BOOK OF HOUSE PLANS WILLIAM HAROLD.
BUTTERFIELD, 2018

A Book of House Plans William Harold
Butterfield, 2015-06-30 Excerpt from *A Book of House Plans: Floor Plans and Cost Data of Original Designs of Various Architectural Types, of Which Full Working Drawings and Specifications Are Available To design a small country house possessing artistic and economic features, the construction of which may be accomplished for a minimum amount, is not among the simplest problems of the architectural profession. The most satisfactory solutions are arrived at by a process of elimination, resulting in a compact plan possessing the essential requirements of the average home-builder, and arranged in such a manner that the total area is proportionately divided to best suit the uses for which each unit of the plan is intended. The houses shown on the following pages have been carefully designed to meet the requirements of the average family desiring a house of moderate size and pleasing appearance. They are taken from the actual working drawings or from houses already erected. The aim of the authors has been to emphasize the really essential features and eliminate all that might be considered superfluous or not consistent in a house of moderate cost. Simplicity of plan and exterior treatment means economy but not*

necessarily ugliness. The success of an architectural design, in a building of any description depends principally upon its proportion, scale and fenestration, and no amount of elaboration can atone for a poorly proportioned building. Bearing all this in mind, we have planned our houses, knowing that the people who will live in them will prefer to have their rooms as large as possible for the price they pay and to have the construction and materials of the best throughout. We know that buildings cost so much per cubic foot or square foot of ground area. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
