Localizing the SDGs in African Cities Sylvia Croese,Susan Parnell,2022-07-19 This volume brings together a unique set of interventions from a variety of contributors to bridge the gap between research and policy with a distinct focus on Africa, drawing on work conducted as part of multiple interconnected research projects and networks on the Sustainable Development Goals (SDGs) and global policy implementation in African cities. Through the framework of the SDGs, and in particular Goal 11, the book aims to contribute to generating new knowledge about approaches to SDG localization that are grounded in complex and diverse local contexts, needs and realities, integrated perspectives and collaborative research. The volume draws together contributions from urban experts from different professional and disciplinary backgrounds, ranging from the fields of governance, planning, data, sustainability, health and finance, to provide critical insight into the current dynamics, actors, blind spots, constraints and also good practices and opportunities for realizing the SDGs in Africa. Readers will gain detailed and informed insight into the African experience of SDG localization, monitoring and implementation based on multiple case studies, and will learn of the practices needed to accelerate action towards achieving the SDGs in urban contexts. This book will be of interest to researchers and planners focusing on SDGs implementation in Africa, as well as government organizations, development practitioners and students committed to long-term, inclusive sustainable and participatory development. This is an open access book. Chapters 1, 3, 6, 8, 11 and 14 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

State of the World's Children UNICEF.,2009 On 20 November 2009, the global community celebrates the 20th anniversary of the adoption by the United Nations General Assembly of the Convention on the Rights of the Child, the unique document that sets international standards for the care, treatment and protection of all individuals below age 18. To celebrate this landmark, the United Nations Children's Fund is dedicating a special edition of its flagship report The State of the World's Children to examining the Convention's evolution, progress achieved on child rights, challenges remaining, and actions to be taken to ensure that its promise becomes a reality for all children.

The Craft of Information Visualization Benjamin B. Bederson,Ben Shneiderman,2003 Information visualization is a rapidly growing field that is emerging from research in human-computer interaction, computer science, graphics, visual design, psychology, and business methods. Information visualization is increasingly applied as a critical component in scientific research, digital libraries, data mining, financial data analysis, market studies, manufacturing production control, and drug discovery.

Population Geography Helen D. Hazen,Heike C. Alberts,Kazimierz J. Zaniewski,2023-07-06 Population Geography: Social Justice for a Sustainable World surveys the ways in which geographic approaches may be applied to population issues, exploring how human populations are embedded in natural and social environments. It encourages students to evaluate population issues critically, given that population topics are at the heart of many of today's most contentious subjects. Through introducing students to different lenses of analysis (ecological, economic, and social equity), the authors ask students to consider how different perspectives can lead to different conclusions on the same issue. Identifying and tackling today's population problems therefore requires an understanding of these diverging, and sometimes conflicting, perspectives. The text covers all the key background information critical to any book on population geography (population size, distribution, and composition; fertility, mortality, and migration; population and resources) but also pushes students to think critically about the materials they have covered using the perspectives of sustainability and social justice. In this way, students move beyond simple fact learning toward higher-level skills such as analysis, synthesis, and evaluation of materials. This textbook will be a valuable resource for students of human geography, population geography, demography, and diaspora studies.

Artificial Intelligence and Machine Learning for EDGE Computing Rajiv Pandey, Sunil Kumar Khatri, Neeraj Kumar Singh, Parul Verma, 2022-04-26 Artificial Intelligence and Machine Learning for Predictive and Analytical Rendering in Edge Computing focuses on the role of AI and machine learning as it impacts and works alongside Edge Computing. Sections cover the growing number of devices and applications in diversified domains of industry, including gaming, speech recognition, medical diagnostics, robotics and computer vision and how they are being driven by Big Data, Artificial Intelligence, Machine Learning and distributed computing, may it be Cloud Computing or the evolving Fog and Edge Computing paradigms. Challenges covered include remote storage and computing, bandwidth overload due to transportation of data from End nodes to Cloud leading in latency issues, security issues in transporting sensitive medical and financial information across larger gaps in points of data generation and computing, as well as design features of Edge nodes to store and run AI/ML algorithms for effective rendering. Provides a reference handbook on the evolution of distributed systems, including Cloud, Fog and Edge Computing Integrates the various Artificial Intelligence and Machine Learning techniques for effective predictions at Edge rather than Cloud or remote Data Centers Provides insight into the features and constraints in Edge Computing and storage, including hardware constraints and the technological/architectural developments that shall overcome those constraints

Evolution of Knowledge Science Syed V. Ahamed, 2016-10-25 Evolution of Knowledge Science: Myth to Medicine: Intelligent Internet-Based Humanist Machines explains how to design and build the next generation of intelligent machines that solve social and environmental problems in a systematic, coherent, and optimal fashion. The book brings together principles from computer and communication sciences, electrical engineering, mathematics, physics, social sciences, and more to describe computer systems that deal with knowledge, its representation, and how to deal with knowledge centric objects. Readers will learn new tools and techniques to measure, enhance, and optimize artificial intelligence strategies for efficiently searching through vast knowledge bases, as well as how to ensure the security of information in open, easily accessible, and fast digital networks. Author Syed Ahamed joins the basic concepts from various disciplines to describe a robust and coherent knowledge sciences discipline that provides readers with tools, units, and measures to evaluate the flow of knowledge during course work or their research. He offers a unique academic and industrial perspective of the concurrent dynamic changes in computer and communication industries based upon his research. The author has experience both in industry and in teaching graduate level telecommunications and network architecture courses, particularly those dealing with applications of networks in education. Presents a current perspective of developments in central, display, signal, and graphics processor-units as they apply to designing knowledge systems Offers ideas and methodologies for systematically extending data and object processing in computing into other disciplines such as economics, mathematics, and management Provides best practices and designs for engineers alongside case studies that illustrate practical implementation ideas across multiple domains

Informal Norms in Global Governance Wolfgang Hein, Suerie Moon, 2016-05-23 Hein and Moon take up a serious problem of contemporary global governance: what can be done when international trade rules prevent the realization of basic human rights? Starting in the 1990s, intellectual property obligations in trade agreements required many developing countries to begin granting medicines patents, which often rendered lifesaving drugs unaffordable. At stake was the question of what priority would be given to health-particularly of some of the world's poorest people-and what priority to economic interests, particularly those of the most powerful states and firms. This book recounts the remarkable story of the access to medicines movement. The authors offer an explanation for how the informal, but powerful norm that every person should have access to essential medicines emerged after a decade of heated political contestation and against long odds. They also explore the stability and scope of the norm. Finally, the book examines the limitations of informal norms for protecting human rights, and when renewed focus on changing formal norms is warranted.

Army Leadership and the Profession (ADP 6-22) Headquarters Department of the Army, 2019-10-09 ADP 6-22 describes enduring concepts of leadership through the core competencies and attributes required of leaders of all cohorts and all organizations, regardless of mission or setting. These principles reflect decades of experience and validated scientific knowledge. An ideal Army leader serves as a role model through strong intellect, physical presence, professional competence, and moral character. An Army leader is able and willing to act decisively, within superior leaders' intent and purpose, and in the organization's best interests. Army leaders recognize that organizations, built on mutual trust and confidence, accomplish missions. Every member of the Army, military or civilian, is part of a team and functions in the role of leader and subordinate. Being a good subordinate is part of being an effective leader. Leaders do not just lead subordinates-they also lead other leaders. Leaders are not limited to just those designated by position, rank, or authority.
