Bordering Britain Nadine El-Enany, 2020-02-11 (B)ordering Britain argues that Britain is the spoils of empire, its immigration law is colonial violence and irregular immigration is anti-colonial resistance. In announcing itself as postcolonial through immigration and nationality laws passed in the 60s, 70s and 80s, Britain cut itself off symbolically and physically from its colonies and the Commonwealth, taking with it what it had plundered. This imperial vanishing act cast Britain's colonial history into the shadows. The British Empire, about which Britons know little, can be remembered fondly as a moment of past glory, as a gift once given to the world. Meanwhile immigration laws are justified on the basis that they keep the undeserving hordes out. In fact, immigration laws are acts of colonial seizure and violence. They obstruct the vast majority of racialised people from accessing colonial wealth amassed in the course of colonial conquest. Regardless of what the law, media and political discourse dictate, people with personal, ancestral or geographical links to colonialism, or those existing under the weight of its legacy of race and racism, have every right to come to Britain and take back what is theirs.

The Nones Ryan P. Burge, 2023-05-16 In *The Nones: Where They Came From, Who They Are, and Where They Are Going*, Second Edition, Ryan P. Burge details a comprehensive picture of an increasingly significant group--Americans who say they have no religious affiliation. The growth of the nones in American

society has been dramatic. In 1972, just 5 percent of Americans claimed no religion on the General Social Survey. In 2018, that number rose to 23.7 percent, making the nones as numerous as both evangelical Protestants and Roman Catholics. Every indication is that the nones will be the largest religious group in the United States in the next decade. Burge illustrates his precise but accessible descriptions with charts and graphs drawn from more than a dozen carefully curated datasets, some tracking changes in American religion over a long period of time, others large enough to allow a statistical deep dive on subgroups such as atheists or agnostics. Burge also draws on data that tracks how individuals move in and out of religion over time, helping readers to understand what type of people become nones and what factors lead an individual to return to religion. This second edition includes substantial updates with new chapters and current statistical and demographic information. The Nones gives readers a nuanced, accurate, and meaningful picture of the growing number of Americans who say that they have no religious affiliation. Burge explains how this rise happened, who the nones are, and what they mean for the future of American religion.

### **Teaching and Learning for Social Justice and Equity in Higher Education**

Laura Parson,C. Casey Ozaki,2021-10-25 This book is the third in a four volume series that focuses on research-based teaching and learning practices that promote social justice and equity in higher education. In this volume, we focus on the application of the scholarship of teaching and learning in higher education outside of the classroom to maximize the effectiveness of student affairs programming. Specifically, authors focus on the application of SoTL in higher education outside of the classroom (e.g., faculty development, leadership, student involvement, student affairs) in ways that promote greater equity and inclusion in higher education. Each chapter includes a description of how higher education may traditionally marginalize students from underrepresented groups, outlines a research-based plan to improve student experiences, and provides a program or activity plan to implement the recommendations from each chapter.

Textbook on Immigration and Asylum Law Gina Clayton,2016-08-04 This volume examines the law and system of control which govern immigration and asylum in the UK. It begins with the historical and legal context, explains who is subject to immigration control, and describes the legal and administrative structure of the system.

**Food Bullying** Michele Payn,2019-08-06 “A much-needed critique of our national obsession of guilt over food choices...exposes the multi-trillion-dollar marketing and misrepresentation of food.”—Dr. David Samadi, urologic oncologist and world-renowned robotic surgeon IPPY Award Gold Medal Winner More than 40,000 products can be found in a grocery store—and there’s a lot of money to be made by those who use misleading marketing to push us into emotion-driven decisions or make us feel like every purchase is a moral or social statement. Food Bullying upends the way you think about food and gives you permission to make eating choices based on your own social, ethical, environmental, and health standards—rather than brand, friend, or Facebook claims. Michele Payn, one of North America’s leading voices in connecting farm and food, takes a startling look at the misrepresentation of food and sheds light on bogus nutrition and environmental claims to help you recognize and stand up to the bullies. Food Bullying guides you through understanding food label claims and offers insight on “the hidden world of farming”. Armed with science and a lifetime on the farm, Michele provides a six-step action plan for you to overcome food bullying, simplify safe food choices, and even

save time in the grocery store. "Engages and enables readers to overcome their fear to make shopping, food preparation and eating enjoyable endeavors rather than a battleground."—Leslie Bonci, MPH, RDN, CSSD, LDN, Kansas City Chiefs Sports Dietitian

*My Night in the Planetarium* Innosanto Nagara, 2017-12-05 7-year-old Innosanto spends an exciting night with his mom sleeping under the stars in the Jakarta Planetarium. Innosanto's father is a playwright and the boy memorizes lines during the actors' rehearsals, so they invite him to join the performance, which tours the country. The play is about a General, who doesn't treat people very well, so they decided to do a play about how that was wrong. Fact: Indonesia aka The Spice Islands is the place Christopher Columbus was looking for when he crashed in the New World. Fact: Indonesia is made up of 17000 islands where people speak over 750 different languages. Fact: when Inno was a child, speaking out against the government could land you in jail. On the last night of the performance Inno packs a toothbrush (they figured if you're going to go to jail for a long time, you may as well have your toothbrush with you so you can keep your teeth clean. (true story).), the curtains go down, and with soldiers on the way, the actors scatter into hiding. On its surface, *My Night in the Planetarium* is a modern Indonesian children's story about one night in the late '70s that the author got to spend in the Jakarta planetarium. But it's actually much more than that. It's an introduction to the history and culture of Indonesia. It's

about colonialism, revolution, how power corrupts, and how through art and solidarity liberation can be won.

**Tropical Peatlands** Jack Rieley,Susan Page,2012-01-01 Tropical peatlands are found mostly in South East Asia, but also in Africa and in Central and South America. They and peat-swamp forests store large amounts of carbon and their destruction, particularly through the development of plantations for oil palm and other forms of agriculture, releases large quantities of greenhouse gases which contribute to climate change. They are also complex and vulnerable ecosystems, home to great biodiversity and a number of endangered species such as the orang utan.The aim of this book is to introduce this little known but important and vulnerable ecosystem in a way that explains its long standing interaction with the global carbon cycle and how it is being destroyed by deforestation and inappropriate development. The authors describe the origin and formation of peat in the tropics, its current location, extent and amount of carbon stored in it, its biodiversity and natural resource functions and key ecological functions and processes.

Appropriate hydrology is the key to the development and maintenance of peatlands and the unique aspects of tropical peatland water supply and management are also explored. In the same vein the nutrient dynamics and budgets of this ecosystem are explained in order to show how complex habitats can be maintained mainly by rainwater containing very low concentrations of essential chemical elements. Past and present impacts on tropical peatlands in SE Asia are discussed and the need for restoration and wise use highlighted. Finally, projections are made about the future of this ecosystem as a result of continuing human impacts and climate change.

Just-in-time Teaching Gregor M. Novak, 1999 The authors explain how a group of higher education schools used just-in-time teaching (JiTT) methods to increase interactivity for the physics student. By enhancing courses with multimedia Web activities and electronic communications, the classroom environment allowed less dependence on lecture and more rapid responses to students' problems.
