You Can Train Your Horse to Do Anything! Shawna Karrasch, 2012-12-17 If you have ever wished you could get your horse to consistently perform to the best of his ability, *On Target Training* is for you. This effective new method combines the basics of clicker training (widely used on marine mammals and dogs) with a step-by-step target system that assures training success for any breed or any age horse. Karrasch explains reward reinforcement training in a way that makes it easy to learn. She guides the reader through all the basics, including teaching the bridge signal (using the clicker) and employing hand-held and stationary targets; she then covers aspects of training horses both on the ground and under saddle. Training advice is provided for: specific riding disciplines < jumping, Western riding, dressage, and trail; behavior problems; trailer loading; working with young horses; and last of all, just for fun, teaching tricks. Shawna says: "A degree in psychology is not required to train animals. It is, however, helpful. All of the work we do as animal trainers (with horses too) is based in psychology, whether we are aware of it or not. The more you understand about these proven principles the better you are as a trainer. The focus of my training is helping people to gain a better understanding of behavioral psychology and the benefits of positive reinforcement in regards to horse training. I chose to make the move to horses partly due to the lack of positive reinforcement being used with horses. I recognized that horses were not trained the same as the marine mammals. I also saw that the training we implemented at Sea World would be a huge asset to the horse world. A lot of horse people, including professionals, don't know much about the proven principles of behavioral psychology. Therefore, I see a bigger need in helping horse folk to further understand the principles that govern the relationships we build with our horses.. It is really fun to see the light come on!!"

Positive Horses Patti Dammier PhD, 2019-09-25 Horse training isn't a mystical procedure. In fact, there isn't mystery in the methods necessary to teach any skill. To learn any skill there is a logical sequence that if adhered to, allows a behavior to be taught and learned. Creating a Positive Horse consists of using positive methods, which in turn creates a positive attitude. Positive Horses explains those positive methods necessary to create horses that perform on taught/learned cues, both on the ground and in the saddle that are systematically rewarded, but also have an extremely positive attitude to their trainer/companion. The system uses the method, 'Behavior Modification'. This book is about: • Explanation of basic educational methods using systematic sequences that support training horses. • Creating the goals and objectives for each individual horse rather than a "one size fits all" approach. • Training using positive reinforcement— how food rewards creates useable cues, instead of the trainer performing meaningless behavior that the horse doesn't understand. • Horses learning basic cues: come, stand, walk on, and halt, which provides safety on the ground and assists in the next work in the saddle. • Applying basic training to other equestrian disciplines. • Addressing training method failure, because the trainer doesn't assess the correct the behavior to reward and doesn't understand the methods. • Horse case studies exemplifying the use of behavioral methods.

Behavior Modification for Horses Patti Dammier PhD, 2019-04-06 Unlock the myth and mystery surrounding the current horse training literature. Understand the reasons that make any horse training method work. Use the effective methods developed by research scientists that created the powerful tools of behavior modification that can help trainers and riders create successful horse performance. Learn the power of behavior modification that allows any horse behavior or training method to be explained. Create reasonable, achievable lessons for your horse. Create rider aids and cues that truly reward the horse. Increase desirable horse behavior while decreasing the undesirable. Learn step-by-step lessons to train horse behavior. Behavior Modification for Horses was written by a rider and trainer with over twenty-five years of experience working with the best riding masters in Europe. Patti Dammier brings the best expertise of both worlds: horse training and a professional background as an educator and researcher—an innovative approach that takes the work of scientists and explains behavior modification based on horses. It is time to move away from the trendy and quick-fix horse-training methods and learn the basic principles of behavior modification that teaches anyone to create a positive training environment and a method to obtain desirable behavior from horses.
