Mobile Media and Social Intimacies in Asia Jason Vincent A. Cabañes, Cecilia S. Uy-Tioco, 2020-01-09 This edited volume brings together cutting-edge studies from emerging scholars of East/Southeast Asia who explore the role of mobile media in the contemporary transformation of the region's social intimacies, from the romantic to the familial to the communal. By providing a regional and transnational overview of such studies, it affords new insights into how these mobile technologies have contributed to the rise of 'glocal intimacies'. This pertains to the normalisation and intensification of how people's relationships of closeness are entangled in the ever-shifting and constantly negotiated flows between global modernity and local everyday life. In providing case studies of mobile media and glocal intimacies, the chapters in the volume attend to a broad range of countries that include China, Korea, Malaysia, the Philippines, Singapore, Vietnam, and Taiwan. This illustrates the differing ways in which mobile media might be embedded in the region's divergent articulations of social intimacies, which reflect the ongoing tensions between Western and Asian imaginaries of modernity. The chapters also discuss a wide array of mobile media that people use, from social media platforms like Facebook and Instagram, to messaging apps like KakaoTalk and WhatsApp, to dating apps like Tinder and Blued. This allows for a mapping out of the different levels of impact that mobile media might have on social intimacies in a region that contains some of the most technologically advanced as well as the most technologically behind societies in the world. In summary, this book allows readers to take a comparative approach to understanding the complexity of the glocal intimacies that are emerging from the ways people in Asia use mobile media to reconfigure their local ties and to enact global relationships. This volume will benefit students, academics, and researchers who are keen in media and communication, cultural studies, sociology, anthropology, and Asian studies. "This exciting and much-needed book will greatly advance our efforts to decolonise media and communications research. The chapters offer empirically rich and nuanced accounts that challenge the dominant paradigms about mediated intimacy." Mirca Madianou, Goldsmiths, University of London "This collection develops the original concept of 'glocal intimacies' to describe how mobile media have become a crucial site where new social intimacies are enacted, reinforced and transformed in Asia. It introduces fresh empirical research from emerging scholars to furnish deep theoretical insights into these imaginaries and practices." Audrey Yue, National University of Singapore

Mediated Interfaces Katie Warfield, Crystal Abidin, Carolina Cambre, 2020-05-14 Images of faces, bodies, selves and digital subjectivities abound on new media platforms like Snapchat, Instagram, YouTube, and others-these images represent our new way of being online and of becoming socially mediated. Although researchers are examining digital embodiment, digital representations, and visual vernaculars as a mode of identity performance and management online, there exists no cohesive collection that compiles all these contemporary philosophies into one reader for use in graduate level classrooms or for scholars studying the field. The rationale for this book is to produce a scholarly fulcrum that pulls together scholars from disparate fields of inquiry in the humanities doing work on the common theme of the socially mediated body. The chapters in *Mediated Interfaces: The Body on Social Media* represent a diverse list of contributors in terms of author representation, inclusivity of theoretical frameworks of analysis, and geographic reach of empirical work. Divided into three sections representing three dominant paradigms on the socially mediated body: representation, presentation, and embodiment, the book provides classic, creative, and contemporary reworkings of these paradigms.

Custodians of the Internet Tarleton Gillespie, 2018-01-01 Most users want their Twitter feed, Facebook page, and YouTube comments to be free of harassment and porn. Whether faced with 'fake news' or livestreamed violence, 'content moderators'--who censor or promote user-posted content--have never been more important. This is especially true when the tools that social media platforms use to curb trolling, ban hate speech, and censor pornography can also silence the speech you need to hear. [The author] provides an overview of current social media practices and explains the underlying rationales for how, when, and why these policies are enforced. In doing so, [the author] highlights that content moderation receives too little public scrutiny even as it shapes social norms and creates consequences for public discourse, cultural production, and the fabric of society. Based on interviews with content moderators, creators, and consumers, this ... book is ... for anyone who's ever clicked 'like' or 'retweet.'--

Cyberbullies, Cyberactivists, Cyberpredators Lauren Rosewarne, 2016-01-25 Written by an expert in media, popular culture, gender, and sexuality, this book surveys the common archetypes of Internet users—from geeks, nerds, and gamers to hackers, scammers, and predators—and assesses what these stereotypes reveal about our culture's attitudes regarding gender, technology, intimacy, and identity. The Internet has enabled an exponentially larger number of people—individuals who are members of numerous

and vastly different subgroups—to be exposed to one other. As a result, instead of the simple jocks versus geeks paradigm of previous eras, our society now has more detailed stereotypes of the undesirable, the under-the-radar, and the ostracized: cyberpervs, neckbeards, goths, tech nerds, and anyone with a non-heterosexual identity. Each chapter of this book explores a different stereotype of the Internet user, with key themes—such as gender, technophobia, and sexuality—explored with regard to that specific characterization of online users. Author Lauren Rosewarne, PhD, supplies a highly interdisciplinary perspective that draws on research and theories from a range of fields—psychology, sociology, and communications studies as well as feminist theory, film theory, political science, and philosophy—to analyze what these stereotypes mean in the context of broader social and cultural issues. From cyberbullies to chronically masturbating porn addicts to desperate online-daters, readers will see the paradox in popular culture's message: that while Internet use is universal, actual Internet users are somehow subpar—less desirable, less cool, less friendly—than everybody else.
