place for wild animals, and the Government proposes primary legislation as set out in the draft Bill in this document. This legislation will end the use of wild animals in travelling circuses in this country and help ensure the nation's international reputation as a leading protector of animals continues into a new global era. As the process of introducing primary legislation is necessarily a long one the Government has already introduced the Welfare of Wild Animals in Travelling Circuses (England) Regulations 2012 which came into force on 20 January 2013. These Regulations will protect wild animals which stay in circuses in the short term. Two circuses so far have been licensed. However when it comes into force the ban in this draft Bill will supersede the Regulations.

The Porsche 911 Book Jürgen Lewandowski, 2018 The introduction of the Porsche 901 in 1963 marked a milestone in automotive history. Although the name later had to be changed because Peugeot had patented having a 0 in the middle of car model numbers, the 911 didn't let anything stand in the way of its becoming an iconic sports car. This success story spans all the way from the 901 and the Carrera RS 2.7 (which with its characteristic rear spoiler--the so-called ducktail--was the fastest production car of its time) right up to the current generation of the 991. For the 50th birthday of the populous 911 family, the famous automotive photographer Rene Staud, whose *The Mercedes-Benz 300 SL Book* has also been published by teNeues, showcases the most important models--all in his typically radiant and distinctive style.
