The seven volumes LNCS 12249-12255 constitute the refereed proceedings of the 20th International Conference on Computational Science and Its Applications, ICCSA 2020, held in Cagliari, Italy, in July 2020. Due to COVID-19 pandemic the conference was organized in an online event. Computational Science is the main pillar of most of the present research, industrial and commercial applications, and plays a unique role in exploiting ICT innovative technologies. The 466 full papers and 32 short papers presented were carefully reviewed and selected from 1450 submissions. Apart from the general track, ICCSA 2020 also include 52 workshops, in various areas of computational sciences, ranging from computational science technologies, to specific areas of computational sciences, such as software engineering, security, machine learning and artificial intelligence, blockchain technologies, and of applications in many fields.

The Ringtone Dialectic Sumanth Gopinath, 2013-07-19

The rise and fall of the ringtone industry and its effect on mobile entertainment, music, television, film, and politics. A decade ago, the customizable ringtone was ubiquitous. Almost any crowd of cell phone owners could produce a carillon of tinkly, beeping, synthy, musicalized ringer signals. Ringtones quickly became a multi-billion-dollar global industry and almost as quickly faded away. In *The Ringtone Dialectic*, Sumanth Gopinath charts the rise and fall of the ringtone economy and assesses its effect on cultural production. Gopinath describes the technical and

economic structure of the ringtone industry, considering the transformation of ringtones from monophonic, single-line synthesizer files to polyphonic MIDI files to digital sound files and the concomitant change in the nature of capital and rent accumulation within the industry. He discusses sociocultural practices that seemed to wane as a result of these shifts, including ringtone labor, certain forms of musical notation and representation, and the creation of musical and artistic works quoting ringtones. Gopinath examines “declines,” “reversals,” and “revivals” of cultural forms associated with the ringtone and its changes, including the Crazy Frog fad, the use of ringtones in political movements (as in the Philippine “Gloriagate” scandal), the ringtone’s narrative function in film and television (including its striking use in the films of the Chinese director Jia Zhangke), and the ringtone’s relation to pop music (including possible race and class aspects of ringtone consumption). Finally, Gopinath considers the attempt to rebrand ringtones as “mobile music” and the emergence of cloud computing.

Reading Sounds Sean Zdenek, 2015-12-23 The work of writing closed captions for television and DVD is not simply transcribing dialogue, as one might assume at first, but consists largely of making rhetorical choices. For Sean Zdenek, when captioners describe a sound they are interpreting and creating contexts, they are assigning significance, they are creating meaning that doesn't necessarily exist in the soundtrack or the script. And in nine chapters he analyzes the numerous complex rhetorical choices captioners make, from abbreviating dialogue so it will fit on the screen and keep pace with the editing, to whether and how to describe background sounds, accents, or slurred speech, to nonlinguistic forms of sound communication such as sighing, screaming, or laughing, to describing music, captioned silences (as when a continuous noise suddenly stops), and sarcasm, surprise, and other forms of meaning associated with vocal tone. Throughout, he also looks at closed captioning style manuals and draws on interviews with professional captioners and hearing-impaired viewers. Threading through all this is the novel argument that closed captions can be viewed as texts worthy of rhetorical analysis and that this analysis can lead the entertainment industry to better standards and practices for closed captioning, thereby better serve the

needs of hearing-impaired viewers. The author also looks ahead to the work yet to be done in bringing better captioning practices to videos on the Internet, where captioning can take on additional functions such as enhancing searchability. While scholarly work has been done on captioning from a legal perspective, from a historical perspective, and from a technical perspective, no one has ever done what Zdenek does here, and the original analytical models he offers are richly interdisciplinary, drawing on work from the fields of technical communication, rhetoric, media studies, and disability studies.

Unleashed in Oregon Sue Fagalde Lick, 2017-09-28
What is a Californian? What was waiting by the door that night? What possessed us to adopt two puppies at once? How is playing the piano like ice skating? Why stay in Oregon when it rains all the time and the family is still back in California? Find the answers to these and other questions in these posts selected from ten years of the **Unleashed in Oregon** blog. Chapters will look at the glamorous life of a writer and the equally glamorous life of a musician, true stories from a whiny traveler, being the sole human occupant of a house in the woods, and dogs, so

much about dogs.

Physics for Future Presidents Richard Muller, 2008 Learn the science behind the headlines in this work that outlines the tools of terrorists, the dangers of nuclear power, and the reality of global warming.

One Night at the Call Center Chetan Bhagat, 2008-12-10 Press 1 for technical support. Press 2 for broken hearts. Press 3 if your life has totally crashed. . . . Six friends work nights at a call center in India, providing technical support for a major U.S. appliance corporation.

Skilled in patience—and accent management—they help American consumers keep their lives running. Yet behind the headsets, everybody's heart is on the line. Shyam (Sam to his callers) has lost his self-confidence after being dumped by the girl who just so happens to be sitting next to him. Priyanka's domineering mother has arranged for her daughter's upscale marriage to an Indian man in Seattle. Esha longs to be a model but discovers it's a horizontal romp to the runway. Lost, dissatisfied Vroom has high ideals, but compromises them by talking on the phone to idiots each night. Traditional Radhika has just found out that her husband is sleeping with his secretary. And Military Uncle (nobody knows his real name) sits alone working the online chat. They all try to make it through their shifts—and maintain their sanity—under the eagle eye of a boss whose ego rivals his incompetence. But tonight is no ordinary night. Tonight is Thanksgiving in America: Appliances are going haywire, and the phones are ringing off their hooks. Then one call, from one very special caller, changes everything. Chetan Bhagat's delicious romantic comedy takes us inside the world of the international call center, where cultural cross-wires come together with perfect pathos, hilarity, and spice.

The Other End of the Leash Patricia McConnell, Ph.D., 2009-02-19 Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man's best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all,

humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Taskmaster Alex Horne, 2018-09-06 Build yourself a box and think outside of it. Your time starts now ... In the TV show and on my marriage certificate, my job description is ‘Taskmaster’s Assistant’. That’s what I do and it’s an honour. I like Taskmaster a lot. And, of course, I love The Taskmaster. He’s mountainous. If you feel in any way the same as me then you should enjoy this paperback version of the official Taskmaster book. There are tasks for you, your friends and your family. There are new tasks, secret things and sneaky tricks. And there is one swear word. So it’s almost exactly like being on the show. Good luck. Make good choices. Let’s do Him proud. Alex Horne Taskmaster’s Assistant

Accidental Hero Matt Myklusch, 2011-04-26 Fans of

Brandon Mull and James Riley will love this middle grade fantasy trilogy about a regular kid who discovers that the truth about his past could be the answer to saving the future. All Jack Blank knows is his bleak, dreary life at St. Barnaby's Home for the Hopeless, Abandoned, Forgotten, and Lost, an orphanage that sinks more and more into the swampland of New Jersey with each passing year. His aptitude tests project him as spending a long, unhappy career as a toilet brush cleaner. His only chance at escape comes through the comic books donated years ago to the orphanage that he secretly reads in the dark corners of the library. Everything changes one icy gray morning when Jack receives two visitors that alter his life forever. The first is a deadly robot straight out of one of his comic books that tries its best to blow him up. The second is an emissary from a secret country called the Imagine Nation, an astonishing place where all the fantastic and unbelievable things in our world originate—including Jack. Jack soon discovers that he has an amazing ability—one that could make him the savior of the Imagine Nation and the world beyond, or the biggest threat they've ever faced.

Beyond Memory Max Mojapelo, 2008 South Africa possesses one of the richest popular music traditions in the world - from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. And if one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in

South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the musics of the black communities. *Beyond Memory: Recording the History, Moments and Memories of South African Music* is an invaluable publication because it offers a first-hand account of the South African music scene of the past decades from the pen of a man, Max Thamagana Mojapelo, who was situated in the very thick of things, thanks to his job as a deejay at the South African Broadcasting Corporation. This book - astonishing for the breadth of its coverage - is based on his diaries, on interviews he conducted and on numerous other sources, and we find in it not only the well-known names of recent South African music but a countless host of others whose contribution must be recorded if we and future generations are to gain an accurate picture of South African music history of the late 20th and early 21st centuries.

The Brand Innovation Manifesto John

Grant, 2006-05-12 The days of the image brands are over, and 'new marketing' has gone mainstream. The world's biggest companies are pursuing a post-advertising strategy, moving away from advertising and investing in leading edge alternatives. In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of *The New Marketing Manifesto*, whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In *The Brand Innovation Manifesto*, he redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be constantly added to keep

pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas - and new ideas for existing brands.

Human Factors Considerations of Undergrounds in Insurgencies Us Army Special Operations Command, 2017-08-31 From the preface: The 1966 'Human Factors' edition focused on the contemporary threat of Maoist insurgencies, particularly in Southeast Asia, and also drew extensively on World War II resistance movements in Europe. Much of this information is still relevant and has been retained and integrated. In the post-Cold War world, the most important insurgencies tend to be ethnic and religious. Long-simmering conflicts, sometimes with roots in colonial policies, have become prominent; examples include the Liberation Tigers of Tamil Eelam (LTTE) in Sri Lanka, Euskadi Ta Askatasuna (Basque Homeland and Freedom or ETA) in Spain, the Hutu-Tutsi genocides, the Ushtia ♦lirimtare e Kosov♦s (Kosovo Liberation Army, or KLA), and the Provisional Irish Republican Army (PIRA). Battle lines in these conflicts are often drawn along ethnic lines, even when land or politics are the immediate issues in contention. The other important new category is extremist religious movements, most prominently Islamic groups, including regional insurgent movements like Hizbollah and Harakat al-Muqawamah al'Isla ♦miyyah (Islamic Resistance Movement, or HAMAS) and global movements like Al Qaeda. These present a different profile of ideology, organizational forms, and psychology than either Cold War Maoists or post-colonial ethnic insurgencies (although the Palestinian cause could be considered a post-colonial issue). Globalization has also changed underground operations in numerous ways. Insurgencies, enabled by

low-cost transportation, Internet based communications, and other information technologies, can more easily recruit, communicate, and operate across borders. It is correspondingly much more difficult to contain an insurgency in a region. Global media has led to development of new tactics, in particular new types of terrorism, designed to capture worldwide attention. Compared with what was available in the 1960s, there are orders of magnitude more academic research available relevant to this study's topics. We were able to draw on more recent work in psychology, political science, economics, sociology, organizational studies, and communications studies. Readers of this edition will, over the course of eleven chapters, get a wide exposure to basic concepts from a number of disciplines.

Artificial Intelligence in Music, Sound, Art and Design Juan Romero, Tiago Martins, Nereida Rodríguez-Fernández, 2021-04-01 This book constitutes the refereed proceedings of the 10th European Conference on Artificial Intelligence in Music, Sound, Art and Design, EvoMUSART 2021, held as part of Evo* 2021, as Virtual Event, in April 2021, co-located with the Evo* 2021 events, EvoCOP, EvoApplications, and EuroGP. The 24 revised full papers and 7 short papers presented in this book were carefully reviewed and selected from 66 submissions. They cover a wide range of topics and application areas, including generative approaches to music and visual art, deep learning, and architecture.

Soundscape Ecology Almo Farina, 2013-10-28 Soundscape Ecology represents a new branch of ecology and it is the result of the integration of different disciplines like Landscape ecology, Bioacoustics, Acoustic ecology, Biosemiotics, etc. The soundscape that is the object of this discipline, is defined as the acoustic context resulting from

natural and human originated sounds and it is considered a relevant environmental proxy for animal and human life. With Soundscape Ecology Almo Farina means to offer a new cultural tool to investigate a partially explored component of the environmental complexity. For this he intends to set the principles of this new discipline, to delineate the epistemic domain in which to develop new ideas and theories and to describe the necessary integration with all the other ecological/environmental disciplines. The book is organized in ten chapters. The first two chapters delineate principles and theory of soundscape ecology. Chapters three and four describe the bioacoustic and communication theories. Chapter five is devoted to the human dimension of soundscape. Chapters six to eight regard the major sonic patterns like noise, choruses and vibrations. Chapter nine is devoted to the methods in soundscape ecology and finally chapter ten describes the application of the soundscape analysis.
