Big Green Purse Diane Maceachern, 2008-02-28 Read Diane McEachern's posts on the Penguin Blog. Protecting our environment is one of the biggest issues facing our planet today. But how do we solve a problem that can seem overwhelming-even hopeless? As Diane MacEachern argues in Big Green Purse, the best way to fight the industries that pollute the planet, thereby changing the marketplace forever, is to mobilize the most powerful consumer force in the world-women. MacEachern's message is simple but revolutionary. If women harness the power of their purse and intentionally shift their spending money to commodities that have the greatest environmental benefit, they can create a cleaner, greener world. Spirited and informative, this book: - targets twenty commodities-cars, cosmetics, coffee, food, paper products, appliances, cleansers, and more-where

women's dollars can make a dramatic difference; - provides easy-to-follow guidelines and lists so women can choose the greenest option regardless of what they're buying, along with recommended companies they should support; - encourages women to spend wisely by explaining what's worth the premium price some green products cost, what's not, and when they shouldn't spend money at all; and - differentiates between products that are actually green and those that are simply marketed as ecofriendly. Whether readers want to start with small changes or are ready to devote the majority of their budget to green products, MacEachern offers concrete and immediate ways that women can take action and make a difference. Empowering and enlightening, Big Green Purse will become the green shopping bible for women everywhere who are asking, What can I do?

Is It Really Green? Georgina Wilson-Powell, 2021-01-07 Find clarity on everyday green-living dilemmas to maximise your sustainability Are paper bags always more environmentally friendly than plastic? How much better for the planet are electric cars? What saves more water - using the dishwasher or washing up by hand? We all want to do the right thing for the planet, but with so many factors at play it can be difficult to work out which is the greenest way. With answers to the everyday green-living questions, *Is it really green?* cuts through the confusion and gives you the facts. Inside the pages of this e-book about eco-friendly living, you'll discover: - Answers to more than 140 everyday green-living questions - Advice on making all aspects of your home green like your kitchen, bathroom and wardrobe - How to shop sustainably - The big issues surrounding the climate crisis and what you can do about it - Practical advice on living green everyday including transport and travel as well as managing family and relationships Get to the heart of each eco-conundrum, interrogate your instincts, and make informed decisions to reduce your ecological footprint. *Combat Everyday Eco-Dilemmas* This book sheds light on the consequences of our everyday decisions and helps you feel

empowered to do what you can to make a positive impact on the future of our planet. Whether it's choosing a vegan lifestyle, taking steps towards zero-waste living, or cutting down on travel, every small adjustment to the way we live counts.

All You Need Is Less Madeleine Somerville, 2014-04-21 Most eco-friendly books start with terror-inducing lists of the carcinogenic chemicals you are liberally slathering all over every single surface in your house, painting most people as unwitting eco-villains, happily Lysol-ing your way straight to hell. Well, readers can just relax and unpack the (plastic) bags – no guilt trips today! At this point I think we all know that cleaning with bleach is bad and pop cans should go into the recycling – we're beyond that, yes? **All You Need Is Less** is about realistically adopting an eco-friendly lifestyle without either losing your mind from the soul-destroying guilt of using a plastic bag because you forgot your reusable ones in the trunk of your car (again), or becoming a preachy know-it all whom everyone loathes from the tips of her organically-shampooed hair to the toes of her naturally sourced recycled sandals. It's all gotten kind of complicated, hasn't it? These days you're not "green" enough unless you quit your day job and devote your entire life to attaining an entirely carbon neutral lifestyle or throw out all of your possessions and replace them with their new "green" alternatives. This whole eco-friendly thing seems to have devolved into a horrific cycle of guilt, shaming and one-upping, and as a result people are becoming exhausted and getting annoyed and, oh my god, we are living in a world where one of my grocery bags says "This reusable bag makes me better than you." It doesn't have to be this way. It is possible to take easy baby-steps towards a more earth-friendly lifestyle without stress, guilt, or judgy eco-shaming. Top eco blogger Madeleine Somerville is here with really original ideas on how to save money and the planet. Her ideas are even fun! Somerville has emerged as the voice of reason on urban homesteading that is stress-free, sanity-based and above all do-able.

From the book: Stop Using Disgusting Dryer Sheets Do y'all know that most dryer sheets coat use animal fats to coat your clothes with that 'fresh' fragrance? Yeah. It's disgusting. Switch to wool dryer balls, they're simple to make (plus a fun craft project for kids) and they work like a hot damn. Use Jars Instead of Travel Mugs 1. You can screw on the lid and literally throw a jar full o' coffee into your purse (no more balancing keys, coffee, files etc!) 2. It takes immense resources to manufacture and sell all those plastic/metal travel mugs which are often lost/forgotten You have old food jars hanging around anyway, why not make use of them? If they break or get lost, at least they were used one more time before reaching their final destination. I always get lots of compliments on my coffee jar.

That blatantly tells you that people are feeling the effects of the environment around them. We're not talking about good effects either. We're talking about chemicals in the food we eat, pollution of land, water and the air we

breathe. This also includes finite natural resources that's becoming scarce thus driving the cost up as demand for it continues, etc. In general, health issues have been on the rise due to a combination of all these things which drives the desire to make certain changes in one's lifestyle. This is why Sustainable Living - Practical Eco-Friendly Tips for Green Living and Self-Sufficiency in the 21st Century - [Special Edition Collection] had to be written. Sustainable living or some like to call it green living allows for a natural and as much as possible eco-friendly lifestyle. But this involves being educated on what it all means and finding out as much as possible about how to actually do it and make it a way of life. This Special Edition Collection covers a wide variety of subject matters to get you on the path to a healthier and eco-friendly environment. That's why I suggest reading every chapter; even the ones that you don't think you have an interest in because you're going to be surprised and learn something that can be shared with someone else you know. It inspires you to try doing some of the things mentioned. There are many references and sources to help you do that. From there you can take it to the next level.
