*Guide to North American Railroad Hot Spots* J. David Ingles,2001 A compilation of the best places to watch trains in operation across North America. Each entry includes a photos, general location, directions from the nearest highway, list of operating railroads, and the type and regularity of trains operating. Also includes railroad radio frequencies, scenic highlights, photography tips, safety considerations and other relevant travel information.

*Hot Spot* Michael Craft,2003-06-04 During his distinguished career as a journalist, Mark Manning has seen it all--riots, murder, political corruption, and every manifestation of the dark heart of the human species. But even his proven emotional resources will be stretched when the home he shares with his lover, architect Neil Waite, and his ward and nephew, Thad Quatrain, becomes the site of one of the most daunting, taxing, and potentially dangerous of all human rituals--a wedding. Roxanne Exner, best friend to both Mark and Neil, is having her nuptial ceremony at their house in the normally bucolic Dumont, Wisconsin, partly because Carl Creighton, her husband to be, is in the final weeks of his campaign for lieutenant governor of Illinois. For Roxanne, Dumont will afford some needed distance from the campaign, and for the city of Dumont, it will be the social event of the season. The wedding, despite everyone's fears, comes off with nary a hitch. The reception, however, takes a disastrous turn when a local matron, who happens to be a major donor to the campaign of Creighton's rival, is killed in what appears to be a freak electrical mishap. Authorities soon discover that the electrocution was no accident. Then another shocker--Roxanne herself becomes the prime suspect. If Roxanne is ever to enjoy her honeymoon, and if Carl and his running mate are to stand a chance of election, Mark finds himself in a race against the clock to solve a most perplexing murder.

The author, a leading name in the environmental economics community, examines the problem of urban smog in cityscapes and the difficulty of achieving cost-effective controls. Analyzing the key areas of urban smog, low-level ozone and volatile organic compound emissions and their impact on health and welfare of communities this text assesses and evaluates the performance of emissions trading systems and suggests alternative market designs for incentive control of pollution. Taking a well-reasoned approach to the contentious area of the use of market incentives to achieve environmental goals, it provides a study of the pioneering cap-and-trade market, particularly focusing on its poor performance in Chicago.
