Innovation In China: A Strategic Management Casebook Hugh Thomas,2022-04-08 Innovation has shaped society since civilization began. Imperial China was the most innovative society on earth, but it failed to join the 19th century industrial revolution. In the 20th century, the Communist Party of China addressed that failure. Today China boasts an internationally compliant, rapidly developing IP system. State planning continues to be critical as the case of the largest, single, technology acquisition and infrastructure project in world history, high speed rail, demonstrates. But most of the innovation in China comes from the private sector: government incubators are among the government stimuli of private initiative, both local and global. And as the case on Cisco shows, foreign MNCs management of innovation in China is attractive but must involve co-ordination with government policy.This book presents cases where managers determine policy in China's increasingly innovative society. Readers take the roles of decision-makers to make strategy decisions. The cases in this volume showcase China's traditional three teachings, socialist market institutions, and modern management using studies on current Chinese companies and their leaders, among them big names such as Haier and Huawei. Each case stands alone as teaching material for instructors. Taken together, the book presents evolving models of innovation. Their subtle differences from western constructs critically impact the development of our global society.

Smart Metropolitan Regional Development T.M. Vinod Kumar,2018-05-31 This book discusses the concept and practice of a smart metropolitan region, and how smart cities promote healthy economic and spatial development. It highlights how smart metropolitan regional development can energize, reorganize and transform the legacy economy into a smart economy; how it can help embrace Information and Communications Technology (ICT); and how it can foster a shared economy. In addition, it outlines how the five pillars of the third industrial revolution can be achieved by smart communities. In addition, the book draws on 16 in-depth city case studies from ten countries to explore the state of the art regarding the smart economy in smart cities – and to apply the lessons learned to shape smart metropolitan economic and spatial development.

Frankenstein Urbanism Federico Cugurullo,2021-05-16 This book tells the story of visionary urban experiments, shedding light on the theories that preceded their development and on the monsters that followed and might be the end of our cities. The narrative is threefold and delves first into the eco-city, second the smart city and third the autonomous city intended as a place where existing smart technologies are evolving into artificial intelligences that are taking the management of the city out of the hands of humans. The book empirically explores Masdar City in Abu Dhabi and Hong Kong to provide a critical analysis of eco and smart city experiments and their sustainability, and it draws on numerous real-life examples to illustrate the rise of urban artificial intelligences across different geographical spaces and scales. Theoretically, the book traverses philosophy, urban studies and planning theory to explain the passage from eco and smart cities to the autonomous city, and to reflect on the meaning and purpose of cities in a time when human and non-biological intelligences are irreversibly colliding in the built environment. Iconoclastic and prophetic, Frankenstein Urbanism is both an examination of the evolution of urban experimentation through the lens of Mary Shelley's Frankenstein, and a warning about an urbanism whose product resembles Frankenstein's monster: a fragmented entity which escapes human control and human understanding. Academics, students and practitioners will find in this book the knowledge that is necessary to comprehend and engage with the many urban experiments that are now alive, ready to leave the laboratory and enter our cities.

Innovation Policy and the Limits of Laissez-faire D. Fuller,2010-10-06 Hong Kong's laissez-faire tradition has crippled attempts to transform it into a more knowledge-intensive economy and this is a lesson with wide applicability. Many emerging economies face innovation bottlenecks, but even some more advanced economies face similar constraints and may benefit from the lessons of its negative example.

The Dynamics of Higher Education Development in East Asia D. Neubauer,J. Shin,John N. Hawkins,2013-12-18 This book examines four theses regarding Asian higher education and development: interplay between cultural traditions, economic development, globalization, and the evolution of the 'hybrid' university. Top scholars evaluate these hypotheses and determine the elements shaping the history and present circumstances of Asia-Pacific higher education.

Evaluation of the C. Y. Leung Administration Joseph Yu-shek CHENG,2020-06-01 Did C. Y. Leung achieve his goals? Did he perform his duty to the Hong Kong people as their third Chief Executive? To answer these questions, this book presents a rational, research-based critique of the C. Y. Leung Administration (2012 - 2017). It is a sweeping and original publication that covers various aspects of governance, including politics, economics, healthcare, human rights, civil service, housing, urban planning, youth, and Legislative Council elections as well as Hong Kong¡¦s relationships with Taiwan, Mainland China, and Western countries. Written by a team of expert authors from various fields, this book is one of the first comprehensive academic discourses on the issues this administration faced while in office. The first chapter sets the tone of the book, with the subsequent chapters providing additional details confirming the general conclusions of the authors concerning the C. Y. Leung Administration. Written for scholars and community members interested in Hong Kong governance, this anthology presents a complex and comprehensive critique of one specific Chief Executive¡¦s period of influence and how his administration¡¦s policies still affect the Hong Kong community today.

China's Electronics Industry Michael Pecht,2006-08-10 China's Electronics Industry is a comprehensive and current report on the technologies, manufacturing capabilities, and infrastructure that have made China a major player in the electronics industry. Not only does it cover the past, present, and future of important electronic technologies, but also the pros and cons of conducting business in China. This is an important reference for any company planning a venture in China as well as those who have already taken their first steps. It will also be of great interest to researchers and policy makers who need to know more about the role of central government in promoting strategic industries and assisting national science and technology development. Much of the data contained in the report is from 2006. No country has burst onto the economic scene as dramatically as China has in the past decade. It is the world's largest producer of many electronic products and has a leading edge semiconductor industry. This timely and comprehensive report from America's leading authority is a critical for anyone who is interested in working with China in the electronics field including business managers, academics, government institutes, foreign investors, as well as those who are interested in the past, present and future growth of China's Electronics Industry. If you are thinking about doing business in china's electronics industry, you must have this book.

Primary Care Revisited Ben Yuk Fai Fong,Vincent Tin Sing Law,Albert Lee,2020-06-03 This book adopts an interdisciplinary approach with a wide scope of perspectives on primary healthcare, describing related principles, care models, practices and social contexts. It combines aspects of development, research and education applied in primary health care, providing practitioners and scholars with a comprehensive

overview of the current knowledge and delivery models of healthcare in community settings. It covers the practical, philosophical and scholarly issues pertinent to the delivery, financing, planning, ethics, health politics, professional and technological development, resources, and monitoring in primary health care. Contributors are from a diverse range of academic and professional backgrounds, bringing together collective expertise in mainstream medicine, nursing, allied health, Chinese medicine, health economics, administration, law, public policy, housing management, information technology and mass communications. As such, the book does not follow the common clinical practice or service-based approach found in most texts on primary care.The contents will serve as a useful reference work for policymakers, researchers, community health practitioners, health executives and higher education students.

Privacy-preserving Computing Kai Chen,Qiang Yang,2023-11-16 Privacy-preserving computing aims to protect the personal information of users while capitalizing on the possibilities unlocked by big data. This practical introduction for students, researchers, and industry practitioners is the first cohesive and systematic presentation of the field's advances over four decades. The book shows how to use privacy-preserving computing in real-world problems in data analytics and AI, and includes applications in statistics, database queries, and machine learning. The book begins by introducing cryptographic techniques such as secret sharing, homomorphic encryption, and oblivious transfer, and then broadens its focus to more widely applicable techniques such as differential privacy, trusted execution environment, and federated learning. The book ends with privacy-preserving computing in practice in areas like finance, online advertising, and healthcare, and finally offers a vision for the future of the field.

Angels Without Borders John May,Professor of Finance Manhong Mannie Liu,2015-10-20 Angel investors provide small amounts of capital ($100k?$3m) to early stage, high-risk ventures. In recent years, they have not only grown in numbers and sophistication, they have garnered the attention of larger investors and governments throughout the world who are interested in the phenomenal power of startups to bring innovative products to consumers, create jobs and economic value, and sustain macroeconomic growth. This comes as no surprise. Some of the world's most valuable and influential companies, such as Google, Facebook, and Uber were able to survive and thrive their make-or-break early years only through the backing of angels. Angels Without Borders: Trends and Policies Shaping Angel Investment Worldwide, drawing on chapter contributors from more than two dozen nations, will be the only book on the market to examine this trend from a global perspective. It is a very useful reference for anyone who is interested in learning about the angel investment movement. Digital Review of Asia Pacific 2009-2010 Shahid Akhtar,2009-06-03 The biennial Digital Review of Asia Pacific is a comprehensive guide to the state-of-practice and trends in information and communication technologies for development (ICTD) in the Asia Pacific region.This fourth edition (2009-2010) features 30 economies and four sub-regional groupings. The chapters provide updated information on ICT infrastructure, industries, content and services, key programs, enabling policies and regulation, education and capacity building, open source, and research and development initiatives, as well as ICTD challenges in each of the economies covered. The common framework that underpins these reports allows readers to undertake a comparative analysis and assess progress across Asia Pacific.In addition, regional overviews provide a synthesis of ICTD trends, regulatory issues, and lessons for managing innovation in the network economy. The thematic chapters focus on issues in ICT in education, a key area in ICTD.The authors are drawn from government, academe, industry and civil society, providing a broad perspective on the use of ICTs for human development.

Inside Smart Cities Andrew Karvonen,Federico Cugurullo,Federico Caprotti,2018-09-12 The era of the smart city has arrived. Only a decade ago, the promise of optimising urban services through the widespread application of information and communication technologies was largely a techno-utopian fantasy. Today, smart urbanisation is occurring via urban projects, policies and visions in hundreds of cities around the globe. Inside Smart Cities provides real-world evidence on how local authorities, small and medium enterprises, corporations, utility providers and civil society groups are creating smart cities at the neighbourhood, city and regional scales. Twenty three empirically detailed case studies from the Global North and South – ranging from Cape Town, Stockholm and Abu Dhabi to Philadelphia, Hong Kong and Santiago – illustrate the multiple and diverse incarnations of smart urbanism. The contributors draw on ideas from urban studies, geography, urban planning, science and technology studies and innovation studies to go beyond the rhetoric of technological innovation and reveal the political, social and physical implications of digitalising the built environment. Collectively, the practices of smart urbanism raise fundamental questions about the sustainability, liveability and resilience of cities in the future. The findings

are relevant to academics, students, practitioners and urban stakeholders who are questioning how urban innovation relates to politics and place.

Sustainable Cities in Asia Federico Caprotti,Li Yu,2017-08-31 With Asia's cities undergoing unprecedented growth in the 21st century, lauded the 'urban century' by many, Sustainable Cities in Asia provides a timely examination of the challenges facing cities across the continent including some of the projects, approaches and solutions that are currently being tested. This book uses numerous case studies, analysing topical issues ranging from city cycling in India, to green spaces in China, to the use of community-led energy generation projects in post-Fukushima Japan. Containing contributions from an international team of scholars, it also takes a multi-disciplinary approach and draws on examples from a wide range of countries, including China, India, Japan, Korea, Taiwan, Singapore and the United Arab Emirates. Ultimately, by providing a comprehensive discussion of the broader debates around the shape of sustainable urbanism, it demonstrates that Asia is one of the most active regions in terms of the development of sustainable city strategies. Tackling the contemporary issues of key importance for sustainability, such as property markets, migration and transport, this book will appeal to students and scholars of Urban Geography, Sustainability, Environmental Studies and Asian studies.
