168 Hours Laura Vanderkam,2011-05-31 It's an unquestioned truth of modern life: we are starved for time. We tell ourselves we'd like to read more, get to the gym regularly, try new hobbies, and accomplish all kinds of goals. But then we give up because there just aren't enough hours to do it all. Or if we don't make excuses, we make sacrifices- taking time out from other things in order to fit it all in. There has to be a better way...and Laura Vanderkam has found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead of letting the daily grind crowd out the important stuff, they start by making sure there's time for the important stuff. When plans go wrong and they run out of time, only their lesser priorities suffer. Vanderkam shows that with a little examination and prioritizing, you'll find it is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and write a novel without giving up quality time for work, family, and other things that really matter.

Combating Fiscal Fraud and Empowering Regulators Brigitte Unger, Lucia Rossel, Joras Ferwerda, 2021 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. *Combating Fiscal Fraud and Empowering Regulators* analyzes the impact of new international tax regulations on the scope and scale of tax evasion, tax avoidance, and money laundering. These are analyzed through an ecosystem framework in which, similar to a natural ecosystem, new tax regulations appear as heavy shocks to the tax ecosystem, to which the 'species' such as countries, corporations, and tax experts will react by looking for new loopholes and niches of survival. By analyzing the impact of tax reforms from different perspectives--a legal, political science, accounting, and economic one--one may derive an assessment of the reforms and policy recommendations for an improved international tax system. The ultimate goal is to combat fiscal fraud and empower regulators, in that line, this volume is intended for a broad audience that seeks to know more about the latest state of the art in the realm of taxation from a multidisciplinary perspective. The money involved amounts to billions in unpaid taxes that could be better used for stopping hunger, guaranteeing education, and safeguarding biodiversity, hence making this world a better one. Regulators can see this book as a guiding light of what has happened in the past forty years, and how the world has and will continue to change as a result of it. *Combating Fiscal Fraud and Empowering Regulators* is also a warning about new emerging tax loopholes, such as freeports or golden passports and visas, where residency can be bought in tax havens, even within the European Union. The main message is that inequality can and has to be reduced substantially and that this can be achieved through a well-working international tax system that eliminates secrecy, opaqueness, and tax havens.
