**Guidelines for Cardiac Rehabilitation Programs** AACVPR, 2020-03-04 Guidelines for Cardiac Rehabilitation Programs, Sixth Edition With Web Resource, presents the combined expertise of more than 50 leaders in the field of cardiac rehabilitation (CR), reimbursement, and public policy to empower professionals to successfully implement new CR programs or improve existing ones. Developed by the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR), this guidebook offers procedures for providing patients with low-cost, high-quality programming that moves them toward a lifelong commitment to disease management and secondary prevention. Cardiovascular disease (CVD) is the principal cause of death worldwide. It is projected that by 2035, more than 130 million adults in the United States will have CVD. The challenge to CR professionals is to select, develop, and deliver appropriate rehabilitative and secondary prevention services to each patient tailored to their individual needs. Guidelines for Cardiac Rehabilitation Programs, Sixth Edition, is the definitive resource for developing inpatient and outpatient cardiac rehabilitation programs. The sixth edition of Guidelines for Cardiac Rehabilitation Programs equips professionals with current scientific and evidence-based models for designing and updating rehabilitation programs. Pedagogical aides such as chapter objectives, bottom line sections, summaries, and sidebars present technical information in an easy-to-follow format. Key features of the sixth edition include the following: A new chapter on physical activity and exercise that helps readers understand how to develop and implement exercise programs to CVD patients A new chapter on cardiac disease populations that offers readers a deeper understanding of CVD populations, including those with heart valve replacement or repair surgery, left ventricular assist devices, heart transplant, dysrhythmias, and/or peripheral artery disease Case studies and discussion questions that challenge readers to consider how concepts from the text apply to real-life scenarios An expanded web resource that includes ready-to-use forms, charts, checklists, and logs that are practical for daily use, as well as additional case studies and review questions Keeping up with change is a professional necessity and keeping up with the science is a professional responsibility. Guidelines for Cardiac Rehabilitation Programs, Sixth Edition, covers the entire scope of practice for CR programs and professionals, providing evidence-based information on promoting positive lifestyle behavior patterns, reducing risk factors for disease progression, and lessening the impact of CVD on quality of life, morbidity, and mortality. Note: The web resource is included with all new print books and some ebooks. For ebook formats that don't provide access, the web resource is available separately.

*Political Institutions in East Timor* Lydia M. Beuman, 2016-02-05 In 2002, East Timor became an independent state following a long conflict with Indonesia, and went on to adopt a semi-presidential form of government. In a semi-presidential system there is a directly elected fixed-term president, prime minister and government who are collectively responsible for the legislature. Over 50 countries in the world have adopted such a system. This book examines the politics of semi-presidentialism in East Timor from 2002-2012 and post-2012 political developments. It analyses the impact of semi-presidentialism on the performance of East Timor's democracy, and looks at whether semi-presidentialism encourages power sharing between competing forces, or whether it provoke a power struggle that threatens democratic stability. Using East Timor as a case study, the author explains whether the adoption of semi-presidentialism helps or hinders the process of democratisation in new democracies. It is of interest to researchers in the fields of Political Science, Conflict Resolution and Asian Studies, in particular Southeast Asian Politics.

Phossy Jaw and the French Match Workers Bonnie Gordon, 2017-01-06 The 1898 suppression of white phosphorous in the French match industry was a victory of organized labour. At a time when most French workers did not have the power to effect changes in the health and safety conditions of their work, the match workers succeeded. At a time when most French women were not unionised and did not pursue effective action on occupational health problems, French women in the match industry succeeded. This book, first

published in 1989, examines their actions and provides the definitive account of their success.
