Zhilin Jin,Bin Li,Jingxuan Li

**The Fourth Industrial Revolution** Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

**Revolution and Culture** Zenovia A. Sochor, 1988 Zenovia A. Sochor here assesses one of the most important debates within the Bolshevik leadership during the early years of Soviet power—that between A. A. Bogdanov and V. I. Lenin. Once comrades-in-arms, Bogdanov and Lenin became political rivals prior to the October Revolution. Their disagreements over political and cultural issues led to a split in the Bolshevik Party, with Bogdanov spearheading the party's left-wing faction and attracting a following of notable intellectuals. Before Lenin died in 1924, however, he had succeeded in shaping Soviet society according to his own vision, and today Bolshevism is commonly identified with Leninism while Bogdanovism is little known. Sochor provides the first full exposition in English of Bogdanov's views, which, she asserts, must be understood to appreciate the choices available and the paths not taken during the formative years of the Soviet regime.

*Hands Free Mama* Rachel Macy Stafford, 2014-01-07 "Rachel Macy Stafford's post *The Day I Stopped Saying Hurry Up* was a true phenomenon on The Huffington Post, igniting countless conversations online and off about freeing ourselves from the vicious cycle of keeping up with our overstuffed agendas. *Hands Free Mama* has the power to keep that conversation going and remind us that we must not let our lives pass us by." --Arianna Huffington, Chair, President, and Editor-in-Chief of the Huffington Post Media Group, nationally syndicated columnist, and author of thirteen books <http://www.huffingtonpost.com/> DISCOVER THE POWER, JOY, AND LOVE of Living "Hands Free" If technology is the new addiction, then multi-tasking is the new marching order. We check our email while cooking dinner, send a text while bathing the kids, and spend more time looking into electronic screens than into the eyes of our loved ones. With our never-ending to-do lists and jam-packed schedules, it's no wonder we're distracted. But this isn't the way it has to be. In July 2010, special education teacher and mother Rachel Macy Stafford decided enough was enough. Tired of losing track of what matters most in life, Rachel began practicing simple strategies that enabled her to

momentarily let go of largely meaningless distractions and engage in meaningful soul-to-soul connections. She started a blog to chronicle her endeavors and soon saw how both external and internal distractions had been sabotaging her happiness and preventing her from bonding with the people she loves most. Hands Free Mama is the digital society's answer to finding balance in a media-saturated, perfection-obsessed world. It doesn't mean giving up all technology forever. It doesn't mean forgoing our jobs and responsibilities. What it does mean is seizing the little moments that life offers us to engage in real and meaningful interaction. It means looking our loved ones in the eye and giving them the gift of our undivided attention, leaving the laundry till later to dance with our kids in the rain, and living a present, authentic, and intentional life despite a world full of distractions. So join Rachel and go hands-free. Discover what happens when you choose to open your heart—and your hands—to the possibilities of each God-given moment.

*The State and Revolution* V. I. Lenin,2024-01-16 Lenin's booklet *The State and Revolution* struck the world of Marxist theory like a lightning bolt. Written in the months running up to the October Revolution of 1917, Lenin turned the traditional socialist concept of the state on its head, arguing for the need to smash the organs of the bourgeois state to create a 'semi-state' of soviets, or workers' councils, in which ordinary people would take on the functions of the state machine in a new and radically democratic manner. This new edition includes a substantial introduction by renowned theorist Antonio Negri, who argues for the continued relevance of these ideas.

*Dynamic Stability and Control of Tripped and Untripped Vehicle Rollover* Zhilin Jin,Bin Li,Jingxuan Li,2022-06-01 Vehicle rollover accidents have been a serious safety problem for the last three decades. Although rollovers are a small percentage of all traffic accidents, they do account for a large proportion of severe and fatal injuries. Specifically, some large passenger vehicles, such as large vans, pickup trucks, and sport utility vehicles, are more prone to rollover accidents with a high center of gravity (CG) and narrow track width. Vehicle rollover accidents may be grouped into two categories: tripped and untripped rollovers. A tripped rollover commonly occurs when a vehicle skids and digs its tires into soft soil or hits a tripping mechanism such as a curb with a sufficiently large lateral velocity. On the other hand, the untripped rollover is induced by extreme maneuvers during critical driving situations, such as excessive speed during cornering, obstacle avoidance, and severe lane change maneuver. In these situations, the forces at the tire-road contact point are large enough to cause the vehicle to roll over. Furthermore, vehicle rollover may occur due to external disturbances such as side-wind and steering excitation. Therefore, it is necessary to investigate the dynamic stability and control of tripped and untripped vehicle rollover so as to avoid vehicle rollover accidents. In this

book, different dynamic models are used to describe the vehicle rollover under both untripped and special tripped situations. From the vehicle dynamics theory, rollover indices are deduced, and the dynamic stabilities of vehicle rollover are analyzed. In addition, some active control strategies are discussed to improve the anti-rollover performance of the vehicle.
