Digital Gastronomy: From 3d Food Printing To Personalized Nutrition Chee Kai Chua,Wai Yee Yeong,Hong Wei Tan,Yi Zhang,U-xuan Tan,Chen Huei Leo,Michinao Hashimoto,Gladys Hooi Chuan Wong,Justin Jia Yao Tan,Aakanksha Pant,2022-08-05 The food industry has seen many changes over the last several decades — new technologies have been introduced into the way we cook, manufacture, and present food products to consumers. Digital gastronomy, which combines new computational abilities such as three-dimensional (3D) printing with traditional food preparation, has allowed consumers to design and manufacture food with personalized shapes, colours, textures, and even nutrition. In addition to the personalization of food, 3D printing of food has other advantages such as promoting automation in food preparation and food sustainability through 3D-printed cell-based meats and alternative proteins. Entire meals can be constructed just by 3D food printing alone. In this textbook, the background, principles, commercial food printers, materials, regulations, business development, as well as the emerging technologies and future outlook of 3D food printing are explored. In terms of 3D-printed materials, four main classes are reviewed: namely, desserts / snacks (comprising dairy products, chocolate, sugars, and dough), fruits / vegetables, meats /alternative proteins, and pharmaceuticals / nutraceuticals. This textbook has been written to offer readers keen to learn more about 3D food printing in terms of concepts, processes, applications, and developments of 3D food printing. No prior knowledge is required. At the end of each chapter, a set of problems offers undergraduate and postgraduate students practice on the main ideas discussed within the chapter. For tertiary-level lecturers and university professors, the topic on 3D food printing can be associated to other subjects in food and nutrition, pharmaceutical and nutraceutical sciences, and food engineering. Do we know where it comes from? This is more than just another book on leadership. Inside, we journey through many different leadership styles, theories, and approaches to see which of these we possess and how to improve them. More than this, however, we will see where each style is found in the Bible so we can learn from God-inspired leaders.

Drama and Digital Arts Cultures David Cameron,Rebecca Wotzko,Michael Anderson,2017-06-29 Drama and Digital Arts Cultures is a critical guide to the new forms of playful exploration, co-creativity, and improvised performance made possible by digital networked media. Drawing on examples from games, education, online media, technology-enabled performance and the creative industries, the book uses the elements of applied drama to frame our understanding of digital cultures. Exploring the connected real-world and virtual spaces where young people are making and sharing digital content, it draws attention to the fundamental applied drama conventions that infuse and activate this networked culture. Challenging descriptions of drama and digital technology as binary opposites, the book maps common principles and practice grounded in role, embodiment, performance, play, and identity that are being amplified and enhanced by the affordances of online media. Drama and Digital Arts Cultures draws

together extensive original research including interviews with game designers, media producers, educators, artists and makers at the heart of these new digital cultures. Young people discuss their own creative practices and products, providing insight into a complex and evolving world being transformed by digital technologies. A practical guide to the field, it contains case studies and examples of the intersections of drama conventions and networked cultures drawn from the US, Canada, UK, Netherlands, Singapore and Australia. Written for scholars, educators, students and 'makers' everywhere, Drama and Digital Arts Cultures provides a clear understanding of how young people are blending creativity and learning with the powerful and empowering conventions of drama to create new forms of multimodal and transmedia storytelling.
