Stone Kraushaar

Hug Therapy Stone Kraushaar, 2019-09-15 Discover the healing power of hugs and how they can improve your life and your world in twenty-one days with this amazing guide. Dr. Stone's prescription is for a twenty-one-second hug today and every day. One of the many benefits of hugging is that longer hugs have proven physiological benefits. Hugs are good for your immune system, your stress response, your sleep patterns, and so much more. Hug Therapy brings to life the meaning of hugging. In this book, you will discover: What it means to really, truly give yourself and others the profound gift of a hug How to be powerfully in action and more aware of what matters to you most That you may choose to begin hugging some strangers . . . with their blessing of course And perhaps most importantly, that together, one literal or metaphorical hug at a time, we make the world a better, healthier, and more connected place. Hug Therapy shares a full-on, unconditional hug from Dr. Stone Kraushaar. In this book, he invites you to wrap your arms around yourself, your life, and everyone around you in a whole new way. A good embrace? a hug? squeezes every ounce of fear, worry, and negativity out of your spirit, leaving you with nothing but warmth, inner peace, and a feeling of connection. Most people have difficulty remembering the last time someone gave them an all-encompassing hug. Hug Therapy encourages you to change that, one physical or metaphorical embrace at a time. It's a "do good and feel great" book that will help you live more in the moment and stay tuned into what really matters. Praise for Hug Therapy "A re-envisioned, expanded, and brilliant twist that richly brings out the power of hugging in just 21 days. It teaches about the self-hug and how to bring it into one's outer circle, creating balance and harmony for the traveler."?Kevin Zaborney, BA, MDiv, founder of National Hugging Day "Hug Therapy disrupts the simple act of a hug, turning it into a way to spark connection within you, your community, with strangers . . . and it may just end up bringing our planet to awareness of being one. Crazy, awesome hugs? of course you should become a part of this movement!"?Mich Hancock, co-founder of TEDxGatewayArch, host of MichMash Podcast

Multimedia for Accessible Human Computer Interfaces Troy McDaniel, Xueliang Liu, 2021-08-26 The book *Multimedia for Accessible Human Computer Interfaces* is to be the first resource to provide in-depth coverage on topical areas of multimedia computing (images, video, audio, speech, haptics, VR/AR, etc.) for accessible and inclusive human computer interfaces. Topics are grouped into thematic areas spanning the human senses: Vision, Hearing, Touch, as well as Multimodal applications. Each chapter is written by different multimedia researchers to provide complementary and multidisciplinary perspectives. Unlike other related books, which focus on guidelines for designing accessible interfaces, or are dated in their coverage of cutting edge multimedia technologies, *Multimedia for Accessible Human Computer Interfaces* takes an application-oriented approach to present a tour of how the field of multimedia is advancing access to human computer interfaces for individuals with disabilities. Under Theme 1 "Vision-based Technologies for Accessible Human Computer Interfaces", multimedia technologies to enhance access to interfaces through vision will be presented including: "A Framework for Gaze-contingent Interfaces", "Sign Language Recognition", "Fusion-based Image Enhancement and its Applications in Mobile Devices", and "Open-domain Textual Question Answering Systems". Under Theme 2 "Auditory Technologies for Accessible Human Computer Interfaces", multimedia technologies to enhance access to interfaces through hearing will be presented including: "Speech Recognition for Individuals with Voice Disorders" and "Socially Assistive Robots for Storytelling and Other Activities to Support Aging in Place". Under Theme 3 "Haptic Technologies for Accessible Human Computer Interfaces", multimedia technologies to enhance access to interfaces through haptics will be presented including: "Accessible Smart Coaching Technologies Inspired by Elderly Requisites" and "Haptic Mediators for Remote Interpersonal Communication". Under Theme 4 "Multimodal Technologies for Accessible Human Computer Interfaces", multimedia technologies to enhance access to interfaces through multiple modalities will be presented including: "Human-Machine Interfaces for Socially Connected Devices: From Smart Households to Smart Cities" and "Enhancing Situational Awareness and Kinesthetic Assistance for Clinicians via Augmented-Reality and Haptic Shared-Control

Technologies”.

Textile Visionaries Bradley Quinn,2013-06-28 Technologized textiles and sustainable fabrics are among the most innovative designed today, and together they are driving the rest of the industry dramatically forward. Many designers are now integrating hi-tech fabrics, such as protective and impact-resistant textiles, or cellulose fabrics with groundbreaking results. Embracing new processes such as biomimicry, they bridge the gap between art, design, technology and sustainability. This book showcases new work from over 35 of today’s most forward-thinking textile designers, featuring surface designs, highly-structured textures and striking silhouettes. Each will be presented through inspirational text and striking visual spreads to include design sketches, work-in-progress photographs and digital drawings alongside images of cutting-edge furniture, interior textiles and fashion. This book shows how the development of fabrics today is immersed in technology, sustainability and innovation. It is an essential resource for anyone interested in contemporary textile design.

Social Computing and Social Media. Participation, User Experience, Consumer Experience, and Applications of Social Computing Gabriele Meiselwitz,2020-07-10 This two-volume set LNCS 12194 and 12195 constitutes the refereed proceedings of the 12th International Conference on Social Computing and Social Media, SCSM 2020, held as part of the 22nd International Conference, HCI International 2020, which was planned to be held in Copenhagen, Denmark, in July 2020. The conference was held virtually due to the COVID-19 pandemic. The total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings from a total of 6326 submissions. SCSM 2020 includes a total of 93 papers which are organized in topical sections named: Design Issues in Social Computing, Ethics and Misinformation in Social Media, User Behavior and Social Network Analysis, Participation and Collaboration in Online Communities, Social Computing and User Experience, Social Media Marketing and Consumer Experience, Social Computing for Well-Being, Learning, and Entertainment.

Escape Velocity Anah Crow,Dianne Fox,2012-01-02 Linguist Elios Campbell is thrilled to be granted flight time in a Colonial Guard fighter jet, until he catches sight of his pilot. Spending time with Sender Kinnison holds even more appeal than the flight itself. Sender's desire for other men is forbidden by his faith and his family. He tries to resist his attraction to Elios, who is unlike anyone he's ever known. When he fails, the incredible sex quickly leads to something deeper, forcing Sender to question his long-held beliefs. Then, duty calls Sender home to the repressed colony of Themis. Will he be forced to give up a future with Elios to honor the ghosts of his past? First published as Runaway Star, newly revised by the authors. 61,000 words

The Handbook of Fashion Studies Sandy Black,Amy de la Haye,Joanne Entwistle,Regina Root,Agnès Rocamora,Helen Thomas,2014-01-02 The Handbook of Fashion Studies identifies an innovative spectrum of thematic approaches, key strands and interdisciplinary concepts that continue to push forward the boundaries of fashion studies. The book is divided into seven sections: Fashion, Identity and Difference; Spaces of Fashion; Fashion and Materiality; Fashion, Agency and Policy; Science, Technology and New fashion; Fashion and Time and, Sustainable Fashion in a Globalised world. Each section consists of approximately four essays authored by established researchers in the field from the UK, USA, Netherlands, Sweden, Canada and Australia. The essays are written by international subject specialists who each engage with their section's theme in the light of their own discipline

and provide clear case-studies to further knowledge on fashion. This consistency provides clarity and permits comparative analysis. The handbook will be essential reading for students of fashion as well as professionals in the industry.

Haptic and Audio Interaction Design Ian Oakley, Stephen Brewster, 2007-10-25 This book constitutes the refereed proceedings of the Second International Workshop on Haptic and Audio Interaction Design, HAID 2007 held in Seoul, South Korea, in November 2007. The 12 revised full papers presented together with two invited talks were carefully reviewed and selected for inclusion in the book. The papers are organized in topical sections on tactile displays, communication and games, accessibility and navigation, as well as design.

Technology and Touch A. Cranny-Francis, 2013-11-12 Technology and Touch addresses the development of a range of new touch technologies, both technologies that we reach out to touch and technologies that touch us, by exploring how we use touch to connect with and understand our world, and ourselves.

Design Activism Alastair Fuad-Luke, 2013-06-17 Design academics and practitioners are facing a multiplicity of challenges in a dynamic, complex, world moving faster than the current design paradigm which is largely tied to the values and imperatives of commercial enterprise. Current education and practice need to evolve to ensure that the discipline of design meets sustainability drivers and equips students, teachers and professionals for the near-future. New approaches, methods and tools are urgently required as sustainability expands the context for design and what it means to be a 'designer'. Design activists, who comprise a diverse range of designers, teachers and other actors, are setting new ambitions for design. They seek to fundamentally challenge how, where and when design can catalyse positive impacts to address sustainability. They are also challenging who can utilise the power of the design process. To date, examination of contemporary and emergent design activism is poorly represented in the literature. This book will provide a rigorous exploration of design activism that will re-vitalise the design debate and provide a solid platform for students, teachers, design professionals and other disciplines interested in transformative (design) activism. Design Activism provides a comprehensive study of contemporary and emergent design activism. This activism has a dual aim - to make positive impacts towards more sustainable ways of living and working; and to challenge and reinvigorate design praxis. It will collate, synthesise and analyse design activist approaches, processes, methods, tools and inspirational examples/outcomes from disparate sources and, in doing so, will create a specific canon of work to illuminate contemporary design discourse. Design Activism reveals the power of design for positive social and environmental change, design with a central activist role in the sustainability challenge. Inspired by past design activists and set against the context of global-local tensions, expressions of design activism are mapped. The nature of contemporary design activism is explored, from individual/collective action to the infrastructure that supports it generating powerful participatory design approaches, a diverse toolbox and inspirational outcomes. This is design as a political and social act, design to enable adaptive societal capacity for co-futuring.

Human-Robot Intimate Relationships Adrian David Cheok, Emma Yann Zhang, 2019-02-12 The idea of humans falling in love with artificial beings is not a modern conception. Our relationship with artificial partners has come a long way since Pygmalion and his ivory lover. In recent years, there has been a strong upsurge of interest and discussions in the various aspects of intimate relationships between humans and artificial partners. This interest is evidenced by the increase in media coverage, TV documentaries and films on this topic, as well as the active research efforts within the academic community. This book provides a comprehensive collection and overview of the latest development in the field of intimate relationships between humans and artificial partners, in particular robots and virtual agents. It includes relevant research work undertaken by the authors, the latest advancements in technology and commercial products, and future predictions and insights from leading experts in the area. This book contains an in-depth discussion of the engineering, philosophical, psychological, ethical, and sociological implications of relationships with artificial companions. It also

gives a glimpse of some future directions of artificial intelligence, human-computer love and sexual interaction, robotics engineering etc. It is a great resource for researchers and professionals working in these areas. The narrative style of the book also makes it an enjoyable and educational read for everyone.

Hugs All Around Janet Craig, Janet Palazzo-Craig, 1995 As members of a large family give each other hugs, the reader sees the many meanings a hug can have, such as Feel better, Goodbye, I'm sorry or I love you.

A Woman of Valor Fred Skolnik, 2022-10-04 A Woman of Valor is a monumental family saga that is in effect a history of the Jews in the twentieth century. It centers around a heroine who grows up in Bialystok, survives the Holocaust fighting in the Underground, and rebuilds her family in Israel. The Lefkovitzes are a well-to-do family of five brothers and sisters and sixteen children operating a textile factory that employs 100 Poles and Jews. Emma Lefkovitz, the first grandchild, is born in September 1920 in Independent Poland a month after the Russians are driven out. The children grow up in an often hostile environment but the family flourishes. Then the war breaks out and the long nightmare begins. When the ghetto is liquidated in August 1943, Emma and her husband fight in the uprising, but it is easily suppressed and they flee to the forest to join the partisans. After the war, Emma and her husband, Yoel, make their way to Palestine with other family survivors. In the 1948 war, Emma fights in the Old City of Jerusalem. Yoel fights in the north and is killed. Emma gives birth to a boy, Zvi, then marries the kibbutz accountant and moves to Tel Aviv. She has two more children but in the 1967 war her son Zvi is killed in action. After the war the family continues to grow, experiencing the joys and sorrows of ordinary people. Emma dies at the age of 80. Someone counts the family members at the graveside. The number comes to 150. These are, in one form or another, the Lefkovitzes in the year 2000. This is a unique and profoundly moving story. Rarely has ordinary family life been depicted with such verisimilitude, and certainly not in the shadow of horrendous war. The triumph of the Lefkovitzes is not only the triumph of a family. It is also the triumph of a nation.

Hugs From My Heart T.S. Kuginskie, 2014-04-04 Hugs From The Heart began as autobiographical bedtime story 'memories' meant to lighten the moods of dear friends, many of whom spend their lives providing care and support for others. A collection of memories from my past, observations from my own perspective, and encouragement for those darker moments everyone has every now and then, I've been told I 'write the way I talk', which I take as a compliment. This is my way of saying, I love you. You're special. You deserve to be cared for. You are MINE and I'm here for you.

Fundamentals of Wearable Computers and Augmented Reality Woodrow Barfield, 2015-07-29 Data will not help you if you can't see it where you need it. Or can't collect it where you need it. Upon these principles, wearable technology was born. And although smart watches and fitness trackers have become almost ubiquitous, with in-body sensors on the horizon, the future applications of wearable computers hold so much more. A trusted reference for almost 15 years, Fundamentals of Wearable Computers and Augmented Reality goes beyond smart clothing to explore user interface design issues specific to wearable tech and areas in which it can be applied. Upon its initial publication, the first edition almost instantly became a trusted reference, setting the stage for the coming decade, in which the explosion in research and applications of wearable computers and augmented reality occurred. Written by expert researchers and teachers, each chapter in the second edition has been revised and updated to reflect advances in the field and provide fundamental knowledge on each topic, solidifying the book's reputation as a valuable technical resource as well as a textbook for augmented reality and ubiquitous computing courses. New Chapters in the Second Edition Explore: Haptics Visual displays Use of augmented reality for surgery and manufacturing Technical issues of image registration and tracking Augmenting the environment with wearable audio interfaces Use of augmented reality in preserving cultural heritage Human-computer interaction and augmented reality technology Spatialized sound and augmented reality Augmented reality and robotics Computational clothing From a technology perspective, much of what is happening now with wearables and augmented reality would not have been possible even five years ago. In the fourteen years since the first edition burst on the scene, the

capabilities and applications of both technologies are orders of magnitude faster, smaller, and cheaper. Yet the book's overarching mission remains the same: to supply the fundamental information and basic knowledge about the design and use of wearable computers and augmented reality with the goal of enhancing people's lives.

The SAGE Handbook of Visual Research Methods Luc Pauwels, Dawn Mannay, 2019-12-10 The second, thoroughly revised and expanded, edition of The SAGE Handbook of Visual Research Methods presents a wide-ranging exploration and overview of the field today. As in its first edition, the Handbook does not aim to present a consistent view or voice, but rather to exemplify diversity and contradictions in perspectives and techniques. The selection of chapters from the first edition have been fully updated to reflect current developments. New chapters to the second edition cover key topics including picture-sorting techniques, creative methods using artefacts, visual framing analysis, therapeutic uses of images, and various emerging digital technologies and online practices. At the core of all contributions are theoretical and methodological debates about the meanings and study of the visual, presented in vibrant accounts of research design, analytical techniques, fieldwork encounters and data presentation. This handbook presents a unique survey of the discipline that will be essential reading for scholars and students across the social and behavioural sciences, arts and humanities, and far beyond these disciplinary boundaries. The Handbook is organized into seven main sections: PART 1: FRAMING THE FIELD OF VISUAL RESEARCH PART 2: VISUAL AND SPATIAL DATA PRODUCTION METHODS AND TECHNOLOGIES PART 3: PARTICIPATORY AND SUBJECT-CENTERED APPROACHES PART 4: ANALYTICAL FRAMEWORKS AND PERSPECTIVES PART 5: MULTIMODAL AND MULTISENSORIAL RESEARCH PART 6: RESEARCHING ONLINE PRACTICES PART 7: COMMUNICATING THE VISUAL: FORMATS AND CONCERNS
