**Vivian Maier** John Maloof, 2012-10-30 Please note that all blank pages in the book were chosen as part of the design by the publisher. A good street photographer must be possessed of many talents: an eye for detail, light, and composition; impeccable timing; a populist or humanitarian outlook; and a tireless ability to constantly shoot, shoot, shoot, shoot and never miss a moment. It is hard enough to find these qualities in trained photographers with the benefit of schooling and mentors and a community of fellow artists and aficionados supporting and rewarding their efforts. It is incredibly rare to find it in someone with no formal training and no network of peers. Yet Vivian Maier is all of these things, a professional nanny, who from the 1950s until the 1990s took over 100,000 photographs worldwide—from France to New York City to Chicago and dozens of other countries—and yet showed the results to no one. The photos are amazing both for the breadth of the work and for the high quality of the humorous, moving, beautiful, and raw images of all facets of city life in America's post-war golden age. It wasn't until local historian John Maloof purchased a box of Maier's negatives from a Chicago auction house and began collecting and championing her marvelous work just a few years ago that any of it saw the light of day. Presented here for the first time in print, *Vivian Maier: Street Photographer* collects the best of her incredible, unseen body of work.

**Vivian Maier** John Maloof, 2014-10-28 The definitive monograph of American photographer Vivian Maier, exploring the full range and brilliance of her work and the mystery of her life, written and edited by noted photography curator and writer Marvin Heiferman; featuring 250 black-and-white images, color work, and other materials never seen before; and a foreword by New York Times bestselling author Laura Lippman. Vivian Maier's story—the secretive nanny-photographer during

her life who becomes a popular sensation shortly after her death—has, to date, been pieced together only from previously seen or known images she made and the handful of facts that have surfaced about her life. During her lifetime she shot more than 100,000 images, which she kept hidden from the world. In 2007, two years before her death, Chicago historic preservationist John Maloof discovered a trove of negatives, and roll upon roll of undeveloped film in a storage locker he bought at auction. They revealed a surprising and accomplished artist and a stunning body of work, which Maloof championed and brought to worldwide acclaim. Vivian Maier presents the most comprehensive collection and largest selection of the photographer's work—created during the 1950s through the 1970s in New York, Chicago, and on her travels around the country—almost exclusively unpublished and including her previously unknown color work. It features images of and excerpts from Maier's personal artifacts, memorabilia, and audiotapes, made available for the first time. This remarkable volume draws upon recently conducted interviews with people who knew Maier, which shed new light on Maier's photographic skill and her life.

**Data Mining in Large Sets of Complex Data** Robson Leonardo Ferreira Cordeiro,Christos Faloutsos,Caetano Traina Júnior,2013-01-11 The amount and the complexity of the data gathered by

current enterprises are increasing at an exponential rate. Consequently, the analysis of Big Data is nowadays a central challenge in Computer Science, especially for complex data. For example, given a satellite image database containing tens of Terabytes, how can we find regions aiming at identifying native rainforests, deforestation or reforestation? Can it be made automatically? Based on the work discussed in this book, the answers to both questions are a sound “yes”, and the results can be obtained in just minutes. In fact, results that used to require days or weeks of hard work from human specialists can now be obtained in minutes with high precision. Data Mining in Large Sets of Complex Data discusses new algorithms that take steps forward from traditional data mining (especially for clustering) by considering large, complex datasets. Usually, other works focus in one aspect, either data size or complexity. This work considers both: it enables mining complex data from high impact applications, such as breast cancer diagnosis, region classification in satellite images, assistance to climate change forecast, recommendation systems for the Web and social networks; the data are large in the Terabyte-scale, not in Giga as usual; and very accurate results are found in just minutes. Thus, it provides a crucial and well timed contribution for allowing the creation of real time applications that deal with Big Data of high complexity in which mining on the fly can make an immeasurable difference, such as supporting cancer diagnosis or detecting deforestation.

The Image of Whiteness Daniel C. Blight, 2022-07-05 How contemporary photographers from Hank Willis Thomas to Libita Clayton have subverted the constructions and complicities of whiteness. From the advent of early colonial photography in the 19th century to contemporary white savior social-media images, photography continues to play an integral role in the maintenance of white sovereignty. As various scholars have shown, the technology of the camera is not innocent, and neither are the images it produces. The invention and continuation of the white race is not just a political, social and legal phenomenon; it is also a complexly visual one. What does whiteness look like, and how might we begin to trace an antiracist history of artistic resistance that works against it? *The Image of Whiteness* seeks to introduce its reader to some important extracts from the troubling story of whiteness, to describe its falsehoods, its paradoxes and its oppressive nature, and to highlight some of the crucial work photographic artists have done to subvert and critique its image. *The Image of Whiteness* includes the work of artists Abdul Abdullah, Agata Madejska, Broomberg & Chanarin, Buck Ellison, John Lucas & Claudia Rankine, David Birkin, Hank Willis Thomas, Kajal Nisha Patel, Michelle Dizon & Viet Le, Nancy Burson, Nate Lewis, Libita Clayton, Paul

Mpagi Sepuya, Richard Misrach, Sophie Gabrielle, Stacy Kranitz and Stanley Wolukau-Wanambwa.

Personal Structures Karlyn de Jongh, Sarah Gold, 2013 *Personal Structures* presents an ongoing project that deals with questions concerning time, space and existence. This is the second book in the Time. Space. Existence series and involves the personal participation of 46 artists from different parts of the world, in a combination of internationally renowned artists and others whose oeuvre is less known. The concepts time, space and existence are highlighted in very personal ways and from unusual points of view. The many photographs of the artworks and encounters with the artists convey fascinating insights into their being, ideas and work. Seven art projects with established artists centralise their thoughts to a great extent. In addition, the book emphasises two *Personal Structures* exhibitions that were part of the Venice Biennale in 2011 and 2013. This publication also

contains several interviews, artists' statements, and symposium contributions that discuss the theme of this book in detail. *Personal Structures* was initiated in 2002 by the Dutch artist Rene Rietmeyer. His observation that even in the most distant places artists are occupied with time, space and existence, led to the idea of bringing several of these artists together in publications, symposia and exhibitions. English and Japanese text.

**The Zero-Waste Chef** Anne-Marie Bonneau, 2021-04-13 \*SHORTLISTED for the 2021 Gourmand World Cookbook Award\* \*SHORTLISTED for the 2022 Taste Canada Award for Single-

Subject Cookbooks\* A sustainable lifestyle starts in the kitchen with these use-what-you-have, spend-less-money recipes and tips, from the friendly voice behind @ZeroWasteChef. In her decade of living with as little plastic, food waste, and stuff as possible, Anne-Marie Bonneau, who blogs under the moniker Zero-Waste Chef, has preached that zero-waste is above all an intention, not a hard-and-fast rule. Because, sure, one person eliminating all their waste is great, but thousands of people doing 20 percent better will have a much bigger impact. And you likely already have all the tools you need to begin. In her debut book, Bonneau gives readers the facts to motivate them to do better, the simple (and usually free) fixes to ease them into wasting less, and finally, the recipes and strategies to turn them into self-reliant, money-saving cooks and makers. Rescue a hunk of bread from being sent to the landfill by making Mexican Hot Chocolate Bread Pudding, or revive some sad greens to make a pesto. Save 10 dollars (and the plastic tub) at the supermarket with Yes Whey, You Can Make Ricotta Cheese, then use the cheese in a galette and the leftover whey to make sourdough tortillas. With 75 vegan and vegetarian recipes for cooking with scraps, creating fermented staples, and using up all your groceries before they go bad--including end-of-recipe notes on what to do with your ingredients next--Bonneau lays out an attainable vision for a zero-waste kitchen.

**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the

twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Bringing Fusion to the U.S. Grid** National Academies of Sciences Engineering and Medicine, National Academy of Engineering, Division on Earth and Life Studies, Division on Engineering and Physical Sciences, Nuclear and Radiation Studies Board, Board on Energy and Environmental Systems, Board on Physics and Astronomy, Committee on the Key Goals and Innovation Needed for a U S Fusion Pilot Plant, 2021-11-17 Fusion energy offers the prospect of addressing the nation's energy needs and contributing to the transition to a low-carbon emission electrical generation infrastructure. Technology and research results from U.S. investments in the major fusion burning plasma experiment known as ITER, coupled with a strong foundation of

research funded by the Department of Energy (DOE), position the United States to begin planning for its first fusion pilot plant. Strong interest from the private sector is an additional motivating factor, as the process of decarbonizing and modernizing the nation's electric infrastructure accelerates and companies seek to lead the way. At the request of DOE, Bringing Fusion to the U.S. Grid builds upon the work of the 2019 report Final Report of the Committee on a Strategic Plan for U.S. Burning Plasma Research to identify the key goals and innovations - independent of confinement concept - that are needed to support the development of a U.S. fusion pilot plant that can serve as a model for producing electricity at the lowest possible capital cost.
