Mediterranean Inspiration HomePlanners, Home Planners, inc, 2004 Few places stir the imagination and entice the senses like the sun-drenched lands of southern Europe. The timeless beauty of the coast slows life to a sensuous pace, where delights of jasmine and sea air, perfect white walls, and terra cotta roofs can be slowly savored. To follow the Mediterranean sun from the Aegean, past Sicily and along the Italian Riviera, beyond Cote d'Azur and the Spanish coast is to trace the home of ancient cultures -- Ottomans, Trojans, Romans, Carthaginians, Moors. We love the Mediterranean for the graceful way it cherishes its rich history. And when we bring the Mediterranean home -- in a row of slender columns or a softly arching window -- we share in its common, enduring beauty.

Mediterranean Inspiration shows you how to capture the pleasures of southern European life by bringing the region's distinctive architecture and design to your new home. Once you've learned about the area's rich and varied legacy, you'll find inspiration in our gallery of stunning Mediterranean-influenced homes. Inside, you'll find a selection of truly inspired plans for homes ranging from under 1,500 square feet to over 7,000 square feet. When you find the plan that's right for you, take advantage of our ordering service and begin fulfilling your dream of a Mediterranean retreat. Book jacket.

The New Mediterranean Gestalten,2019-09-19 A modernist take on Mediterranean aesthetics, a new movement in interior design embraces sumptuous minimalism through warm, earthy tones, and natural materials. In southern locations such as Australia, California, and Brazil, but also in places like New York and Copenhagen--the Mediterranean sensibility echoes itself in these locales through a variety of reasons, be it former colonial influences, a similar sunny climate, or simply an appreciation for the Mediterranean way of life. The New Mediterranean -- Homes and Interiors under the Southern Sun showcases inspiring residences and vacation homes around the world that combine rustic, earthy tones with colorful fabrics, ceramics and glass. The book introduces the designers, architects, and brands who are bringing the style to life, outlining key elements in order to show how to create this look at home. More than a design trend, this is a philosophy to transform interiors into havens of light, craftsmanship, and simplicity.

To Heal the Earth Ian L. McHarg,2007-04 Ian L. McHarg's landmark book *Design with Nature* changed the face of landscape architecture and planning by promoting the idea that the design of human settlements should be based on ecological principles. McHarg was one of the earliest and most influential proponents of the notion that an understanding of the processes that form landscapes should underlie design decisions. In *To Heal the Earth*, McHarg has joined with Frederick Steiner, a noted scholar of landscape architecture and planning, to bring forth a valuable cache of his writings produced between the 1950s and the 1990s. McHarg and Steiner have each provided original material that links the writings together, and places them within the historical context of planning design work and within the larger field of ecological planning as practiced today. The book moves from the theoretical-beginning with the 1962 essay *Man and Environment* which sets forth the themes of religion, science, and creativity that emerge and reappear throughout McHarg's work--to the practical, including discussions of methods and techniques for ecological planning as well as case studies. Other sections address the link between ecology and design, and the issue of ecological planning at a regional scale, covering topics such as education and training necessary to develop the field of ecological planning, how to organize and arrange biophysical information to reveal landscape patterns, the importance of incorporating social factors into ecological planning, and more. *To Heal the Earth* provides a larger framework and a new perspective on McHarg's work that brings to light the growth and development of his key ideas over a forty year period. It is an important contribution to the literature, and will be essential reading for students and scholars of ecological planning, as well as for professional planners and landscape architects.

Modernism and the Mediterranean Jan K. Birksted,2017-07-05 Situated in a Mediterranean landscape, the Maeght Foundation is a unique Modernist museum, product of an extraordinary collaboration between the architect, Jos?uis Sert, and the artists whose work was to be displayed there. The architecture, garden design and art offer a rare opportunity to see work in settings conceived in active collaboration with the artists themselves. By focusing on the relationship between this art foundation and its Arcadian setting, including Joan Mir?labyrinth, George Braque's pool, Tal-Coat's mosaic wall and Giacometti's terrace, Jan K. Birksted demonstrates how the building articulates many of the ideas that preoccupied this group of artists during the culminating years of their lives. The study pays special attention to the ways in which architecture can shape the experience of time, and addresses the Modernist desire for wilderness and its problematic roots in the classical Mediterranean ideal. In showing how the design of the Maeght Foundation is a Modernist representation of Mediterranean culture, the author has developed an interpretation of architecture that accommodates not only the architect's handling of material or function, but shows as well how it can be the embodiment of a particular vision of space and time.
