How To Boost Your Metabolism Karl Lendel, 2022-03-09 Some people think metabolism is a kind of organ, or a body part, that influences digestion. Actually, the metabolism isn't a body part. Metabolism, is the process of transforming food (e.g. nutrients) into fuel (e.g. energy). The body uses this energy to conduct a vast array of essential functions. In fact, your ability to read this page is driven by your metabolism. If you had no metabolism you wouldn't be able to move. In fact, long before you realized that you couldn't move a finger or lift your foot, your internal processes would have stopped, because the basic building blocks of life – circulating blood, transforming oxygen into carbon dioxide, expelling potentially lethal wastes through the kidneys and so on – all of these depend on metabolism. Although we think of our metabolism as a single function, it's really a catch-all term for countless functions that are taking place inside the body. Every second of every minute of every day of your life numerous chemical conversions are taking place through metabolism, or metabolic functioning. In a certain light, the metabolism has been referred to as a harmonizing process that manages to achieve two critical bodily functions that seem to be at odds with each other.

Fire Up Your Metabolism Lyssie Lakatos, Tammy Lakatos Shames, 2004-02-03 I can't lose weight because I have a terrible metabolism You may not realize it, but you can take control of your metabolism. Identical twins and registered dietitians, Lyssie Lakatos and Tammy Lakatos Shames embarked on a twin study to determine precisely what does -- and doesn't -- increase the rate at which our bodies burn calories and fat. Their findings? Small changes have big results. The nine weight-loss principles -- and the 200 tips that help you incorporate them into your lifestyle -- in *Fire Up Your Metabolism* are surprisingly simple: Eat breakfast before you get

to work. Learn which sugary snacks trump others (peanut M&Ms boost metabolism, but Twizzlers don't). Drink water, which is essential to burning calories. Always eat dinner, even if it's late. Focus on muscle building, not cardiovascular workouts. With Fire Up Your Metabolism, you won't have to avoid restaurants or follow a diet (though one is included if you like regimentation). The fatigue and distracting hunger that derail most dieters won't affect you because revving your metabolism is all about eating. You will enjoy breads and other carbohydrates. You will boost your metabolism with power proteins, including hamburgers, and avoid other proteins that bog you down. You will indulge in snacks you thought a dieter could never touch. Lyssie and Tammy's clients have experienced not only dramatic weight loss but also the thrill of having more energy than ever before. Now you, too, can rewire your metabolism to lose weight fast and forever.
