Dictionnaire Géographique Et Statistique Sur Un Plan Entirement Nouveau Adrien GUIBERT,1850

New Perspectives in Southeast Asian and Pacific Prehistory Philip J. Piper,Hirofumi Matsumura,David Bulbeck,2017-03-24 'This volume brings together a diversity of international scholars, unified in the theme of expanding scientific knowledge about humanity's past in the Asia-Pacific region. The contents in total encompass a deep time range, concerning the origins and dispersals of anatomically modern humans, the lifestyles of Pleistocene and early Holocene Palaeolithic hunter-gatherers, the emergence of Neolithic farming communities, and the development of Iron Age societies. These core enduring issues continue to be explored throughout the vast region covered here, accordingly with a richness of results as shown by the authors. Befitting of the grand scope of this volume, the individual contributions articulate perspectives from multiple study areas and lines of evidence. Many of the chapters showcase new primary field data from archaeological sites in Southeast Asia. Equally important, other chapters provide updated regional summaries of research in archaeology, linguistics, and human biology from East Asia through to the Western Pacific.' Mike T. Carson Associate Professor of Archaeology Micronesian Area Research Center University of Guam

Spatial Dynamics Models In The Life Sciences And The Role Of Feedback In Robust Developments Frederic Y M Wan,2022-12-28 Basic mathematical techniques for partial differential equations (PDE) with applications to the life sciences form an integral part of the core curriculum for programs in mathematical biology. Yet, students in such a program with an undergraduate training in biology are typically deficient in any exposure to PDE. This volume starts with simple first order PDE and progresses through higher order equations and systems but with interesting applications, even at the level of a single first order PDE with constant coefficients. Similar to the two previous volumes by the author, another unique feature of the book is highlighting the scientific theme(s) of interest for the biological phenomena being modelled and analysed. In addition to temporal evolution of a biological phenomenon, its limiting equilibrium states and their stability, the possibility of locational variations leads to a study of additional themes such as (signal and wave) propagation, spatial patterning and robustness. The requirement that biological developments are relatively insensitive to sustained environmental changes provides an opportunity to examine the issue of feedback and robustness not encountered in the previous two volumes of this series.

Diamonds in Nature Ralf Tappert,Michelle C. Tappert,2011-02-16 *Diamonds in Nature: A Guide to Rough Diamonds* illustrates the range of crystal shapes, colours, surface textures, and mineral inclusions of rough, uncut, naturally forming diamonds. Each chapter contains photographs that show the unique physical characteristics of the diamonds, and the accompanying text describes the processes that led to their formation. This book is an invaluable reference manual for professional geoscientists—including gemmologists and exploration geologists.

Gustav Mahler: Volume 3. Vienna: Triumph and Disillusion (1904-1907) Henry-Louis de La Grange,1995 When the second volume of de La Grange's monumental study of Mahler appeared, it was hailed in *The New Yorker*, *The Washington Post*, *The Los Angeles Times*, and many other publications as an indispensable portrait of the great composer. Here at last is the third volume of this magisterial work. Ranging from 1904 to 1907, it explores Mahler's final years as administrator, producer, and conductor of the Vienna Opera. It was a time of intense inner struggle, with Mahler's energy and creative powers

drained by the competing demands of running the Hofoper and struggling for recognition as a composer. And they were tragic years as well, especially 1907, Mahler's last year in Vienna, when the death of his daughter and the diagnosis of heart disease forced him to leave the Opera. Throughout the book, de La Grange offers true-to-life portraits of Mahler the human being, the family man, and the composer, and he weaves in innumerable testimonies and anecdotes that throw new light on the great composer's complex personality. The product of forty years of research, here is the definitive study of a musical giant. It is, as The Wall Street Journal said of volume two, a work of the first importance, one that nobody seriously interested in Mahler can possibly afford to skip.

The Chinese/Vietnamese Diaspora Yuk Wah Chan, 2012-06-12 Over three decades have passed since the first wave of Indochinese refugees left their homelands. These refugees, mainly the Vietnamese, fled from war and strife in search of a better life elsewhere. By investigating the Vietnamese diaspora in Asia, this book sheds new light on the Asian refugee era (1975-1991), refugee settlement and different patterns of host-guest interactions that will have implications for refugee studies elsewhere. The book provides: a clearer historical understanding of the group dynamics among refugees - the ethnic Chinese 'Vietnamese refugees' from both the North and South as well as the northern 'Vietnamese refugees' an examination of different aspects of migration including: planning for migration, choices of migration route, and reasons for migration an analysis of the ethnic and refugee politics during the refugee era, the settlement and subsequent resettlement. This book will be of interest to students and scholars of globalization, migration, ethnicities, refugee histories and politics.

Dragons with Clay Feet? Max Spoor, Nico Heerink, Futian Qu, 2007-02-16 *Dragons with Clay Feet?* presents state-of-the-art research on the impact of ongoing and anticipated economic policy and institutional reforms on agricultural development and sustainable rural resource in two East-Asian transition (and developing) economies—China and Vietnam. The contributions to this volume focus on the regional and sectoral impact of transformational policies, farm household decision making under a changing economic and institutional environment, and potential trade-offs between agricultural growth and sustainable land management in the two countries. The analysis of household responses to economic policies and changing institution, and their implications for agricultural production and sustainable resource use in East-Asian transition economies, is a relatively new research field. This collection by a group of Chinese, Vietnamese, and international researchers reflect the rapid progress that is being made in this important research field.

Second Language Research Alison Mackey, Susan M. Gass, 2015-07-24 In this second edition of the best-selling *Second Language Research*, Alison Mackey and Sue Gass continue to guide students step-by-step through conducting the second language research process with a clear and comprehensive overview of the core issues in second language research. Supported by a wealth of data examples from actual studies, the book examines questions of what is meant by research and what defines good research questions, covering such topics as basic research principles and data collection methods, designing a quantitative research study, and concluding and reporting research findings. The second edition includes a new chapter on mixed-methods, new time to think and time to do text boxes throughout, and updates to reflect the latest research and literature. Supplementary materials, including an extensive glossary and appendices of forms and documents that students can use in conducting their own studies, serve as useful

reference tools, with suggestions on how to get research published reemphasizing the book's practical how-to approach. Second Language Research, Second Edition is the ideal resource for understanding the second language research process for graduate students in Second Language Acquisition and Applied Linguistics.

Migration, Indigenization, and Interaction Leo Suryadinata, 2011 The twelve chapters included in this book address various issues related to Chinese migration, indigenization and exchange with special reference to the era of globalization. As the waves of Chinese migration started in the last century, the emphasis, not surprisingly, is placed on the ?migrant states? rather than ?indigenous states?. Nevertheless, many chapters are also concerned with issues of ?settling down? and ?becoming part of the local scenes?. However, the settling/integrating process has been interrupted by a globalizing world, new Chinese migration and the rise of China at the end of 20th century.
