Surviving in the Hi-Tech World - Memoirs of a life in computers Ernie Dainow,2024-05-01 Surviving in the Hi-Tech World follows the many ups and downs of my years as a software developer in the high-tech industry, starting in the mainframe era. It provides a window into what it is like to work in the computer field. I worked for many different organizations, from academia and large companies to medium sized companies and several startups. The stories weave my work experience with explanations of the technology of the period. In the process it follows the revolutionary changes in computer hardware and software from large mainframes to personal microcomputers and the evolution of early networks into the global Internet. When I was a psychology student in university, I became interested in the possibilities of using computers to model and understand human thinking. I completed a Master's degree in Artificial Intelligence in Computer Science in 1970, but my interest in doing academic research shifted to an interest in building real world systems. My first job in computers was with Univac, the company that had

built one of the first general purpose commercial computers. I switched jobs for many different reasons – sometimes because of interest and at other times because of necessity. Each chapter in the book covers the different jobs and places that I worked. My journey took me from Montreal to London, Glasgow, Wisconsin, Vancouver and Toronto. Each job has its own story as I progressed through a series of adventures. There are stories of people who became multi-millionaires and one who went to jail.

Schaffer also discusses how high-tech companies are organized; how to fit into the corporate culture; how to survive the rapid shifts common to high-tech industries; and what overseas opportunities exist and how to find them.

*Memoirs of a Hi-Tech Hustler* Gregory D Evans, What does AT&T, MCI, Sprint, PageNet, MobileCom, GTE, Cellular One, Skytel, Motorola, Compaq, and Dell Computers have in common? They were all victims of America's largest Hi-Tech criminal organization that call themselves Hi-Tech Hustlers. This organization that is responsible for over \$500 million dollars in theft, corporate losses and damages in the 12 year span. It was not until one of the founders of the organization, Gregory Evans was caught and indicted by the U.S. Attorney's Office for hacking and defrauding AT&T, MCI, Sprint and many others for more than \$24 million in a 6 month Hi-Tech crime spree. While behind bars, Gregory Evans had written some personal memoirs about his Hi-Tech organizations and the Hi-Tech capers that cost companies and consumers millions of dollars. This book has words misspelled and bad grammar because it was originally typed on a jailhouse type writer, and later typed word for word for the entire world to read. This exciting book reads like a blockbuster movie, even though names, dates and places have been changed to protect the guilty you will find yourself mesmerized, dazzled and entertained.
