**Pipelines 2011** American Society of Civil Engineers, 2011-07-22 Proceedings of the Pipelines 2011 Conference, held in Seattle, Washington, July 23-27, 2011. Sponsored by the Pipeline Division of ASCE. This collection contains 135 peer-reviewed technical papers that discuss new solutions to some of the most critical infrastructure issues involving pipelines. The U.S. water and wastewater infrastructure systems are continuing to deteriorate. The recent economic downturn has increased the gap between current and required levels of funding. These serious financial constraints highlight the urgent need for creative and innovative solutions to improve our water and wastewater infrastructure systems. From the technical perspective, cost effective materials, proper planning, new design methods, innovative construction technologies, and advanced condition assessment technologies must be more aggressively developed, tested, and introduced to the industry. From the management perspective, optimal use of financial resources, smart and carefully crafted decision making processes on maintenance, rehabilitation and replacement activities must be made available, applied by and used by water and wastewater infrastructure agencies.

**Asian Immigrants in North America with HIV/AIDS** AKM Ahsan Ullah, Ahmed Shafiqul Huque, 2014-08-31 This book explores a number of issues related to the stigma arising from HIV/AIDS infection, perceived or actual discrimination from the community and society and the extent of vulnerabilities for infected Asian refugees and immigrants. It assesses the health care and treatment regimen for HIV/AIDS accessed by immigrants and refugee claimants in North America, including treatments offered by the health-care system and ethnic communities and their perceptions and biases relating to HIV/AIDS issues. On another level, the book identifies the ways in which HIV-sufferer immigrants and refugees/refugee claimants from Asia are vulnerable to discrimination due to 1) lack of information about HIV/AIDS incidence in the community; 2) inability of the health system to respond appropriately; and 3) the community's need for introspection on their own health issues. This book reveals the dynamics that influence choice, behavior and lifestyle of HIV sufferer immigrants, adds to the existing knowledge about refugees and migrants and proposes a unified theory of discrimination and stigmatization within the context of human rights. In addition, the book presents a number of policy recommendations based on empirical findings with a view to helping reshape policies regarding refugee HIV sufferers and their social ramifications. This book will be of interest to researchers and students in any field from social sciences, health and psychology, as well as practitioners in the field of development and public policy. The book will be beneficial to policy formulators and implementers engaged in addressing the serious threat emanating from the HIV/AIDS pandemic.

**Thrive in Immunology** Anne C. Cunningham, 2016 The Thrive in Bioscience revision guides are written to help students achieve exam success in all core areas of bioscience. Each title encourages the reader to follow four steps to maximise their learning, with features to support this process. Step one: Review the facts The revision guides are designed to help learning be quick and effective: \* Information is set out in bullet points, making it easy to digest \* Clear, uncluttered illustrations illuminate what is said in the text \* Key concept panels summarise the essential learning points Step two: Check your understanding Readers are encouraged to: \* Complete the questions at the end of chapters and online multiple-choice questions to reinforce their learning \* Use the online flashcard glossary to master the essential terms and phrases Step three: Take note of extra advice Revision tips, and hints for getting those precious extra marks in exams, are presented throughout. Step four: Go the extra mile Readers can explore the suggestions for further reading to take their understanding one step further. Each title in the series is tailored to maximise understanding and achievement, to ensure that the reader really can thrive in their studies. They are the perfect course companions for any bioscience degree. Online Resource Centre Each title is supplemented by an Online Resource Centre which includes a flashcard glossary to enable students to test their understanding of key terminology, and a bank of interactive MCQs to give students the opportunity to check they have fully understood the facts and concepts presented in the texts.

**The Growth of Biofuels in the 21st Century** R. Ackrill, A. Kay, 2014-12-17 This book provides a timely and insightful analysis of the expansion of biofuels production and use in recent years. Drawing on interviews with key policy insiders, Ackrill and Kay show how biofuels policies have been motivated by concerns over climate change, energy security and rural development.

**Globalization and the Health of Indigenous Peoples** Ahsan Ullah, 2016-11-18 In 70 countries worldwide, there is an estimated 370 million indigenous peoples, and their rich diversity of cultures, religions, traditions, languages and histories has been significant source of our scholarships. However, the health status of this population group is far below than that of non-indigenous populations by all standards. Could the persisting reluctance to understand the influence of self-governance, globalization and social determinants of health in the lives of these people be deemed as a contributor to the poor health of indigenous peoples? Within this volume, Ullah explores the gap in health status between indigenous and non-indigenous peoples by providing a comparative assessment of socio-economic and health indicators for indigenous peoples, government policies, and the ways in which indigenous peoples have been resisting and adapting to state policies. A timely book for a growing field of study, *Globalization and the Health of Indigenous Peoples* is a must read for academics, policy-makers, and practitioners who are interested in indigenous studies and in understanding the role that globalization plays for the improvement of indigenous peoples' health across the world.

**Liberalization, Growth, and the Asian Financial Crisis** Mohamed Ariff, Ahmed M. Khalid, 2000-01-01 This work examines the effects of financial liberalization of the more advanced economies in Southeast Asia and analyses the degree to which emerging and transitional economies in East and South Asia can benefit from this example.

**Liberalization and Growth in Asia** Mohamed Ariff, Ahmed M. Khalid, 2005 In this second edition the authors from Monash and Bond Universities respectively present a thoroughly revised account of the effects of financial liberalization and growth and development in the more advanced economies of Southeast Asia. New chapters focus on the post-crisis reforms and their policy impacts.

**Regulatory Failure and the Global Financial Crisis** Mohamed Ariff, John Farrar, Ahmed M. Khalid, 2012-01-01 This fascinating book presents a lively discussion of key issues resulting from the recent financial crisis. The expert contributors explore why the global financial crisis occurred, how it destroyed wealth, triggered mass unemployment and created an unprecedented loss of control on employment, monetary policy and government budgets. Important topics encompassing the origin and impact of the crisis, governance failure, regulatory forgiveness, credit splurges, asset bubbles and the greed of institutions are analysed from the wide-ranging perspectives of not only academics in both economics and law, but also industry practitioners and regulators. This multidimensional evaluation of what went wrong concludes with an outline of what is currently being done to prevent another major crisis, and prescribes recommendations for the implementation of further preventative measures. This book will prove a compelling read for economics, finance and law scholars, as well as for practitioners including accountants, lawyers and financial market players.

**Refugee Politics in the Middle East and North Africa** A. Ullah, 2014-05-15 Ahsan Ullah provides an insightful analysis of migration and displacement in the Middle East and North Africa. He examines the intricate relationship of these phenomena with human rights, safety concerns and issues of identity crisis and identity formation.

**Globalization and Economic Integration** Noel Gaston, Ahmed M. Khalid, 2010-01-01 Noel Gaston and Ahmed M. Khalid's volume offers fascinating insights on the development, causes, and consequences of globalization in the Asia-Pacific. The outstanding collection of chapters combines theory with rigorous econometrics, making the book a must-read for every student of globalization. At a time where the global crisis gave new arguments to the critics of globalization, the questions raised in this book, and the answers given, are essential reading for academics and politicians alike. Axel Dreher, University of Goettingen, Germany Given the importance

of globalization in today's world, this salutary and timely book explores how globalization is specifically shaping the Asia-Pacific. It investigates future prospects and challenges, identifies the key winners and losers, and concludes in many cases that the portents for globalization are not particularly promising. Prominent economists and policy scholars examine a wide range of topics pertinent to globalization and economic integration in the Asia-Pacific, encompassing macroeconomic coordination and financial market integration; regionalism and preferential trade agreements; and immigration and labor markets, including gender issues and the impact of outsourcing. Through these analyses, the expert contributors illustrate the importance of market participants and regulators clearly understanding the risks associated with the present stage of globalization. They show that national policy makers need to reconfigure the regulatory framework following international lessons from previous financial crises experienced in the last two decades, and that financial literacy is essential for market participants, especially in emerging economies. Many of the issues discussed will prove useful in promoting the development of a new international financial architecture, comprising measures that will help reap the full benefits of globalization. This stimulating and challenging book will strongly appeal to academics, advanced undergraduates, postgraduates, researchers, and policy makers in the fields of Asian studies, international economics, and international business.

**Applied Micropaleontology** J.M. Jenkins, 2013-04-18 Seven original case-studies are presented in this volume, each describing the application of micropaleontology and palynology in applied geology: (1) a study of the modern distribution of coccolith sedimentation in the North Sea and its potential for future application in basin analysis; (2) ostracods are shown to be good paleoenvironmental indicators in the early Cretaceous and Tertiary; (3) a biogenic gas seep in the North Sea is shown to be marked by diagnostic benthonic foraminifera; (4) in the North Sea hydrocarbon exploration, integrated studies of micropaleontology have provided invaluable data; (5) palynofacies analysis are shown to be vital in determining depositional events and hydrocarbon source rock potential; (6) the application of paleontology and sedimentology to sequence stratigraphy is demonstrated in the early Cretaceous; and (7) the application of micropaleontology is shown to be an essential tool in both engineering and economic geology. Most chapters have been prepared by earth scientists from industry. The study of microfossils presented in this book provides invaluable data for stratigraphers, petroleum geologists and for engineers and economic geologists working in hydrocarbon exploration and basin analysis.

**India and South Asia** Anjum Siddiqui, 2015-06-01 South Asia has become a major center of attention on the world stage with the U.S. military involvement in Afghanistan since 9/11, the ongoing concern over Islamic fundamentalism in Pakistan, and India's emergence as a regional economic power. In addition, the age-old problems of South Asia - mass poverty, poor infrastructure, misgovernance, rampant corruption, political uncertainty, and regional wars - add to the increased interest in the region. Incorporating the most current information available, the expert international contributors to this handbook examine the economies and geo-political developments of India, Pakistan, Afghanistan, Nepal, Bangladesh, Sri Lanka, and Bhutan. They focus on three core areas of importance: trade and development in the post-WTO era of globalization; macroeconomic adjustment and economic growth; and poverty, governance, the war on terror, and social indicators. With its cutting edge analysis, the handbook is an essential reference for all students, researchers, and practitioners dealing with the region.

**Economic Integration Among D-8 Muslim Countries: Prospects And Challenges** Ahmed M Khalid, R James Ferguson, M Niaz Asadullah, 2023-03-16 The D-8 (Developing Eight) organisation was officially formed in 1997 and has Bangladesh, Egypt, Indonesia, Iran, Malaysia, Nigeria, Pakistan and Turkey as full members. The D-8 economies encompass nearly 62% of the Muslim population or about 1.17 billion people globally. The economic, cultural, social, political and geographical diversity that exists amongst the D-8 member countries differs radically from other Muslim or regional blocks. Furthermore, D-8 member countries are developing economies that do not solely rely on oil, ancient civilizations, or roles as historical powerhouses, but their populations aspire to be better educated, scientifically more advanced, have higher incomes and improved human rights. It is imperative to study the implications of these developments for cultural identity and life quality. This book studies the contemporary socio-economic developments and challenges faced by D-8 countries. It explores questions on the socio-economic and political formation, sustainability, economic participation, and the vitality of the D-8 member countries. It deepens our understanding of recent global economic systems and governance, and suggests areas for future research and publications.

**Foreign Language Learning Anxiety in China** Deyuan He, 2018-01-18 Already the focus of much interest for 50 years, the study of foreign language learning anxiety (FLLA) still remains a popular research topic among scholars in Western countries. FLLA is believed to be an important cause of students' "dumb English". Considering the paucity of monographs on FLLA in China, this book represents an important step towards filling this gap. The author uses his PhD dissertation as a foundation for reviewing and discussing previous literature, as well as the current status of and major issues concerning FLLA worldwide. The book explores FLLA in China by using innovative triangulated research methodology, combining both quantitative and qualitative methods, namely surveys, focused interviews, and classroom observations. It also highlights the significance and implications of the research results and predicts the future of global FLLA research with a particular focus on China. Readers will discover the latest developments and issues concerning FLLA, causes of FLLA, and verified, effective strategies for alleviating such anxiety.

**The Rise of the BRICS in the Global Political Economy** Vai Io Lo, Mary Hiscock, 2014-01-31 Taking an interdisciplinary approach, Vai Io Lo and Mary Hiscock, together with scholars and researchers from around the world, investigate the rise of the BRICS and assess the extent of their further development and influence from the perspectives of

**Achieving Financial Stability: Challenges To Prudential Regulation** Kaufman George G, Leonello Agnese, Manganelli Simone, 2017-09-22 The Great Financial Crisis of 2007–2010 exposed the existence of significant imperfections in the financial regulatory framework that encouraged excessive risk-taking and increased system vulnerabilities. The resulting high cost of the crisis in terms of lost aggregate income and wealth, and increased unemployment has reinforced the need to improve financial stability within and across countries via changes in traditional microprudential regulation, as well as the introduction of new macroprudential regulations. Amongst the questions raised are: What are the challenges to prudential regulation? How has the regulatory environment changed in recent years? How do the reforms interplay with market discipline, risk-taking incentives and risk management arrangements? Does the new regulatory framework allow for the introduction of financial innovation, and the associated benefits, without increasing disruptive financial risk?
