Baldy,Linda M Baldy Mph,Centers for Disease Control and Prevention,2013-11 The Manual for the Surveillance of Vaccine-Preventable Diseases, updated through 2013, provides current guidelines for those directly involved in surveillance of vaccine-preventable diseases, especially personnel at the local health departments. For each of the vaccine-preventable diseases, this manual includes a chapter describing the importance of rapid case identification; the importance of surveillance; disease reduction goals; case definitions (including clinical description and case classifications); epidemiologically important data to be collected during case investigation; activities for enhancing surveillance; activities for case investigation; and activities for outbreak control. Other chapters include information on surveillance indicators; surveillance data analyses; reporting adverse events following vaccination; and enhancing surveillance. In addition, the manual includes a section reserved for insertion of state-specific guidance for VPD surveillance and extensive appendices. This manual was first developed in 1996 to provide general guidance to state and local health department personnel who are involved in surveillance activities for vaccine-preventable diseases. This manual answers commonly asked questions regarding the surveillance and reporting of vaccine-preventable diseases and provides information on enhancing existing surveillance systems.

Immune Response to Hib Conjugate Vaccine in Infants Ediamu Tom Didimus,2012-05 Invasive disease due to Haemophilus influenzae typeb (Hib) is common in both HIV infected and un-infected children and immunisation with Hib conjugate vaccines is recommended. However, a few studies done showed that HIV infection blunts antibody response to childhood vaccines. The main objective of this study was to assess the ability of both HIV infected and un-infected Ugandan infants seen at Mulago hospital to mount protective antibody responses and highlight some of the factors that affect response. 159 infants were recruited; 8 were lost to follow up. Of the 151 analyzed, 53 were HIV infected and 98 un-infected. The serum antibody responses were determined by ELISA just before the 3rd dose and a minimum of one month after the dose. 81.6% of the HIV un-infected and 56.6% of the HIV infected achieved protective antibodies after the 3rd dose. 3 doses were better than 2 for both groups. Independent predictors for inadequate antibody response were HIV infection and splenomegally in an HIV infected infant Vitamin A had a potentiating effect on response in infants above 6 months. The study results formed a basis for evaluating the efficacy of the Hib conjugate vaccine in the country.

Vaccine: The Controversial Story of Medicine's Greatest Lifesaver Arthur Allen,2008-05-17 A timely, fair-minded and crisply written account.—New York Times Book Review Vaccine juxtaposes the stories of brilliant scientists with the industry's struggle to produce safe, effective, and profitable vaccines. It focuses on the role of military and medical authority in the introduction of vaccines and looks at why some parents have resisted this authority. Political and social intrigue have often accompanied vaccination—from the divisive introduction of smallpox inoculation in colonial Boston to the 9,000 lawsuits recently filed by parents convinced that vaccines caused their children's autism. With narrative grace and investigative journalism, Arthur Allen reveals a history illuminated by hope and shrouded by controversy, and he sheds new light on changing notions of health, risk, and the common good.

Human Emerging and Re-emerging Infections Sunit Kumar Singh,2015-11-09 Emerging and re-emerging pathogens pose several challenges to diagnosis, treatment, and public health surveillance, primarily because pathogen identification is a difficult and time-consuming process due to the “novel” nature of the agent. Proper identification requires a wide array of techniques, but the significance of these diagnostics is anticipated to increase with advances in newer molecular and nanobiotechnological interventions and health information technology. Human Emerging and Re-emerging Infections covers the epidemiology, pathogenesis, diagnostics, clinical features, and public health risks posed by new viral and microbial infections. The book includes detailed coverage on the molecular mechanisms of pathogenesis, development of various diagnostic tools, diagnostic assays and their limitations, key research priorities, and new technologies in infection diagnostics. Volume 1 addresses viral and parasitic infections, while volume 2 delves into bacterial and mycotic infections. Human Emerging and Re-emerging Infections is an invaluable resource for researchers in parasitologists, microbiology, Immunology, neurology and virology, as well as clinicians and students interested in understanding the current knowledge and future directions of infectious diseases.

Other Side of Silence Far Side of Time Sculpture Hib Sabin H. Sabin,2019 Hib Sabin's wood sculpture is focused mainly on animal imagery - raven, owl, bear, coyote, mountain lion and hawk - as it relates to human nature and the human condition. The roots of his sculpture are to be found in Shamanism, the mythologies of world cultures and more recently in modern poetry and philosophical movements such as Existentialism. The subject matter of his early carvings are of Shamanic ritual implements: healing wands, soul retrievers, talking sticks, dancing sticks and especially masks. Gradually, after extensive travels across the globe, he began to explore a number of the world's rich mythologies and his subject matter moving beyond the realms of Shamanism, but always using the prism of animal imagery. Since 2008, his inspiration has come from many sources, including European Existentialist theory, and modern poets such as Leonard Cohen, Ted Hughes, T.S. Eliot, Robert Frost and Dylan Thomas. The structure of the book is broken down into three segments: the exploration of Hib's roots in Shamanism; the expansion of his vision into a larger more global mythic universe; and an analysis of the themes that have driven his creative process in recent years.
