Japanese Manufacturing Investment in Europe Roger Strange, 2002-09-11 Japanese manufacturing investment in the European Community has grown dramatically over the last twenty years. At first, instances of investment were few, concentrated in a small number of industrial sectors. But since the mid-1980's there has been a surge of investment in a much wider range of industries. This volume details the growth of Japanese manufacturing investment in Europe in fourteen industrial sectors. The impact of Japanese competition and direct investment on European industries is considered in the context of the emergence of the three major trading blocs: the United States, Japan and the EC. Roger Strange concludes by making important policy recommendations, and arguing for the need for a new theoretical framework for assessing the political economy of foreign direct investment.

Honda Engine Swaps Aaron Bonk, 2004-08-30 When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the sport compact--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes

vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

How to Build Honda Horsepower Richard Holdener, 2003-02-09 Honda performance enthusiasts all have one basic question when it comes to making their cars faster: What parts work, and what parts don't? The only way to answer that question is to install various parts on a car and test the power output on a dynamometer (dyno). Richard Holdener has done that in High Performance Honda Dyno Tests. Holdener's extensive testing provides dyno-proven data for all popular Honda performance parts, from air intake systems to exhausts, cams and cylinder heads to nitrous, turbos, and superchargers. There is even a chapter on engine build-ups. In addition, dyno tests on nearly every Honda model, from the single-cam DX to the 2.2L Prelude, are included. Acura models are covered as well, from the 1.8L LS through the GSR and Type R all the way up to exotic NSX. There is no better place to find performance answers than in this book.

Competition Law in Spain Mauricio Troncoso, Patricia Pérez Fernández, 2018-06-29 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in Spain covers every aspect of the subject - the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with

relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Spain will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law.

Decreto expropiatorio de la Revolución cubana Autores Varios, 2024-01-01 El Decreto expropiatorio de la Revolución cubana, también conocido como Ley No. 890, fue una legislación clave promulgada por el Gobierno Revolucionario de Cuba, bajo la presidencia de Osvaldo Dorticós Torrado. Este decreto fue una medida radical que buscaba reestructurar de manera significativa la economía cubana, poniendo en práctica los ideales y objetivos de la Revolución Cubana de 1959. Contexto El decreto se justifica en múltiples «Por cuanto», que delinear las razones y la necesidad de tomar acción tan drástica. Se argumenta que el desarrollo económico de la nación solo puede lograrse mediante una planificación económica adecuada, el aumento y la racionalización de la

producción y, sobre todo, el control nacional de las industrias básicas. Además, se menciona que muchas grandes empresas privadas han estado actuando en contra de los intereses de la Revolución y del desarrollo económico de la nación. Aquí, estas empresas son acusadas de sabotear la capacidad productiva de Cuba, de invertir capital en el extranjero y de abandonar la administración directa de sus fábricas, entre otras cosas. Implicaciones económicas Este Decreto expropiatorio propone la nacionalización mediante expropiación forzosa de todas las empresas industriales y comerciales, así como de otros bienes relacionados. Esta nacionalización masiva se justifica como una necesidad imperante para transformar la economía y para disolver el poder económico de supuestos «intereses privilegiados» que conspiran contra el pueblo y la Revolución. Política de comercio exterior Otro aspecto crucial mencionado en el decreto es la transformación del comercio exterior de Cuba. Se argumenta que el control nacional de las importaciones es esencial y que la existencia de grandes empresas importadoras que operan por el simple estímulo del beneficio personal es un obstáculo para la nueva política de comercio exterior. Legalidad El decreto se ampara en el Artículo 24 de la Ley Fundamental de la República, promulgada, poco antes, el 7 de febrero de 1959, para llevar a cabo la expropiación forzosa de estas empresas. Decreto expropiatorio de la Revolución Cubana La Ley No. 890 fue un hito en la historia de la Revolución Cubana, marcando un cambio profundo y controvertido en la estructura económica del país. Buscó dismantelar el poder económico de ciertos sectores, y someter a las fuerzas económicas del país a los ideales y objetivos de la Revolución. Esta ley también llevó a tensiones y conflictos con países extranjeros y empresas multinacionales que se vieron afectadas por la nacionalización, contribuyendo a la compleja relación entre Cuba y el resto y los Estados Unidos de América en los años posteriores.

International Trade Nigel Grimwade, 2020-07-24 This new edition has been rewritten to provide an up-to-date, clear and comprehensive account of the most important developments currently taking place in the world economy. The text introduces the major economic theories and models with an emphasis on changes within the world trading system and how governments respond. New features include: * an expansion of chapter three to include formal models of intra-industry trade under imperfect competition * two separate chapters on Japan and newly industrialising countries, updating and incorporating new material * new sections on Strategic Trade Policy and on the Political Economy of Protectionism * a new chapter on the institutional aspects of world trade in discussing the deliberations of the World Trade Organisation
