Andrew Yang

The War on Normal People Andrew Yang, 2018-04-03 The New York Times bestseller from CNN Political Commentator and 2020 former Democratic presidential candidate Andrew Yang, this thought-provoking and prescient call-to-action outlines the urgent steps America must take, including Universal Basic Income (UBI), to stabilize our economy amid rapid technological change and automation. The shift toward automation is about to create a tsunami of unemployment. Not in the distant future--now. One recent estimate predicts 45 million American workers will lose their jobs within the next twelve years--jobs that won't be replaced. In a future marked by restlessness and chronic unemployment, what will happen to American society? In *The War on Normal People*, Andrew Yang paints a dire portrait of the American economy. Rapidly advancing technologies like artificial intelligence, robotics and automation software are making millions of Americans' livelihoods irrelevant. The consequences of these trends are already being felt across our communities in the form of political unrest, drug use, and other social ills. The future looks dire-but is it unavoidable? In *The War on Normal People*, Yang imagines a different future--one in which having a job is distinct from the capacity to prosper and seek fulfillment. At this vision's core is Universal Basic Income, the concept of providing all citizens with a guaranteed income-and one that is rapidly gaining popularity among forward-thinking politicians and economists. Yang proposes that UBI is an essential step toward a new, more durable kind of economy, one he calls human capitalism.

Transitions Theory Afaf I. Meleis, PhD, DrPS (hon), FAAN, 2010-02-17 It is very exciting to see all of these studies compiled in one book. It can be read sequentially or just for certain transitions. It also can be used as a template for compilation of other concepts central to nursing and can serve as a resource for further studies in transitions. It is an excellent addition to the nursing literature. Score: 95, 4 Stars. --Doody's Understanding and recognizing transitions are at the heart of health care reform and this current edition, with its numerous clinical examples and descriptions of nursing interventions, provides important lessons that can and should be incorporated into health policy. It is a brilliant book and an important contribution to nursing theory. Kathleen Dracup, RN, DNSc Dean and Professor, School of Nursing University of California San Francisco Afaf Meleis, the dean of the University of Pennsylvania School of Nursing, presents for the first time in a single volume her original transitions theory that integrates middle-range theory to assist nurses in facilitating positive transitions for patients, families, and communities. Nurses are consistently relied on to coach and support patients going through major life transitions, such as illness, recovery, pregnancy, old age, and many more. A collection of over 50 articles published from 1975 through 2007 and five newly commissioned articles, Transitions Theory covers developmental, situational, health and illness, organizational, and therapeutic transitions. Each section includes an introduction written by Dr. Meleis in which she offers her historical and practical perspective on transitions. Many of the articles consider the transitional experiences of ethnically diverse patients, women, the elderly, and other minority populations. Key Topics Discussed: Situational transitions, including discharge and relocation transitions (hospital to home, stroke recovery) and immigration transitions (psychological adaptation and impact of migration on family health) Educational transitions, including professional transitions (from RN to BSN and student to professional) Health and illness transitions, including self-care post heart failure, living with chronic illness, living with early dementia, and accepting palliative care Organization transitions, including role transitions from acute care to collaborative practice, and hospital to community practice Nursing therapeutics models of transition, including role supplementation models and debriefing models

Race, War, and Surveillance Mark Ellis, 2001-07-26 In April 1917, black Americans reacted in

various ways to the entry of the United States into World War I in the name of Democracy. Some expressed loud support, many were indifferent, and others voiced outright opposition. All were agreed, however, that the best place to start guaranteeing freedom was at home. Almost immediately, rumors spread across the nation that German agents were engaged in Negro Subversion and that African Americans were potentially disloyal. Despite mounting a constant watch on black civilians, their newspapers, and their organizations, the domestic intelligence agents of the federal government failed to detect any black traitors or saboteurs. They did, however, find vigorous demands for equal rights to be granted and for the 30-year epidemic of lynching in the South to be eradicated. In *Race, War, and Surveillance*, Mark Ellis examines the interaction between the deep-seated fears of many white Americans about a possible race war and their profound ignorance about the black population. The result was a black scare that lasted well beyond the war years. Mark Ellis is Senior Lecturer in History at the University of Strathclyde, Glasgow, Scotland.
