**The Clinical Companion of the Donkey** The Donkey Sanctuary, 2018  
International animal welfare charity The Donkey Sanctuary is launching The Clinical Companion of the Donkey, the revised version of The Professional Handbook of the Donkey, which has been the definitive text for clinicians and professionals working in donkey medicine or surgery for over twenty years. Now in an easy-to-read and easy-to-navigate format over its 360 pages, this updated paperback includes current and extra information in a bid to improve the health and welfare of donkeys worldwide by sharing knowledge and providing further education. Without covering the same ground as other excellent textbooks, The Clinical Companion of the Donkey concentrates on those differences in the equine species that are specific to the donkey. A new chapter on donkey behaviour has been included, as this is fundamental to understanding this unique animal and the presentation of clinical signs and requirements for handling, nursing and treatment. Technical colour illustrations have been included using images from the extensive libraries at The Donkey Sanctuary, as well as those private collections that belong to contributors. This book will also be available as translated versions over the following months. Created with heart and keen intelligence, The Clinical Companion of the Donkey has all the attributes of the animal it aims to aid, and will surely be the textbook of professionals involved with donkeys for years to come.

**Elementary Psychology** S.M. Mohsin, 2002-04 In Elementary psychology the author has presented the subject in such a way that the student is able to understand the basic facts and theories in the background of real-life situations. Well before a new term or concept is introduced, the reader is prepared in advance to understand and accept it. An attempt is made in the present work to bring the topic of learning much closer to the readers life and endeavours and to integrate it with his day-to-day experiences of the world around him. In this treatment of motivation and personality, the author has drawn liberally upon his knowledge of psycho-pathology and the facts of social behaviour without which an understanding of the underlying dynamics of behaviour is not possible. An additional special feature of the book is the chapter on intelligence and aptitudes which prepares the student for a full-

dress discourse on techniques of test construction at a later stage in his study of the subject.
