They are organized in topical sections on machine learning, data mining, web mining, multi-agent systems, automatic reasoning, decision algorithms, multimedia, pattern recognition, and information security.

Chants, Hypertext, and Prosulas Luisa Nardini,2021 The liturgical chant that was sung in the churches of Southern Italy between the ninth and the thirteenth centuries reflects the multiculturalism of a territory in which Roman, Franks, Lombards, Byzantines, Normans, Jews, and Muslims were present at various titles and with different political roles. This book examines a specific genre, the prosulas that were composed to embellish and expand pre-existing liturgical chants of the liturgy of mass. Widespread in medieval Europe, prosulas were highly cultivated in southern Italy, especially by the nuns, monks, and clerics the city of Benevento. They shed light on the creativity of local cantors to provide new meanings to the liturgy in accordance with contemporary waves of religious spirituality and to experiment with a novel musical style in which a syllabic setting is paired with the free-flowing melody of the parent chant. In their representing an epistemological 'beyond' and because of their interconnectedness with the parent chant, they can be likened to modern hypertexts. The emphasis on universal saints of ancient lineage stressed the perceived links with the cradles of Christianity, Africa and the Levant, and the centre of the Papal power, Rome, while the high number of Christological prosulas in manuscripts used in nunneries might be tied to the devotion to Jesus as 'spiritual spouse' that was typical of female religiosity. Full edition of texts, melodies, and manuscript facsimiles in the companion website enrich the study of the stylistic features and the cultural components of this fascinating genre--

Digital Papyrology | Nicola Reggiani, 2017-09-11 Since the very beginnings of the digital humanities, Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes, for both theoretical and practical reasons (the strong awareness towards the problems of human memory and the material ways of preserving it; the need to work with a multifarious and overwhelming amount of different data). After more than thirty years of development, we have now at our disposal the most advanced tools to make papyrological studies more and more effective, and even to create a new conception of papyrology and a new model of edition of the ancient documents. At this turning point, it is important to build an epistemological framework including all the different expressions of Digital Papyrology, to trace a historical sketch setting the background of

the contemporary tools, and to provide a clear overview of the current theoretical and technological trends, so that all the possibilities currently available can be exploited following uniform pathways. The volume represents an innovative attempt to deal with such topics, usually relegated into very quick and general treatments within journal articles or papyrological handbooks.

**Passive and Active Measurement** Michalis Faloutsos, Aleksandar Kuzmanovic, 2014-03-01 This book constitutes the refereed proceedings of the 15th International Conference on Passive and Active Measurement, PAM 2014, held in Los Angeles, CA, USA, in 2014. The 24 revised full papers presented were carefully reviewed and selected from 76 submissions. The papers have been organized in the following topical sections: internet wireless and mobility; measurement design, experience and analysis; performance measurement; protocol and application behavior; characterization of network behavior; and network security and privacy. In addition 7 poster papers have been included.

**Transfiction** Klaus Kaindl, Karlheinz Spitzl, 2014-01-28 This volume on Transfiction (understood as an aestheticized imagination of translatorial action) recognizes the power of fiction as a vital and pulsating academic resource, and in doing so helps expand the breadth and depth of TS. The book covers a selection of peer-reviewed papers from the 1st International Conference on Fictional Translators and Interpreters in Literature and Film (held at the University of Vienna, Austria in 2011) and links literary and cinematic works of translation fiction to state-of-the-art translation theory and practice. It presents not just a mixed bag of cutting-edge views and perspectives, but great care has been taken to turn it into a well-rounded transficcionario with a fluid dialogue among its 22 chapters. Its investigation of translatorial action in the mirror of fiction (i.e. beyond the cognitive barrier of 'fact') and its multiple transdisciplinary trajectories make for thought-provoking readings in TS, comparative literature, as well as foreign language and literature courses.

**Rules of Play** Katie Salen Tekinbas, Eric Zimmerman, 2003-09-25 An impassioned look at games and game design that offers the most ambitious framework for understanding them to date. As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the

authors have written *Rules of Play* as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like play, design, and interactivity. They look at games through a series of eighteen game design schemas, or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design.

Virtual Homelands Madhavi Mallapragada, 2013-10-15 The internet has transformed the idea of home for Indians and Indian Americans. In *Virtual Homelands: Indian Immigrants and Online Cultures in the United States*, Madhavi Mallapragada analyzes home pages and other online communities organized by diasporic and immigrant Indians from the late 1990s through the social media period. Engaging the shifting aspects of belonging, immigrant politics, and cultural citizenship by linking the home page, household, and homeland as key sites, Mallapragada illuminates the contours of belonging and reveals how Indian American struggles over it trace back to the web's active mediation in representing, negotiating, and reimagining home. As Mallapragada shows, ideologies around family and citizenship shift to fit the transnational contexts of the online world and immigration. At the same time, the tactical use of the home page to make gender, racial, and class struggles visible and create new modes for belonging implicates the web within complex political and cultural terrain. On e-commerce, community, and activist sites, the recasting of home and homeland online points to intrusion by public agents such as the state, the law, and immigration systems in the domestic, the private, and the familial. Mallapragada reveals that the home page may mobilize to reproduce conservative narratives of Indian immigrants' familial and citizenship cultures, but the reach of a website extends beyond the textual and discursive to encompass the institutions shaping it, as the web unmakes and remakes ideas of India and America.

*The Cambridge Companion to Postmodern American Fiction* Paula Geyh, 2017-04-24 Few previous periods in the history of American literature could rival the richness of the postmodern era - the diversity of its authors, the complexity of its ideas and visions, and the multiplicity of its subjects and forms. This volume offers an authoritative, comprehensive, and accessible guide to the American fiction of this remarkable period. It traces the development of postmodern American fiction over the

past half-century and explores its key aesthetic, cultural, and political contexts. It examines its principal styles and genres, from the early experiments with metafiction to the most recent developments, such as the graphic novel and digital fiction, and offers concise, compelling readings of many of its major works. An indispensable resource for students, scholars, and the general reader, the Companion both highlights the extraordinary achievements of postmodern American fiction and provides illuminating critical frameworks for understanding it.

*The Medieval Chronicle VII.* Juliana Dresvina, Nicholas Sparks Nicholas Sparks, 2011-04 There are several reasons why the chronicle is particularly suited as the topic of a yearbook. In the first place there is its ubiquity: all over Europe and throughout the Middle Ages chronicles were written, both in Latin and in the vernacular, and not only in Europe but also in the countries neighbouring on it, like those of the Arabic world. Secondly, all chronicles raise such questions as by whom, for whom, or for what purpose were they written, how do they reconstruct the past, what determined the choice of verse or prose, or what kind of literary influences are discernable in them. Finally, many chronicles have been beautifully illuminated, and the relation between text and image leads to a wholly different set of questions. The yearbook *The Medieval Chronicle* aims to provide a representative survey of the on-going research in the field of chronicle studies, illustrated by examples from specific chronicles from a wide variety of countries, periods and cultural backgrounds. *The Medieval Chronicle* is published in cooperation with the Medieval Chronicle Society.

Enhancing Mathematics Understanding through Visualization: The Role of Dynamical Software Habre, Samer, 2013-05-31 Mathematics is, by its very nature, an abstract discipline. However, many students learn best by thinking in terms of tangible constructs. *Enhancing Mathematics Understanding through Visualization: The Role of Dynamical Software* brings these conflicting viewpoints together by offering visual representations as a method of mathematics instruction. The book explores the role of technology in providing access to multiple representations of concepts, using software applications to create a rich environment in which a student's understanding of mathematical concepts can flourish. Both students and instructors of mathematics at the university level will use this book to implement various novel techniques for the delivery of mathematical concepts in their classrooms. This book is part of the Research Essential collection.

*Reading Writing Interfaces* Lori Emerson, 2014-06-01 Lori Emerson examines how interfaces—from

today's multitouch devices to yesterday's desktops, from typewriters to Emily Dickinson's self-bound fascicle volumes—mediate between writer and text as well as between writer and reader. Following the threads of experimental writing from the present into the past, she shows how writers have long tested and transgressed technological boundaries. Reading the means of production as well as the creative works they produce, Emerson demonstrates that technologies are more than mere tools and that the interface is not a neutral border between writer and machine but is in fact a collaborative creative space. *Reading Writing Interfaces* begins with digital literature's defiance of the alleged invisibility of ubiquitous computing and multitouch in the early twenty-first century and then looks back at the ideology of the user-friendly graphical user interface that emerged along with the Apple Macintosh computer of the 1980s. She considers poetic experiments with and against the strictures of the typewriter in the 1960s and 1970s and takes a fresh look at Emily Dickinson's self-printing projects as a challenge to the coherence of the book. Through archival research, Emerson offers examples of how literary engagements with screen-based and print-based technologies have transformed reading and writing. She reveals the ways in which writers—from Emily Dickinson to Jason Nelson and Judd Morrissey—work with and against media interfaces to undermine the assumed transparency of conventional literary practice.

**Managing Digital Cultural Objects** Allen Foster, Pauline Rafferty, 2016-07-15 This book explores the analysis and interpretation, discovery and retrieval of a variety of non-textual objects, including image, music and moving image. Bringing together chapters written by leading experts in the field, this book provides an overview of the theoretical and academic aspects of digital cultural documentation and considers both technical and strategic issues relating to cultural heritage projects, digital asset management and sustainability. *Managing Digital Cultural Objects: Analysis, discovery and retrieval* draws from disciplines including information retrieval, library and information science (LIS), digital preservation, digital humanities, cultural theory, digital media studies and art history. It's argued that this multidisciplinary and interdisciplinary approach is both necessary and useful in the age of the ubiquitous and mobile Web. Key topics covered include: • Managing, searching and finding digital cultural objects • Data modelling for analysis, discovery and retrieval • Social media data as a historical source • Visual digital humanities • Digital preservation of audio content • Searching and creating affinities in web music collections • Film retrieval on the web. Readership: The book will provide inspiration for students seeking to develop creative and innovative research projects at Masters and PhD levels and will be essential reading for those studying digital cultural object

management as well as practitioners in the field.

**Netymology** Tom Chatfield, 2016-08-02 Composed of 100 bite-sized entries of 400 to 600 words each, Netymology weaves together stories, etymologies and analyses around digital culture's transformation and vocabulary. Chatfield presents a kaleidoscopic, thought-provoking tour through the buried roots of the symbols, speech, and mannerisms we have inherited from the digital age: from the @ and Apple symbols, to HTML and Trojan horses, to the twisted histories of new forms of slang, memes, text messages and gaming terms; how language itself is being shaped by technology, how it is changing us.

Governing the World? Sophie Harman, David Williams, 2013-06-07 'Global governance' has become a key concept in the contemporary study of international politics, yet what the term means and how it works remains in question. *Governing the World: Cases in Global Governance* takes an alternative approach to understanding the concept by exploring how global governance works in practice through a set of case studies on both classical issues of international relations such as security, labour and trade, and more contemporary concerns such as the environment, international development, and governing the internet. The book explores the processes, practice and politics of global governance by taking a broad look at issues of human rights governance and focusing on detailed aspects of a topic such as torture and rendition to help explain how governance does, or does not, work to students and researchers of international politics alike. Bringing together a diverse and international group of scholars, each chapter responds to a set of questions as to what is being governed, how and who by and offers issue-specific case studies and recommended reading to develop a full understanding of the issue explored and what it means for global governance.

*On Resentment* Dolores Martin Moruno, 2013-07-16 Resentment has a history. Paintings such as Géricault's *Le Radeau de La Méduse*, nineteenth-century women's manifestos and WWI war photographs provide but a few examples to retrace the changing physiognomy of this emotion from the second half of the eighteenth century up to our contemporary society. The essays in this collection attempt to shed light on the historical evolution of this affective experience adopting the French Revolution as a "gravitational force", namely as a moment in which the desire to be other was politically legitimised by means of the ideal of a meritocratic society. From Adam Smith's definition as social passion linked with justice, to Nietzsche's interpretation of resentment as a pathological symptom, this emotion has also shaped a plethora of social movements forging their identity out of hatred mixed with fear and indignation. This volume seeks to provide new insights into the history of

emotions by showing how resentment is a cultural experience that contributes to a better understanding of the differences between the past and the present world.
