**Police Ethics** Michael A. Caldero, John P. Crank, 2014-10-13 This book provides an examination of noble cause, how it emerges as a fundamental principle of police ethics and how it can provide the basis for corruption. The noble cause — a commitment to doing something about bad people — is a central ends-based police ethic that can be corrupted when officers violate the law on behalf of personally held moral values. This book is about the power that police use to do their work and how it can corrupt police at the individual and organizational levels. It provides students of policing with a realistic understanding of the kinds of problems they will confront in the practice of police work.

The United Kingdom and Nuclear Deterrence Jeremy Stocker, 2013-05-13 In December 2003 the British government announced that within a few years it would need to take decisions about the future of Britain's strategic nuclear deterrent. Exactly three years later, its plans were revealed in a White Paper. The existing Trident system is to be given a life-extension, which includes building new submarines to carry the missiles, costing £15–20 billion. Britain has a substantial nuclear legacy, having owned nuclear weapons for over half a century. The strategic context for the deterrent has changed completely with the end of the Cold War, but nuclear weapons retain much of their salience. This Adelphi Paper argues that it makes sense to remain a nuclear power in an uncertain and nuclear-armed world. Given that deterrence needs are now less acute, but more complex than in the past, the paper asserts that deterrence also needs to be aligned with non-proliferation policies, which seek to reduce the scale of threats that need to be deterred. Somewhat overlooked in current policy are appropriate measures of

defence, which can raise the nuclear threshold and, if required, mitigate the effects of deterrence failure. It concludes that the government's decisions about the future form of the deterrent are very sensible, but cautions that they still need to be integrated into a broader policy that embraces diplomacy, deterrence and defence to counter the risks posed by nuclear proliferation.

**Landscape Ecology in Action** A. Farina, 2012-12-06 In my office I am encased in bookshelves which hold an accumulation of literature on ecology that represents the papers and books over the last 50 years. My students enjoy rummaging through this collection because it contains a record of the history of ecology and is full of surprises. Some of the most recent material pertains to landscape ecology, a subject that literally emerged fully active at the Veldhoven International Congress organized by the landscape ecologists of The Netherlands in 1981. The subject has developed quickly. It has one or more journals, which publish short works. It has a series of text books. And, it has just begun a series on monographs. One of the textbooks in landscape ecology is titled *Principles and Methods in Landscape Ecology* and was written by the Italian ecologist Almo Farina in 1998. My students like this text especially well because it is direct, to the point and comprehensive. Farina is on loan much of the time. In the present volume Almo Farina again addresses the subject of Landscape Ecology but from a different perspective than he took in his textbook. *Landscape in Action* focuses on the application of the principles and concepts to problem solving. The two books make a pair, with the first technical and conceptual and the second applied to problems of land and water at large scale.

**Structural Engineering Compendium I** Journal Editors, 2002-02-06

This compendium is made up of a selection of the best and most representative papers from a group of Elsevier's structural engineering journals. Selections were made by the journal's editorial teams. The papers appeared in the following journals during 2000: Journal of Constructional Steel Research P.J. Dowling, J.E. Harding, R. Bjorhovde Thin Walled Structures J. Loughlan, K.P. Chong Engineering Structures P.L. Gould Computers and Structures K.J. Bathe, B.H.V. Topping Construction and Building Materials M.C.

Forde Journal of Wind Engineering & Industrial Aerodynamics N.P. Jones Marine Structures P.A. Frieze, A. Mansour, T. Yao Each paper appears in the same format as it was published in the journal; citations should be made using the original journal publication details. It is intended that this compendium will be the first in a series of such collections. A compendium has also been published in the area of geotechnical engineering.

Hot Spots Lynda Gratton, 2007-02 Sometimes within an organization, condensed periods of growth and innovation occur. For a short period of time, new ideas flow freely and cooperation and success attain levels that exceed all expectations. These periods are called hot spots. This book takes a detailed look at how and why hot spots happen, and shows that it's possible to create them. In order to do so, entrenched rules about command and control must be discarded, since hot spots can't be commanded, nor can they be controlled. Instead, they are a naturally emerging phenomena. But, that doesn't mean that organizations have to wait for them to arise. Gratton offers techniques and strategies that can create a more productive environment, one in which hot spots are anticipated, recognized, and embraced -- an environment that carries the organization beyond its pre-set goals and boundaries and to new levels of growth and energy.

Handbook on Public and Private Security Erwin Blackstone, Simon Hakim, Brian J. Meehan, 2023-11-08 This Handbook discusses the use of public-private partnerships in law enforcement and security. Written by international experts across multiple disciplines, chapters include case studies and cross-sectional industry-wide studies of private security performance in comparison with public police and collaborated experiences of the two sectors. The Handbook uses existing experiences and public economics to suggest

how to improve security and social welfare through greater competition and cooperation between public and private security. This volume provides an integrated framework to assist policymakers in both public and private agencies. This Handbook will be an important reference for scholars in public economics, public administration, criminology, and criminal justice, as well as professionals and policymakers in the public and private sectors.

**Perspectives on Crime Reduction** Tim Hope, 2017-11-22 This title was first published in 2000: The papers in this volume are concerned with the prevention of crime. Like other books in the International Library, the text is intended primarily for reference by those who need to reflect upon what criminology has had to say about important, contemporary concerns of criminal policy. The papers present a kind of history of ideas which together trace the emergence of some key components of contemporary thinking about reducing crime.

**Combating Organised Crime** Council of Europe. Octopus Programme, 2004-01-01 This publication contains a number of best practice studies on effective measures to combat organised crime, corruption and money laundering, which have been prepared by the Council of Europe between 1998 and 2003. Topics covered include: witness protection; reversing the burden of proof in confiscating the proceeds of crime; interception of communication and intrusive surveillance; crime analysis; cross-border co-operation; provisions on membership in criminal organisations; co-operation against trafficking in human beings; and preventive legal measures against organised crime. The term Octopus is the name of a technical co-operation programme against corruption and organised crime initiated by the Council of Europe in 1996.

Introducing Criminological Thinking Jon Heidt, Johannes P.

Wheeldon,2014-11-28 Visual techniques for applying criminological theory to social science research Introducing Criminological Thinking: Maps, Theories, and Understanding is an accessible and user-friendly criminological theory text for students, instructors and researchers. In addition to the unique use of concept maps, mind maps, and other visual techniques to consider theory-based inquiry, this text combines an exploration of the core elements of theory with relevant examples drawn from biology, psychology, sociology, critical traditions, and integrative efforts. Unlike in other theory texts, the chapters are arranged by level of explanation to help students understand how theories from different disciplines interact with each other as a foundation for many contemporary criminological theories. Authors Jon Heidt and Johannes Wheeldon have developed a seven-step model to identify key aspects of different theories including their historical and social context, base assumptions, scope, problem foci, terms/concepts, related research, and practical ramifications. This text offers both a student-friendly theoretical discussion and accessible visual examples to explain criminological theory and its applicability to social science research.

**Tree Biotechnology** Kishan Gopal Ramawat,Jean-Michel Mérillon,M. R. Ahuja,2014-04-01 Forest trees cover 30% of the earth's land surface, providing renewable fuel, wood, timber, shelter, fruits, leaves, bark, roots, and are source of medicinal products in addition to benefits such as carbon sequestration, water shed protection, and habitat for 1/3 of terrestrial species. However, the genetic analysis and breeding of trees has lagged behind that of crop plants. Therefore, systematic conservation, sustainable improvement and pragmatic utilization of trees are global priorities. This book provides comprehensive and up to date information about tree characterization,

biological understanding, and improvement through biotechnological and molecular tools.

**The Complete Guide to Property Development for the Small Investor** Catherine Dawson, 2009-02-03 The Complete Guide to Property Development for the Small Investor covers every stage of property development. Including both practical 'how-to' advice and important guidance on making a profit from property. This new edition constitutes an essential handbook that is both comprehensive and user-friendly. Containing practical checklists and extensive details on useful addresses and websites, the book also provides updates on essential legislative changes that will have an impact on both new and experienced developers. This fully revised and updated third edition includes vital new information on: changes to tax/VAT incentives; the impact of the credit crunch on the UK property market (and the potential opportunities it offers); the rise and fall (and potential rise again) of the buy-to-let market; and the latest rules and regulations affecting both landlords and tenants.

**Hot Spot: North America and Europe** Joseph R. Rudolph Jr.,2008-06-30 Even in the relatively serene world of North America and Western Europe, numerous conflicts with the propensity for sustained political violence are carried out by domestic groups with alarming regularity. This in-depth volume explores conflicts and potential hot spot areas in these regions, from anti-globalization protests to immigration politics to the Basque provinces and the ETA. Coverage is divided into three regions—the established democracies of the U.S., Canada, and Western Europe; the democratizing countries of post-communist Europe; and the more volatile region encompassing Russia, the Balkans, the Causasus, and Post-Soviet Eastern Europe—for a greater understanding of geographic interrelationships. This comprehensive volume is a first-stop reference source for the most significant political, cultural, and economic conflicts in North America and Europe today.

Comparative Criminal Justice Systems Shahid M. Shahidullah, 2012  
Written for students of criminal justice, *Comparative Criminal Justice Systems: Global and Local Perspectives* examines the nature of crime and justice in varying countries and cultures in North America, Europe, Asia, Africa, and Latin America. Using a topical approach, it compares different systems of crime and justice in terms of their differences from, and similarities to, the laws and institutions of modern criminal justice, focusing on the United States as a standard of comparison. By examining different criminal justice systems in terms of their local peculiarities and understanding their change and continuity, readers will gain a well-rounded international perspective of the world's varying systems of criminal justice. Key Features: - Explores the rise of modern criminology and the criminal justice system in the nineteenth century. It is critical for students to understand the history of modern systems to fully comprehend the varying nature of today's main legal systems, focusing on the United States as a standard of comparison. -Employs a topical approach to examine the criminal justice systems in varying countries in Europe, Asia, Africa, and Latin America, including comparative views on law enforcement, judicial systems, corrections, due process of law, and search and seizures. -Includes discussions on comparative processes of criminalization and decriminalization on such issues as domestic

violence, child abuse, homosexuality, and sexual harassment. -Discusses new global crimes and their impact on modern and traditional criminal justice systems, including human smuggling, global sex trade, global illegal drug trade, illegal trafficking of conventional military weapons, money laundering, cybercrime, and global terrorism. -Discussion questions ensure that student's grasp the core theoretical concepts.
