The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

Social Media in Industrial China Xinyuan Wang,2016-09-13 Life outside the mobile phone is unbearable.' Lily, 19, factory worker. Described as the biggest migration in

human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise 'homeless'. Wang's fascinating study explores the full range of preconceptions commonly held about Chinese people – their relationship with education, with family, with politics, with 'home' – and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

The Emoji Code Vyvyan Evans, 2017-08 Drawing from disciplines as diverse as linguistics, cognitive science, psychology, and neuroscience, *The Emoji Code* explores how emojis are expanding communication and not ending it. For all the handwringing about the imminent death of written language, emoji—those happy faces and hearts—is not taking us backward to the dark ages of illiteracy. Every day 41.5 billion texts are sent by one quarter of the world, using 6 million emoji. Evans argues that these symbols enrich our ability to communicate and allow us to express our emotions and induce empathy—ultimately making us all better communicators. Vyvyan Evans's *Emoji Code* charts the evolutionary origins of language, the social and cultural factors that govern its use, change, and development; as well as what it reveals about the human mind. In most communication, nonverbal cues are our emotional expression, signal our personality, and

are our attitude toward our addressee. They provide the essential means of nuance and are essential to getting our ideas across. But in digital communication, these cues are missing, which can lead to miscommunication. The explosion of emoji, in less than four years, has arisen precisely because it fulfills exactly these functions which are essential for communication but are otherwise absent in texts and emails. Evans persuasively argues that emoji add tone and an emotional voice and nuance, making us more effective communicators in the digital age.

Linguistic Politeness in Online Communication Hendi Pratama, 2019-09-01 Politeness is a big theme in the studies of pragmatics. It has been discussed for the last seventy years and yet certain depth can still be added into the body of works. This book is written to connect the classical theories of politeness and the practical applications of politeness in the digital age. Today, we are faced with two kinds of interactions due to technological advancements: face-to-face interaction and cyber interaction. Both interactions seem to use the same mechanism of semantics and pragmatics. However, in reality, they have gaps. With this in mind, I feel the urge to make those gaps explicit. Those discrepancies between face-to-face and cyber interaction may not be intuitive. Even in some cases, they are counter-intuitive. We, human beings, have been utilizing face-to-face interaction for at least forty thousand years, yet in the last twenty years, cyber communication has been infiltrating our life. The infiltration started with small and limited application like email and short messages but now the infiltration has been securing some hours of our daily communications among human beings. Humans from all ages plunge in the arena of cyber communication. We may have had the assumption of face-to-face interaction politeness

principles and features transferred to its cyber counterpart and vice versa. Some of those politeness principles and features work well in both worlds. Those are human-made principles and used in the human world anyway. However, it is so often some principles, which work well in a medium, fail to convert comfortably in the other medium.

Information and Communication Technologies in Tourism 2018 Brigitte Stangl, Juho Pesonen, 2017-12-22 This book presents the latest research into the application of information and communication technologies within the travel and tourism sectors. Readers will find insightful contributions on a wide range of topics, including digital marketing, social media and online travel reviews, mobile computing, augmented and virtual reality, gamification, recommender systems, electronic distribution, online education and learning, and the sharing economy. Particular attention is devoted to the actual and potential impact of big data, and the development and implementation of digital strategies, including digital marketing and the digital economy. In addition to the description of research advances and innovative concepts, a number of informative case studies are presented. The contents of the book are based on the 2018 ENTER eTourism conference, held in Jönköping, Sweden. The volume will appeal to all academics and practitioners with an interest in the most recent developments in eTourism.

The Semiotics of Emoji Marcel Danesi, 2016-11-17 Shortlisted for the BAAL Book Prize 2017 Emoji have gone from being virtually unknown to being a central topic in internet communication. What is behind the rise and rise of these winky faces, clinking glasses and smiling poos? Given the sheer variety of verbal communication on the internet and English's still-controversial role as lingua mundi for the web, these icons have

emerged as a compensatory universal language. The Semiotics of Emoji looks at what is officially the world's fastest-growing form of communication. Emoji, the colourful symbols and glyphs that represent everything from frowning disapproval to red-faced shame, are fast becoming embedded into digital communication. Controlled by a centralized body and regulated across the web, emoji seems to be a language: but is it? The rapid adoption of emoji in such a short span of time makes it a rich study in exploring the functions of language. Professor Marcel Danesi, an internationally-known expert in semiotics, branding and communication, answers the pertinent questions. Are emoji making us dumber? Can they ultimately replace language? Will people grow up emoji literate as well as digitally native? Can there be such a thing as a Universal Visual Language? Read this book for the answers.

Data for the People Andreas Weigend, 2017-01-31 A long-time chief data scientist at Amazon shows how open data can make everyone, not just corporations, richer Every time we Google something, Facebook someone, Uber somewhere, or even just turn on a light, we create data that businesses collect and use to make decisions about us. In many ways this has improved our lives, yet, we as individuals do not benefit from this wealth of data as much as we could. Moreover, whether it is a bank evaluating our credit worthiness, an insurance company determining our risk level, or a potential employer deciding whether we get a job, it is likely that this data will be used against us rather than for us. In Data for the People, Andreas Weigend draws on his years as a consultant for commerce, education, healthcare, travel and finance companies to outline how Big Data can work better for all of us. As of today, how much we benefit from Big Data depends on how closely the interests of big companies align with our own. Too often, outdated standards of control and privacy force us into unfair contracts with data companies, but it doesn't have to be this way. Weigend makes a powerful argument that we need to take control of how our data is used to actually make it work for us. Only then can we the people get back more from Big Data than we give it. Big Data is here to stay. Now is the time to find out how we can be

empowered by it.

Digital Media Practices in Households Larissa Hjorth, Kana Ohashi, Jolynna Sinanan, Heather Horst, Sarah Pink, Fumitoshi Kato, Baohua Zhou, 2020-07-10 How are intergenerational relationships playing out in the digital rhythms of the household? Through extensive fieldwork in Tokyo, Shanghai and Melbourne, this book ethnographically explores how households are being understood, articulated and defined by digital media practices. It explores the rise of self-tracking, quantified self and informal practices of care at distance as part of contemporary household dynamics.

Smartphone Communication Francisco Yus, 2021-09-05 This book offers a unique model for understanding the cognitive underpinnings, interactions and discursive effects of our evolving use of smartphones in everyday app-mediated communication, from text messages and GIFs to images, video and social media apps. Adopting a cyberpragmatics framework, grounded in cognitive pragmatics and relevance theory, it gives attention to how both the particular interfaces of different apps and users' personal attributes influence the contexts and uses of smartphone communication. The communication of emotions – in addition to primarily linguistic content – is foregrounded as an essential element of the kinds of ever-present paralinguistic and phatic communication that

characterises our exchange of memes, GIFs, likes, and image- and video-based content. Insights from related disciplines such as media studies and sociology are incorporated as the author unpacks the timeliest questions of our digitally mediated age. Aimed primarily at scholars and graduate students of communication, linguistics, pragmatics, media studies, and sociology of mass media, Smartphone Communication traffics in topics that will likewise engage upper-level undergraduate students.

Emotions, Technology, Design, and Learning Sharon Y. Tettegah, Martin Gartmeier, 2015-10-07 Emotions, Technology, Design, and Learning provides an update to the topic of emotional responses and how technology can alter what is being learned and how the content is learned. The design of that technology is inherently linked to those emotional responses. This text addresses emotional design and pedagogical agents, and the emotions they generate. Topics include design features such as emoticons, speech recognition, virtual avatars, robotics, and adaptive computer technologies, all as relating to the emotional responses from virtual learning. Addresses the emotional design specific to agent-based learning environments Discusses the use of emoticons in online learning, providing an historical overview of animated pedagogical agents Includes evidence-based insights on how to properly use agents in virtual learning environments Focuses on the development of a proper architecture to be able to have and express emotions Reviews the literature in the field of advanced agent-based learning environments Explores how educational robotic activities can divert students' emotions from internal to external

Computer-mediated Communication Susan C. Herring,1996-01-01 Text-based interaction among humans connected via computer networks, such as takes place via email and in synchronous modes such as chat, MUDs and MOOs, has attracted considerable popular and scholarly attention. This collection of 14 articles on text-based computer-mediated communication (CMC), is the first to bring empirical evidence from a variety of disciplinary perspectives to bear on questions raised by the new medium.The

first section, linguistic perspectives, addresses the question of how CMC compares with speaking and writing, and describes its unique structural characteristics. Section two, on social and ethical perspectives, explores conflicts between the interests of groups and those of individual users, including issues of online sex and sexism. In the third section, cross-cultural perspectives, the advantages and risks of using CMC to communicate across cultures are examined in three studies involving users in East Asia, Mexico, and students of ethnically diverse backgrounds in remedial writing classes in the United States. The final section deals with the effects of CMC on group interaction: in a women s studies mailing list, a hierarchically-organized workplace, and a public protest on the Internet against corporate interests.
