**The Complete Book of the World Rally Championship** Henry Hope-Frost, John Davenport, 2004 For 30 years some of the most talented and bravest drivers have battled across the continents of the world to claim what is arguably motorsport's toughest prize: the World Rally Championship. Now a multi-million dollar, global technology battle and terrestrial television phenomenon played out over the frozen wastes of Finland, the dusty plains of Australia and the sun-kissed mountain roads of Corsica, the WRC has reached its 30th birthday. This book celebrates that important milestone and paints an exhaustively detailed picture of the people and personalities who have shaped this great sport. The Complete Book of the World Rally Champions provides a biographical account of the 65 men who have won at least one World Championship Rally since 1973. The biographies are compiled by the sport's leading writers and historians and complemented by stunning photography. The book includes a detailed and accurate statistical career record of each driver, plus highlights of all the significant cars.

**A Profile of the Automobile and Motor Vehicle Industry** James M. Rubenstein, 2014-01-31 The motor vehicle industry is one of the world's largest. More than 1 billion vehicles are in use around the world, and 80 million are produced and sold annually. Motor vehicles—including passenger cars, trucks, and commercial vehicles such as buses and taxis—are the principal means by which people and goods are transported within and among most communities in the world. This book details the history of the motor vehicle and of the leading carmakers. Inside, you'll learn just how cars are made and sold; the leading suppliers of parts that go into a car; the increasing role of government in regulating vehicles; and future challenges for the industry. The motor vehicle industry includes corporations that design, develop, and manufacture cars and trucks. These carmakers, such as Ford and Toyota, are among the world's most-familiar corporate brands. The motor vehicle industry also encompasses lesser-known businesses, including several thousand parts makers, tens of thousands of retailers, and specialized lending agencies. The importance of the motor vehicle industry transcends even its central role in the global economy. The industry was responsible for many of the fundamental innovations of 20th century production, such as corporate organization, manufacturing processes, and labor relations, as well as sales innovations including product branding and consumer financing. In the 21st century, the motor vehicle industry has been a leader in adopting new production strategies and expanding into new markets.

**The Emerging Markets Century** Antoine van Agtmael, 2007-01-09 In this vital book, visionary international investment manager Antoine van Agtmael -- the pioneer who coined the term emerging markets -- pulls back the curtain on the new powerhouses of the world economy. Picking up where Thomas Friedman's *The World Is Flat* left off, he persuasively demonstrates that the world's center of gravity is already tipping decisively in favor of the emerging economies. With this seismic shift, competitive challenges and investment risks are also being dramatically transformed, while new opportunities are arising for those who are alert to them. A new breed of world-leading companies are catching their Western competitors off guard. Household names of today -- IBM, Ford, Sony, and Shell -- are in danger of becoming has-beens as these more innovative new superstars in the emerging markets claim dominance. Understanding how they have become world-class market leaders, and where they are taking the world economy, is crucial to understanding not only the future of globalization, but the future of Western competitiveness. Each year we are buying more planes from Brazil's Embraer, refrigerators from China's Haier appliance maker, smart cell phones from Taiwan's HTC, and gas from Russia's Gazprom. How have these relative unknowns come so far in the world markets so fast? What are they doing right that their Western competitors are doing wrong, and how can Western companies face the intensifying challenges and survive? With in-depth, inside knowledge of these emerging powerhouses that's based on his thirty years of working, traveling, and investing in emerging markets and his extraordinary access to the leading companies, van Agtmael trains his experienced analyst's eye on twenty-five of the top emerging giants, taking readers into the executive suites and labs where they are outmaneuvering their Western rivals. Profiling these major players, such as Korea's Samsung Electronics, China's computer maker Lenovo, Brazil's iron ore giant CVRD, and India's Infosys, van Agtmael divulges their strategies for growth, and analyzes how their rise to dominance will change our lives. His unique insights point the way to how we in the West can capitalize on the opportunities these companies represent while also mobilizing a powerful response to the challenges they present. *The Emerging Markets Century* is a compelling and necessary read for anyone who wants to understand the true magnitude of change under way in the global economy today.
