The Professor Is In Karen Kelsky, 2015-08-04 The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

**The Academic Job Search Handbook** Julia Miller Vick, Jennifer S. Furlong, Rosanne Lurie, 2016-02-22 The Academic Job Search Handbook is the comprehensive guide to finding a faculty position in any discipline. Building on the groundbreaking success and unique offerings of earlier volumes, the fifth edition presents insightful new content on aspects of the search at all stages. Beginning with an overview of academic careers and institutional structures, it moves step by step through the application process, from establishing relationships with advisors, positioning oneself in the market, learning about job openings, preparing CVs, cover letters, and other application materials, to negotiating offers. Of great value are the sixty new sample documents from a diverse spectrum of successful applicants. The handbook includes a search timetable, appendices of career resources, and a full sample application package. This fifth edition features new or updated sections on issues of current interest, such as job search concerns for pregnant or international candidates, the use of social media strategies to address CV gaps, and difficulties faced by dual-career couples. The chapter on alternatives to faculty jobs has been expanded and presents sample résumés of PhDs who found nonfaculty positions. For more than twenty years, The Academic Job Search Handbook has assisted job seekers in all academic disciplines in the search for faculty positions at different kinds of institutions from research-focused universities to community colleges. Current faculty who used the book themselves recommend it to their own students and postdocs. The many new first-person narratives provide insight into issues and situations candidates may encounter such as applying for an international job, combining parenting with an academic career, going from an administrative job to a faculty position, and seeking faculty positions as a same-sex couple.

A Good Job George S. McClellan, Kristina L. Creager, Marianna Savoca, 2023-07-03 For many students, working while in college is a defining characteristic of the undergraduate experience. However, student workers often view campus employment as a money-making opportunity rather than a chance for personal development. Likewise, institutions often neglect to consider campus jobs as a means to education and student engagement. It is the distinction between work for remuneration and work for personal development which shapes much of the discussion of student employment throughout A Good Job. This book makes the case for campus employment as a high-impact practice in higher education and provides models for institutional efforts to implement new student employment strategies. Carefully designed campus employment opportunities can have numerous benefits, including career exploration and preparation, learning, and increased engagement leading to increased retention. The authors make the case that employment can and should be a purposeful and powerful component in any higher education institution's efforts to support student learning, development, and success. This book is an excellent resource for anyone interested in capitalizing on the developmental and learning potential of student employment on campus.

Job Search In Academe Dawn M. Formo, Cheryl Reed, 2023-07-03 Building on the success of the first, this new edition has been updated to cover the latest hiring trends, changing economic circumstances, and feedback from readers. The authors have expanded the book to deal with issues faced by minority candidates, and have added contributions from scientists to cover such issues as negotiating faculty contracts to ensure adequate lab space and resources. They give more emphasis to applying for non-academic jobs and offer case study scenarios of candidates who have followed both academic and non academic paths. The authors urge readers to go develop a philosophy statement for research and service, as well as for teaching. They explain what's involved in applying for joint positions, offer advice on applying for administrative jobs outside the academy, and prepare the reader for first year academic and corporate performance reviews. They have updated the resources, references, examples and scenarios. This book covers the process for Master's- and Ph.D.-level job-seekers of all disciplines: from identifying sources of information about positions, to advising on the preparation of effective CVs and portfolios, through guidance on the process of interview to final negotiation of terms. Its invaluable advice is informed by the authors' experiences in both academic and corporate arenas, as well as by the narratives of current and recent job seekers. The authors cover the full spectrum of potential positions—adjunct, visiting, temporary and tenure-track faculty appointments—at-year and 2-year institutions. This book includes sample application letters and vitae, a model for job search workshop, and a rich list of resources both in print and on-line. An accompanying Web site offers a wealth of information on locating job postings, complete with hot links to major sites, both general and discipline-specific; presents eight sample application packets by successful humanities, social sciences, and sciences candidates, with accompanying comments on key features by the book's authors; and an extensive listing of useful books and online resources. While being realistic about the trends in higher education, the decline in tenure-track positions, and greater competition for available positions, the authors actively combat the gloom and doom approach of competing books by emphasizing that readers have it in their power to adopt strategies, and take actions and choices, that can greatly improve their chances of success. The authors aim to help candidates see what they already have and how to get that across as clearly as possible to potential hiring committees. Contact the Authors: Share your story! We hope to continue collecting timely narratives to keep Job Search useful, and we welcome your e-mails. Dawn can be reached at dformo@csusm.edu and Cheryl at drcreed@catsforchange.org. **Choosing College** Michael B. Horn, Bob Moesta, 2019-09-11 Cut through the noise and make better college and career choices This book is about addressing the college-

choosing problem. The rankings, metrics, analytics, college visits, and advice that we use today to help us make these decisions are out of step with the progress individual students are trying to make. They don't give students and families the information and context they need to make such a high-stakes decision about whether and where to get an education. Choosing College strips away the noise to help you understand why you're going to school. What's driving you? What are you trying to accomplish? Once you know why, the book will help you make better choices. The research in this book illustrates that choosing a school is complicated. By constructing more than 200 mini-documentaries of how students chose different postsecondary educational experiences, the authors explore the motivations for how and why people make the decisions that they do at a much deeper, causal level. By the end, you'll know why you're going and what you're really chasing. The book: Identifies the five different Jobs for which students hire postsecondary education Allows you to see your true options for what's next Offers guidance for how to successfully choose your pathway Illuminates how colleges and entrepreneurs can build better experiences for each Job The authors help readers understand not what job students want out of college, but what Job students are hiring college to do for them.

**Putting the Humanities PhD to Work** Katina L. Rogers, 2020-08-07 In *Putting the Humanities PhD to Work* Katina L. Rogers grounds practical career advice in a nuanced consideration of the current landscape of the academic workforce. Drawing on surveys, interviews, and personal experience, Rogers explores the evolving rhetoric and practices regarding career preparation and how those changes intersect with admissions practices, scholarly reward structures, and academic labor practices—especially the increasing reliance on contingent labor. Rogers invites readers to consider how graduate training can lead to meaningful and significant careers beyond the academy. She provides graduate students with context and analysis to inform the ways they discern their own potential career paths while taking an activist perspective that moves toward individual success and systemic change. For those in positions to make decisions in humanities departments or programs, Rogers outlines the circumstances and pressures that students face and gives examples of programmatic reform that address career matters in structural ways. Throughout, Rogers highlights the important possibility that different kinds of careers offer engaging, fulfilling, and even unexpected pathways for students who seek them out.

**The Academic Job Search Handbook** Julia Miller Vick, Jennifer S. Furlong, 2013-06-12 For more than 15 years, The Academic Job Search Handbook has assisted job seekers in all academic disciplines in their search for faculty positions. The guide includes information on aspects of the search that are common to all levels, with invaluable tips for those seeking their first or second faculty position. This new edition provides updated advice and addresses hot topics in the competitive job market of today, including the challenges faced by dual-career couples, job search issues for pregnant candidates, and advice on how to deal with gaps in a CV. The chapter on alternatives to academic jobs has been expanded, and sample resumes from individuals seeking nonfaculty positions are included. The book begins with an overview of the hiring process and a timetable for applying for academic positions. It then gives detailed information on application materials, interviewing,

negotiating job offers, and starting the new job. Guidance throughout is aimed at all candidates, with frequent reference to the specifics of job searches in scientific and technical fields as well as those in the humanities and social sciences. **The Two-Body Problem** Lisa Wolf-Wendel,Susan B. Twombly,Suzanne Rice,2004-12-01 Approximately eight of every ten academics have spouses or partners who are working professionals, and almost half of these partners are academics as well. In fact, dual-career academic couples are so prevalent that the two-body problem has become a common way of referring to the situation. Increasingly, intense competition to hire the best faculty forces institutions to assist dual-career couples in finding suitable employment for the accompanying spouse or partner. The authors of The Two-Body Problem examine policies and practices used by colleges and universities to respond to the needs of dual-career couples within the economic, legal, and demographic contexts of higher education. Using data from an extensive survey of public and private universities as well as in-depth case studies of institutions representing distinctive approaches to this problem, the authors find that the type of institution—its location, size, governance, mission, and resource availability—is a critical factor in determining dual-career employment options. The Two-Body Problem describes various accommodation models in depth and provides valuable information for college and university administrators responsible for hiring faculty and supporting their performance.
